The UVM Special Collections Project will be conducting a hydrant flow test on Colchester Avenue for approximately 3-5 minutes (3000 - 5000 gallons) on Friday 20, 2018 1000-1100. Adjacent building occupants may experience discolored water due to the naturally occurring minerals and sediments that accumulate in the water mains and are disturbed via flushing process. If this should happen, please let the cold water run for several minutes and this will help clear your water.

Point of contact for this flow test is Dan Williams: 802-373-2375 cell or Daniel.Williams@uvm.edu
