REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

INDEPENDENT AUDITOR'S REPORT

To the Honorable Mayor and City Council City of Burlington, Vermont

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Burlington, Vermont (the City), as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the City's basic financial statements, and have issued our report thereon dated February 28, 2023.

Our report includes a reference to other auditors who audited the financial statements of the Burlington School District and the Burlington Electric Enterprise Fund, as described in our report on the City's financial statements. This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors. The financial statements of the Burlington Electric Enterprise Fund were not audited in accordance with *Government Auditing Standards*.

Report on Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the City's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM, REPORT ON INTERNAL CONTROL OVER COMPLIANCE, AND REPORT ON SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS REQUIRED BY THE UNIFORM GUIDANCE

INDEPENDENT AUDITOR'S REPORT

To the Honorable Mayor and City Council City of Burlington, Vermont

Report on Compliance for Each Major Federal Program

Opinion on Each Major Federal Program

We have audited the City of Burlington, Vermont's (the City) compliance with the types of compliance requirements identified as subject to audit in the OMB *Compliance Supplement* that could have a direct and material effect on each of the City's major federal programs for the year ended June 30, 2022. The City's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs.

The City's basic financial statements include the operations of the Burlington School District (a discretely presented component unit) which expended \$13,606,112 in federal awards which is not included in the City's Schedule of Expenditures of Federal Awards for the year ended June 30, 2021. Our audit, described below did not include the operations of this entity because their engaged other auditors to perform audits in accordance with Uniform Guidance.

In our opinion, the City complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2022.

Basis for Opinion on Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America (GAAS); the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States (Government Auditing Standards); and the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Our responsibilities under those standards

and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of the City and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of the City's compliance with the compliance requirements referred to above.

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules and provisions of contracts or grant agreements applicable to the City's federal programs.

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material, noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the City's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material, if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the City's compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with GAAS, Government Auditing Standards, and the Uniform Guidance, we

- exercise professional judgment and maintain professional skepticism throughout the audit.
- identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the City's compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- obtain an understanding of the City's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and

to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control Over Compliance

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Expenditures of Federal Awards Required by the Uniform Guidance

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Burlington, Vermont (the City) as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the City's basic financial statements. We issued our report thereon dated February 28, 2023, which contained unmodified opinions on those financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by the Uniform Guidance and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditures of Federal Awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

The accompanying notes are an integral part of this schedule.

Notes to Schedule of Expenditures of Federal Awards For the Year Ended June 30, 2022

Note 1. Summary of Significant Accounting Policies

- The accompanying Schedule of Expenditures of Federal Awards (the Schedule) includes the federal award activity of the City of Burlington, Vermont (the City) under programs of the federal government for the year ended June 30, 2022. The information in the Schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the City, it is not intended to and does not present the financial position, changes in net position, or cash flows of the City.
- Expenditures reported on the Schedule are reported on the modified accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited to reimbursement.
- Expenditures awarded from the Federal Emergency Management Agency (FEMA), must be presented on the Schedule when; 1) FEMA has approved the City's project worksheet (PW) and 2) the City has incurred the eligible expenditures. The \$100,193 reported for Disaster Grants Public Assistance (Presidentially Declared Disasters), AL 97.036, represents expenditures incurred in prior years that were approved by FEMA during fiscal year 2022.

Note 2. De Minimis Cost Rate

The City has elected not to use the 10-percent de minimis indirect cost rate as allowed under the Uniform Guidance.

Note 3. Donated Personal Protective Equipment (PPE) (Unaudited)

During fiscal year 2022, the City did not receive donated PPE from federal sources.

OFFICE OF THE CLERK/TREASURER City of Burlington

City Hall, Room 20, 149 Church Street, Burlington, VT 05401

Voice (802) 865-7000 Fax (802) 865-7014 TTY (802) 865-7142

February 28, 2023

Mayor and City Council City of Burlington 149 Church Street Burlington, Vermont 05401

To the Citizens, Mayor, and City Council of the City of Burlington:

The Annual Comprehensive Financial Report of the City of Burlington for the Fiscal Year ended June 30, 2022, is hereby submitted. Responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the following data, including financial statements, supporting schedules and statistical tables, is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the City. To provide a reasonable basis for making representations, management has established a comprehensive internal control framework that is designed to both protect the government's assets from loss, theft, or misuse and compile sufficient reliable information to the preparation of the financial statements in conformity with Generally Accepted Accounting Principles (GAAP). Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

Fiscal year 2022 represents the seventh year that the City of Burlington has compiled an Annual Comprehensive Financial Report (ACFR). The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City of Burlington for its Annual Comprehensive Financial Report for the fiscal year ending June 30, 2021. The compilation of this report required a substantial time investment by the Clerk/Treasurer's Office, but we are proud to continue our commitment to expanded disclosures of our financial position and results of operations.

The Certificate of Achievement is valid for a period of one year only. We believe that this ACFR conforms to the standards required for the certificate and will be submitting it to the GFOA for review.

City Charter, as well as State statutes, requires an annual audit by independent certified public accounts. The City's audit firm is Melanson. The independent auditor's report is located before the

financial section of this report. In addition, the audit was designed to meet the requirements of Title 2 CFR Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements of Federal Awards (the Uniform Guidance), as applicable. Information related to the Single Audit, including the Schedule of Expenditures of Federal Awards, findings and recommendations, and auditor's reports on the internal control structure and compliance with applicable laws and regulations, is not included in this year's ACFR, but is available in a separate report.

Management's discussion and analysis (MD&A) immediately follows the independent auditors' report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complements this letter of transmittal and should be read in conjunction with it for additional narrative overview and analysis of the City's activities.

THE CITY OF BURLINGTON

Description of the City

The City of Burlington, Vermont (the "City") is the largest city in Vermont and located in northwestern Vermont on the eastern shore of Lake Champlain directly across from northern New York State. The City is the commercial center of Chittenden County and encompasses 16 square miles. The City is 90 miles south of Montreal, Quebec, 220 miles northwest of Boston, Massachusetts, and 300 miles north of New York, New York.

Highways serving Burlington include State Highways 2 and 7 and Interstates U.S. 89 and 189. The Lake Champlain Transportation Company operates ferries on Lake Champlain between Vermont and New York.

The Burlington International Airport serves over 1.2 million passengers per year and accommodates non-stop air service to all three New York City metropolitan area airports, Philadelphia, both Washington D.C. airports, Chicago, Atlanta, Charlotte, NC, Denver, Dallas, Detroit, Minneapolis and Saint Paul. Passengers can reach nearly any destination world-wide with just one connection from Burlington.

Beginning in 2022, Amtrak train service came back to Burlington with daily bus service connecting the area to New York City with daily operations. The service is off to a strong start in the first six months of operation.

Bus service is provided by Greyhound Lines, Megabus, and Vermont Translines (operated by Vermont Agency of Transportation). Freight service is provided by the Vermont Railway Corporation and Rail America. Green Mountain Transit, which represents Burlington, Essex, South Burlington, Shelburne, Williston, Winooski, Milton, Hinesburg and a portion of Colchester provides local bus service. LINK Express routes serve Montpelier, Middlebury, and St. Albans commuters.

Form of Government

Burlington was incorporated as a City in 1865. On November 7, 2000, voters approved amendments to the City Charter, which provided for direct Mayoral appointment of department heads with City Council confirmation, clarified the Mayor's authority as the City's Chief Executive Officer, established the position of Chief Administrative Officer, and provided that City commissions would become advisory except when authority was re-delegated by the City Council.

About the Burlington Community

Located between the highest section of the Green Mountains and the widest part of Lake Champlain, the City of Burlington enjoys superb scenery and outstanding year-round recreational opportunities.

Cultural activities abound and are encouraged by the participation of businesses, educational institutions, and government. Several theaters for the performing arts, theater troupes, museums, fairs, and festivals fill the City's cultural calendar, while Burlington City Arts, a City Department, provides a well-known gallery for the display of contemporary art, as well as events including music, film, and performance.

The University of Vermont Medical Center is the state's academic medical center and serves approximately one million people in Vermont and New York. UVM Medical Center includes three founding organizations – Medical Center Hospital of Vermont, Fanny Allen Hospital, and University Health Center – and the UVM College of Medicine. The Vermont Regional Cancer Center and the Vermont-New Hampshire Regional Red Cross Blood Center are also located in Greater Burlington.

Burlington is also known throughout the state and the nation for its innovative and entrepreneurial spirit. The City of Burlington was the first city in the country to use 100% renewable energy for the electricity needs of its residents.

Burlington is regularly recognized in nationally published periodicals as one of the best places to live. The City's location, economic climate, and abundance of community resources contributed to its award as the most livable city in America for cities of less than 100,000 people by the U.S. Conference of Mayors in 1989. Since then, the City has enjoyed numerous awards from national publications recognizing the City for its beauty, sustainability, and livability.

Employee Relations

As of June 30, 2022, the City of Burlington employed approximately 682 full time employees, excluding school employees, and including 112 Burlington Electric Department employees. The City does not anticipate a significant change in staffing in the foreseeable future and believes its relations with its employees are generally good. All public employees except most supervisors, confidential employees, and certain school district employees in the State of Vermont have the right to organize and the right to bargain collectively with their public employers on matters of wages, terms and other conditions of employment other than managerial policy. The City has four separate labor associations: American Federation of State, County, & Municipal Employees, AFL-

CIO, Council 93, Local 1343 (AFSCME), noting that the school district negotiates separately for the school AFSCME employees; the International Brotherhood of Electrical Workers, AFL-CIO Local 300 (IBEW); the Burlington Police Officers' Association (BPOA); and the Burlington Firefighters Association, International Association of Fire Fighters Local 3044 (BFA). All four contracts were renegotiated in 2022 and the AFSCME and IBEW contracts are in effect for the period of July 1, 2022 to June 30, 2026. The BPOA and BFFA contracts expire on June 30, 2025, and their terms continue until a successor contract is in place. The City's school system has additional labor associations and the City's schools are currently negotiating a teachers' contract.

City Services

The City provides municipal services including police and fire protection, emergency medical services, street construction and maintenance, solid waste management, traffic signalization, planning and zoning, community and economic development, parks and recreation, library services, youth services, arts programs, educational and general administrative services. The City also operates the following major enterprise funds: (1) electric, (2) airport facilities and (3) wastewater.

Budget Process and Other Financial Policies Affecting Current Year

The budget process in the City of Burlington normally commences with a request by the Mayor that all Departments submit, in writing, a detailed estimate of the appropriations required for the efficient and proper conduct of their respective Departments during the next fiscal year. On or before the fifteenth day of June, the Mayor must submit to the City Council a copy of the Budget for the ensuing fiscal year, which contains a clear general summary of its contents, and in detail, all estimated income, the proposed property tax levy and all proposed expenditures, including debt service.

The City Council shall adopt the budget by resolution no later than June 30 of each year. The Council may reduce the submitted appropriations by a majority vote, but may not increase the appropriations without an approving two-thirds vote of the Council. The City has never failed to adopt a budget. The legal level of control is at the department level.

The City has a comprehensive list of financial policies. For General Fund unassigned fund balance, the targeted balance is 10% percent of operating expenditures.

The City implemented a new Governmental Accounting Standards Board (GASB) Statement Number 87, *Leases*, in the current fiscal year, which resulted in significant change in accounting principles for the City's Major Enterprise Fund, the Burlington International Airport.

Economic Activity

The Greater Burlington area, which includes the City of Burlington and all of Chittenden County, is Vermont's major economic area. Most of the County's nonagricultural employment lies within the three-community region of Burlington, Essex and South Burlington. Manufacturing employment represents approximately 10% of the nonagricultural employment in the Burlington

area labor market. Non-manufacturing employment accounts for approximately 90% of employment. Education and health services, government and trade are principal areas of non-manufacturing employment in the Greater Burlington area.

Chittenden County has provided the bulk of the State's economic growth over the past ten years, which is reflected in the area's employment statistics. The Burlington Labor Market Area had an annual unemployment rate of 1.8% in July 2022. The State's unemployment rate was 2.2% as of July 2022.

Employment Data

The Greater Burlington area possesses a growing, educated work force with skills in a variety of areas. To keep a supply of workers skilled to meet the needs of new and existing business and industry, the State of Vermont assists with tuition-free training of new Vermont employees. Educational institutions, such as the University of Vermont, provide customized training programs and continuing education required by technicians and others in rapidly changing technological fields.

Housing Market

Over the past 10-years, through December 2021, the median sales price of single-family homes in Burlington has increased 44% to \$439,350 in 2021. Market appreciation in the past 2-years (8% in 2020 and 15% in 2021) is significantly above the 10-year average of 4%. Burlington contains approximately 6,909 owner-occupied housing units, accounting for 16% of Chittenden County's 43,498 owner-occupied units. The number of single-family primary residences sold in Burlington ranged between 219 and 285 over the past 10 years. The 10-year average number of sales is 250. The average number of sales in 2021 was 259.

The rental housing market in Burlington remains very strong, though low vacancy rates pose a challenge for prospective renters. A new report from HelpAdvisor.com found that in Vermont, only 2.4% of all rental units are vacant as of Q2 of 2022, which is the second lowest percentage out of any state and down from 4.5% in 2015. The low vacancy rate pushes demand for rental housing up, which results in increased rental rates. Various forms of rental housing assistance for low- to moderate-income households are provided by the Burlington Housing Authority, Champlain Housing Trust, and several other nonprofit housing corporations.

According to numerous sources, including SoFi, Vermont, tied with South Dakota, had the lowest foreclosure rate in the nation during the first half of 2022. Only 0.01% (one-hundredth of 1 percent) of homes in Vermont and South Dakota have undergone a foreclosure filing during the first half of 2022. This represents a total of 44 homes in Vermont.

Acknowledgements

This report reflects the City's commitment to improve and maintain financial statements in conformity with the highest standards of accountability. The strong financial position and excellent financial results reflected in this report would not have been possible without the leadership and

fiscal policies established by the Mayor and City Council and the hard work and dedication of the Clerk/Treasurer's team.

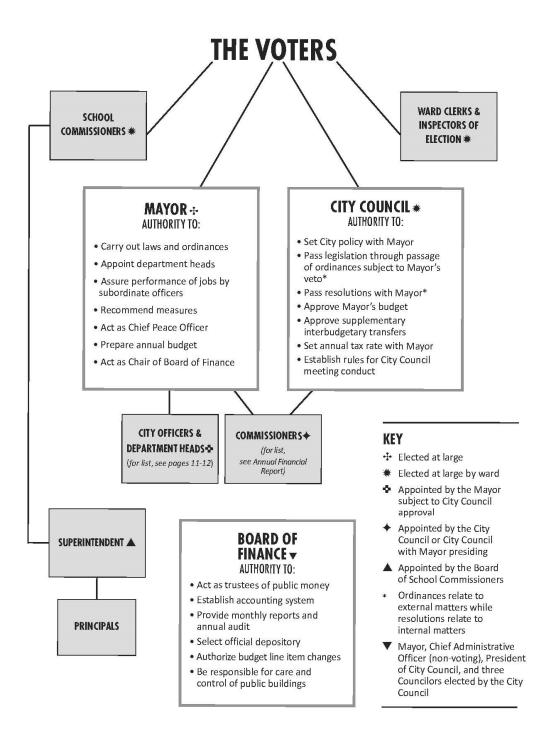

Respectfully submitted,

Kalling Soll

INDEPENDENT AUDITORS' REPORT

To the Honorable Mayor and City Council City of Burlington, Vermont

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component unit, each major fund, and the aggregate remaining fund information of the City of Burlington, Vermont (the City), as of and for the year ended June 30, 2022, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

In our opinion based on our audit and the report of other auditors, the accompanying financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Burlington, Vermont, as of June 30, 2022, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of the Burlington Electric Enterprise Fund, which represents 36 percent, 20 percent, and 59 percent, respectively, of the assets and deferred outflows of resources, net position and revenues of the business-type activities, respectively. Those financial statements were audited by other auditors whose report thereon has been furnished to us, and our opinion, insofar as it relates to the amounts included for the Burlington Electric Enterprise Fund, is based solely on the report of the other auditors. Also, we did not audit the financial statements of the Burlington School District, the discretely presented component unit. Those financial statements were audited by other auditors whose report thereon has been furnished to us, and our opinion, insofar as it relates to the amounts included for the Burlington School District, is based solely on the report of the other auditors.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in

Government Auditing Standards, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the City and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

The City's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the City's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not absolute assurance and, therefore, is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and Government Auditing Standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of
 expressing an opinion on the effectiveness of the City's internal control. Accordingly, no
 such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the
 aggregate, that raise substantial doubt about the City's ability to continue as a going
 concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis, the budgetary comparison for the General Fund, and certain pension and OPEB schedules be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The combining and individual nonmajor fund financial statements are for additional analysis and are not a required part of the basic financial statements.

The combining and individual nonmajor fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to

the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual nonmajor fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the Annual Comprehensive Financial Report (ACFR). The other information comprises the introductory and statistical sections, but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Emphasis of Matter

As discussed in Note 1G to the financial statements, in the year ending June 30, 2022, the City adopted new accounting guidance, Governmental Accounting Standards Board (GASB) Statement Number 87, *Leases*. Our opinion is not modified with respect to this matter.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated February 28, 2023 on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Merrimack, New Hampshire February 28, 2023

BASIC FINANCIAL STATEMENTS

(This page intentionally left blank.)

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of the City of Burlington, Vermont (the City), we offer readers this narrative overview and analysis of the financial activities of the City for the fiscal year ended June 30, 2022.

A. OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the basic financial statements. The basic financial statements comprise three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to financial statements. This report also contains required and other supplementary information in addition to the basic financial statements themselves.

<u>Government-wide financial statements</u>. The government-wide financial statements are designed to provide readers with a broad overview of our finances in a manner similar to a private-sector business.

The Statement of Net Position presents information on all assets, liabilities, and deferred outflows/inflows of resources with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position is improving or deteriorating.

The Statement of Activities presents information showing how the City's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes, earned but unused vacation leave, OPEB and net pension liability).

Both of the government-wide financial statements distinguish functions that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities include general government, public safety, public works, culture and recreation, and community development. The business-type activities include the operation of the Electric, Airport, Wastewater, Water and Stormwater utilities.

<u>Fund financial statements</u>. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Fund accounting is used to ensure and demonstrate compliance with finance-related legal requirements. All of the funds can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

<u>Governmental funds</u>. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources measurable and available at the end of the fiscal year. Such information may be useful in evaluating the City's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the City's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

An annual appropriated budget is adopted for the general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

<u>Proprietary funds</u>. Proprietary fund reporting focuses on the determination of operating income, changes in net position (or cost recovery), financial position, and cash flows. The proprietary fund category includes enterprise funds.

Enterprise funds are used to report activity for which a fee is charged to external users, and must be used when one of the following criteria are met: (1) activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges, (2) laws or regulations require the activity's cost of providing services be recovered with fees and charges, and (3) the pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs such as depreciation or debt service. The primary focus on these criteria is on fees charged to external users. Enterprise funds are used to report the same functions presented as business-type activities in the government-wide financial statements, only in more detail. Specifically, enterprise funds are used to account for Electric, Airport, Wastewater, Water and Stormwater activities. The proprietary fund financial statements provide separate information for the Electric, Airport and Wastewater funds, which are considered to be major funds.

<u>Fiduciary funds</u>. Fiduciary funds are used to account for resources held for the benefit of parties outside the City. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the City's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

<u>Notes to financial statements</u>. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

<u>Other information</u>. In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information, which is required to be disclosed by accounting principles generally accepted in the United States of America.

B. FINANCIAL HIGHLIGHTS

- The assets and deferred outflows of resources of the City exceeded its liabilities and deferred inflows of resources at the close of the most recent fiscal year by \$412,355,763 (net position), an increase of \$43,243,322 in comparison to the prior year.
- Total net position of the City's component unit, the Burlington School District, amounted to \$25,960,225, an increase of \$2,547,352 for the year.
- As of the close of the current fiscal year, governmental funds reported combined ending fund balances of \$39,073,886, a decrease of \$693,726 in comparison to the prior year.
- At the end of the current fiscal year, unassigned fund balance for the general fund was \$8,637,873, a decrease of \$634,954 in comparison to the prior year.
- At the end of the current fiscal year, unrestricted fund balance (the total of the committed, assigned, and unassigned components of fund balance) for the general fund was \$18,413,997.

C. GOVERNMENT-WIDE FINANCIAL ANALYSIS

The following is a summary of condensed government-wide statement of net position for the current and prior fiscal year:

	NET POSITION (000s)	
	Governmental	Business-Type	
	Activities	Activities	<u>Total</u>
	<u>2022</u> <u>2021</u>	<u>2022</u> <u>2021</u>	<u>2022</u> <u>2021</u>
Current and other assets	\$ 73,091 \$ 70,9	12 \$ 169,183 \$ 112,735	\$ 242,274 \$ 183,647
Capital assets	191,671 182,04	47 356,192 333,585	547,863 515,632
Total assets	264,762 252,93	59 525,375 446,320	790,137 699,279
Deferred outflows of resources	12,960 17,90	02 5,459 7,670	18,419 25,572
Total assets and deferred outflows			
of resources	\$ 277,722 \$ 270,86	51 \$ 530,834 \$ 453,990	\$ 808,556 \$ 724,851
Long-term liabilities outstanding Other liabilities	\$ 131,317 \$ 160,75 22,605 19,65		\$ 293,873 \$ 308,127 46,325 38,501
Total liabilities	153,922 180,40	04 186,276 166,224	340,198 346,628
Deferred inflows of resources	22,309 2,14	46 33,693 6,965	56,002 9,111
Net position:			
Net investment in capital assets	115,250 109,9	18 246,060 228,051	361,310 337,969
Restricted	16,414 17,6	17 23,802 23,610	40,216 41,227
Unrestricted	(30,173) (39,22	24) 41,003 29,140	10,830 (10,084)
Total net position	101,491 88,3	11 310,865 280,801	412,356 369,112
Total liabilities, deferred inflows of resources and net position	\$ 277,722 \$ 270,86	51 \$ 530,834 \$ 453,990	\$ 808,556 \$ 724,851

The largest portion of net position \$361,309,458 reflects our investment in capital assets (e.g., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets that is still outstanding. These capital assets are used to provide services to citizens; consequently, these assets are not available for future spending. Although the investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of net position of \$40,216,907 represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net position is \$10,829,398, which represents a combination of our governmental activities and business-type activities. Our governmental activities unrestricted net position is a deficit of \$30,173,312. The negative balance primarily results from recognizing our net pension liability in accordance with Governmental Accounting Standards Board (GASB) Statement Number 68, *Accounting and Financial Reporting for Pensions*. See financial statement notes for additional information. Our business-type activities unrestricted net position is \$41,002,710. About 39% of this balance is derived from our Electric Enterprise Fund.

The following is a summary of condensed government-wide statement of changes in net position for the current and prior fiscal year:

CHANGES IN NET POSITION (000s)

Transfers in / (out)	_	3,770	_	4,500		(3,770)	_	(4,500)			
Change in net position		13,180		(4,582)		30,064		17,753		43,244	13,171
Net position - beginning of year, as restated	_	88,311	_	92,893		280,801	_	263,048		369,112	355,941
Net position - end of year	\$_	101,491	\$_	88,311	\$	310,865	\$_	280,801	\$	412,356 \$	369,112

Governmental activities. Governmental activities for the year resulted in an increase in net position of \$13,179,623. This is primarily due to the increase in charges for services of 16% from the prior year as the economy improved, as well as an increase in operating grants and contributions, which is comprised of various grants. ARPA is offset by expenses, but the CARES grant of \$5.2 million was recognized due to prior year loss of revenues.

<u>Business-type activities</u>. Business-type activities for the year resulted in an increase in net position of \$30,063,699. Key elements of this change are discussed in Section D of the Management's Discussion and Analysis.

D. FINANCIAL ANALYSIS OF THE CITY'S FUNDS

<u>Governmental funds</u>. The focus of governmental funds is to provide information on nearterm inflows, outflows, and balances of spendable resources. Such information is useful in assessing financing requirements. In particular, unassigned fund balance may serve as a useful measure of the City's net resources available for spending at the end of the fiscal year.

General Fund

The General Fund is the chief operating fund. At the end of the current fiscal year, unassigned fund balance of the General Fund was \$8,637,873, while total fund balance was \$22,127,642.

The City has an established General Fund balance policy that outlines a process for reaching and maintaining the targeted level of unassigned fund balance, and the priority for the use of amounts in excess of the target. The policy provides a mechanism for monitoring the General Fund unassigned fund balance. A target of 10%, with a minimum of 5% to a maximum of 15% of operational costs has been established. Therefore, a comparison of both unassigned fund balance, as a measure of the General Fund's liquidity, and total fund balance of the General Fund to prior year and as a percentage of operational costs is presented below:

				% OI
				Total General
City General Fund	6/30/22	6/30/21	Change	Fund Expenditures
Unassigned fund balance	\$ 8,637,873	\$ 9,272,827	\$ (634,954)	11.7%
Total fund balance	\$ 22,127,642	\$ 21,091,952	\$ 1,035,690	30.0%

0/ - £

The total fund balance increased due to positive net budgetary results of \$1 million. Increase to assigned fund balance of \$1.6 million resulted in unassigned fund balance decrease of \$635 thousand. New assignments included \$750 thousand for dedicated rebuilding fund of the police department, \$520 thousand for investment into parks, cemeteries and public buildings and various other assignments.

Capital Projects Fund

The Capital Projects Fund, a major fund, had a decrease in fund balance of \$2,743,585 during the current fiscal year, which put the overall fund balance position in the amount of \$8,605,367. The fund reports project deficits of \$703,308 as unassigned fund balance. Restricted fund balance of \$9,308,675 represents projects that began during the current fiscal year but have not been completed yet. The decrease in fund balance was caused mainly by the spending of resources obtained through the issuance of long-term debt in the prior period on capital acquisition and construction in the current period. That is, the fund

balance that resulted from the previous long-term debt issuance was spent down during the current period as the related capital projects progressed.

Other Governmental Funds

The other governmental funds incurred an increase in fund balances of \$1,014,169, which is primarily due to tax increment revenues exceeding debt service and related costs by \$1,764,231 in the TIF downtown district.

<u>Proprietary funds</u>. Proprietary funds provide the same type of information found in the business-type activities reported in the government-wide financial statements, but in more detail.

A comparison of the unrestricted net position of each enterprise fund compared to the prior year is shown below:

	<u>Unrestricted Net Position</u>							
		6/30/22		6/30/21		Change		
Electric	\$	16,185,803	\$	15,734,140	\$	451,663		
Airport		13,421,478		4,746,228		8,675,250		
Wastewater		3,682,356		3,589,543		92,813		
Nonmajor funds:								
Water		6,014,799		3,331,059		2,683,740		
Stormwater	_	1,698,274	_	1,255,303	_	442,971		
Total	\$	41,002,710	\$	28,656,273	\$	12,346,437		

Specific factors concerning the finances of each proprietary fund are discussed below:

- The Burlington Electric Enterprise Fund unrestricted net position at June 30, 2022 increased from the previous year partly due to sales to ultimate customers, which reflected a 7.5% increase in rates effective August 1, 2021. For additional information, please refer to the separate financial statements issued for the Burlington Electric Enterprise Fund.
- The Burlington International Airport's unrestricted net position increased from the previous year primarily due to stimulus grants under the CARES, CRRSA and ARPA grants, some of which were used to offset operating expenses. For additional information, please refer to the separate financial statements issued for the Burlington International Airport.
- The net increase in the Wastewater, Water and Stormwater Funds (which are managed on a combined basis) is primarily the result of careful monitoring of those budgets and efforts to maintain costs, as well as a rate restructuring and the addition of a fixed meter fee component and a private fixed fee charge. For additional information, please refer to the separate financial statements issued for the Wastewater and Water Enterprise Funds.

E. GENERAL FUND BUDGETARY HIGHLIGHTS

The City approved a fiscal year 2022 budget including dedicated taxes, tax increment financing and interdepartmental charges that were netted against appropriations for the presentation on the budget and actual statement in the financial statements.

The City's General Fund budget for fiscal year 2022 (after amendments) resulted in a budgeted surplus of \$28,136. The actual performance resulted in revenues and other sources exceeding expenditures and other uses by \$1,035,690. Revenues (not including other financing sources) exceeded budget by \$309,685 while unspent expenditures were \$4,393,308 (excluding other financing sources). The use of fund balance represents the use of restricted, committed, assigned and unassigned fund balance categories. Some of the use of fund balance remained unspent at June 30, 2022 primarily in the other uses or the transfers out category, which shows transfers less than budget primarily due to transfers out to the Capital Projects Fund not made yet from use of assigned fund balance. Police department's expenditures came in \$1,204,373 less than anticipated due to open positions.

F. <u>CAPITAL ASSETS AND DEBT ADMINISTRATION</u>

<u>Capital assets</u>. Total investment in capital assets for governmental activities at year-end amounted to \$191,670,821 (net of accumulated depreciation), an increase of \$9,623,869 from the prior year. Total investment in capital assets for business-type activities at year-end amounted to \$356,191,594 (net of accumulated depreciation/amortization), an increase of \$20,718,832 from the prior year. This investment in capital assets includes land and land improvements, construction in progress, buildings and improvements, infrastructure, distribution and collection systems, and vehicles, machinery, equipment, and furniture and right to use assets.

Major capital asset events during the current fiscal year for governmental activities included Moran Plant improvements of \$2,069,684, Champlain Parkway improvements of \$4,215,999 and Bike Path design, engineering and construction costs of \$2,703,986.

The increase in business-type activities is primarily due to AIP projects at the Burlington International Airport. Other major capital asset events during the current fiscal year for business-type activities can be found in the various stand-alone enterprise fund financial statements.

Additional information on the City's capital assets can be found in Note 11 on pages 81 to 82 of this report.

<u>Credit rating.</u> Moody's Investor Service (Moody's) assigned an Aa3 rating to the City's general obligation debt. Moody states that the Aa3 reflects a growing and strong reserve position and a very strong cash position.

<u>Long-term debt</u>. The table below outlines our long-term debt (bonds payable and state revolving loans) at the current and prior year end. Bonds are backed by pledged revenues of the respective enterprise funds and other debt is backed by full faith and credit of the City.

	Bonds Payable										
		and State R	evo	olving Loans							
		6/30/22		Change							
Governmental Activities:											
City	\$	76,206,371	\$	80,000,354	\$	(3,793,983)					
Business-Type Activities:											
Electric		91,100,359		71,776,910		19,323,449					
Airport		26,603,651		26,910,262		(306,611)

Component Unit:											
School District	_	43,034,535		42,729,808		304,727					
Total	\$	257,213,648	\$	240,168,158	\$	17,045,490					

Additional information on the City's long-term debt can be found in Note 15 on pages 84 to 91 of this report.

<u>Net pension liability</u>. The following is an analysis of the City's and our component unit's net pension liability at the end of the current and prior fiscal years. The majority of this increase will increase pension expense over the next four years, and therefore, reduce unrestricted net position.

		Net Pen	sion	Liability	
		6/30/22		6/30/21	<u>Change</u>
Governmental Activities:					
City	\$	41,261,286	\$	66,665,322	\$ (25,404,036)
Business-Type Activities:

G. ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

Mayor's Overview

Management Discussion and FY 23 Budget Summary

Amidst challenging and uncertain economic times and fiscal constraints on the municipal budget, the proposed FY 23 budget prioritizes public safety by creating several new Burlington Police Department positions that will strengthen our ability to respond and rebuild the department. The proposed budget also makes major investments in important community priorities using one-time ARPA funds and Unassigned Fund Balance that now exceeds our targeted levels after a decade of disciplined focus on building our reserves. Further, as a result of state education tax changes, Burlington taxpayers will realize the investments in this budget while also experiencing an overall property tax reduction of 4%.

Several factors contributed to FY 23 being a challenging budget year. The United States is experiencing historic inflation that continues to rise, most recently reported as 8.6% by some measures. The City is continuing to see revenue shortfalls impacted by the pandemic, such as boat slip rental, parking fees, and donations. The FY 22 budget relied on \$6.5 million of one-time money for general operating revenues, and we have targeted a smaller amount for FY 23. Further, contract negotiations with our four municipal unions were ongoing during the development of the budget, which has meant that finalizing personnel-related costs has been difficult. Finally, voters did not ultimately support the \$0.04 municipal tax rate proposed on Town Meeting Day limiting the new property tax revenue available.

However, as a result of hard work by the City's department heads to manage their budget areas, and some revenue sources exceeding initial projections, we were able to fully close what had been projected to be a more than \$2 million gap without service reductions.

FY 23 Budget Principles

The Administration began the FY 23 budget process by laying out the principles that would guide our work to develop the budget. Those principles were:

- Voters want a focused, disciplined budget that does not increase the property tax burden;
- Avoiding layoffs and furloughs of current City employees is a high priority;
- Cuts should be focused on non-personnel budget lines;
- We will use one-time monies, like ARPA and Unassigned Fund Balance monies to respond to new and recovery-related emergent community concerns;
- We will continue to invest heavily in addressing the climate emergency, in significant part through expanded efforts in the Burlington Electric Department;
- Additional new federal opportunities will be available beyond the City's ARPA allocation and recent earmarks, but they will take time to be fully realized and may result in mid-year budget adjustments; and Negotiations with the City's four unions are in progress, so the budget is more uncertain throughout the point in the process, compared to other years.

Investments Using One-Time Sources

Through a decade of careful and diligent stewardship of the City resources, the Administration has built up a strong Unassigned Fund Balance, which is sometimes referred to as a "Rainy Day Fund." Consistent with the City's Unassigned Fund Balance Policy to maintain a 10% target balance, we are able to make \$2.445 million of one-time investments in City priorities. In the FY 23 budget, the Administration has proposed using our Unassigned Fund Balance surplus toward community initiatives.

In 2021, Burlington was awarded \$27 million of ARPA funding from the Federal government. In FY 22, \$14.8 million of those funds were used for revenue replacement, housing and homelessness initiatives, public health, property tax relief, economic recovery services, and police officer retention bonuses. An amount of \$12.2 million of ARPA is left to obligate.

Police Department Rebuilding Plan

Investment in our public safety resources is a top priority in the coming year with major new investments for both rebuilding the police department and continuing our longstanding public safety transformation efforts. The FY 23 budget fully funds a robust rebuilding plan to hire officers back to the 87-officer authorized cap.

The proposed three-year rebuilding plan invests \$1.2 million to keep current officers in the Police Department and attract new officers to Burlington.

The \$1.2 million recruitment and retention plan allocates funding toward:

- \$500,000 toward a competitive contract with the Burlington Police Officers Association;
- \$270,000 for signing bonuses to pay 18 new officers \$15,000 to join the Burlington Police Department;
- \$200,000 for a recruitment firm and for marketing efforts to advertise that the Burlington Police Department is hiring; and
- \$150,000 for additional incentives for officers, such as housing stipends for officers to live in Burlington, education, and childcare.

Racial Equity Inclusion and Belonging

Since creating the Racial Equity Inclusion and Belonging Department in the FY 20 budget, the City has dramatically increased its investment in the department from approximately \$100,000 annually to over \$1.7 million, making Burlington's department the most substantial in Vermont, and larger even than the State government's office. In FY 23, we will continue this investment with a \$1.8 million budget.

Funding at this level will allow the City to continue its anti-racism training for all employees, continue the tradition of hosting a major Juneteenth celebration, and to continue numerous policy initiatives.

Net Zero Energy City and Climate Emergency Initiatives

The FY 23 budget continues the Administration's priority to invest toward our Net Zero Energy City goals and to fight the climate emergency. These initiatives are largely funded through Burlington Electric Department revenues, federal grants, and the Net Zero Energy Revenue Bond, overwhelmingly supported by more than 70% of voters in December 2021. These investments include:

- Over \$2 million of funds budgeted in the Burlington Electric Department for customer strategic electrification incentives and programs, such as rebates for heat pumps, e-bike, e-mowers, and home charging stations;
- \$1.5 million budgeted in BED for energy efficiency incentives and programs;
- Continuing to replace our City fleet with electric vehicles and hybrid vehicles, with at least seven vehicles planned for FY 23.

Streets, Sidewalks, and Transportation

With voters' support of the Capital Infrastructure Bond on Town Meeting Day 2022, the City will continue addressing the backlog of investments in our streets and sidewalks. The FY 23 budget allows for the City to make historic reinvestments in transportation and transportation infrastructure including:

- \$1.5 million of bike and pedestrian improvements, including protected bike lanes on North Champlain Street; bike and pedestrian improvements on Manhattan Drive; constructing the modern, one-lane Shelburne Street roundabout; upgrading University Place to add bike lanes and improved crosswalks; and constructing a shared-use path on Mansfield Avenue:
- \$1.6 million to rebuild three miles of sidewalks and resources to complete a new citywide sidewalk condition assessment so that the Department of Public Works can update its target for work moving forward;
- \$450,000 for traffic calming projects that also improve active transportation safety in the Birchcliff, East Avenue, and Mansfield Avenue neighborhoods and \$300,000 to expand traffic calming in other parts of the City;
- \$1.1 million to develop a shared use path on Intervale Road that will improve overall safety and accommodation for pedestrians and cyclists visiting the Intervale Center and the Wildways trail network;
- \$40 million for the Champlain Parkway that will add 1.5 miles of shared use path, new crosswalks, raised intersections, transit prioritization at signalized intersections, pedestrian signals, transit shelters, and other multi-modal accommodations in the South End.

Property Tax Rates

In recognition of the challenging financial times many Burlington residents continue to face, this budget maintains the General City tax rate at the same level as last year. Due to a bill recently passed by the Legislature and signed into law by the Governor, the education tax rate will decrease this year due to a \$90 million surplus in the state's education fund.

This allows the budget to restore several discretionary tax rates that were held below the voter-authorized maximum rate levels last year, fully funding the Conservation Legacy Fund, the Library Tax, Penny for Parks, and the Housing Trust Fund.

The total proposed FY 23 Property Tax Rate (proposed Municipal Tax Rate plus estimated Education Rate) provides for a reduction in taxes from FY22. The FY 23 tax rates are set per the table below and these would result in an overall decrease in tax rates of 4% for both homestead and non-homestead taxpayers.

FY 23 Tax Rates as compared to FY 22 Tax Rates

Rate	FY 22	FY 23
Municipal	\$0.67	\$0.71
Local Agreement	\$0.00	\$0.00
Education Homestead declaration – estimated	\$1.46	\$1.39
Education Non- homestead (commercial) - estimated	\$1.53	\$1.47

Thanks to the City team who made an extraordinary effort to create a Fiscal Year 2023 Budget, while also delivering a great deal to advance Burlington values in the year ahead.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the City of Burlington's finances for all those with an interest in the City's finances. Questions concerning any of the information provided in this report or requests for additional financial information can be found on the City's web page at https://www.burlingtonvt.gov/ or should be addressed to:

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

FOR THE YEAR ENDED JUNE 30, 2022

Net Changes in Fund Balances - Total Governmental Funds	\$	(693,726)
 Governmental funds report capital outlays as expenditures. However, in the Statement of Activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense: 		
Capital outlay purchases		17,146,731
Depreciation		(7,493,350)
Effect from disposal of capital assets		(29,512)
 Revenues in the Statement of Activities that do not provide current financial resources are fully deferred in the Statement of Revenues, Expenditures and Changes in Fund Balances. Therefore, the recognition of revenue for various types of accounts receivable (i.e., real estate and personal property, etc.) differ between the two statements. 		(377,075)
 The issuance of long-term debt provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the financial resources of governmental funds. Neither transaction, however, has any effect on net position: 		
Issuance of bonds		(1,750,000)
Issuance of equipment notes		(2,830,700)
Repayments of debt		6,861,070
Final amortization of deferred amount on refunding		(157,117)
Bond premium activity, net of amortization		130,042
 In the statement of activities, interest is accrued on outstanding long-term debt, whereas in governmental funds interest is not reported until due. 		19,813
 Some expenses reported in the Statement of Activities do not require the use of current financial resources and therefore, are not reported as expenditures in the governmental funds. 		
Increase in pension expense from GASB 68		2,086,322
Increase in OPEB expense from GASB 75		(330,046)
Change in compensated absences liability		490,354
Change in insurance reserves	_	106,817
Change in Net Position OF Governmental Activities	\$_	13,179,623

Notes to Financial Statements

Incorporated in 1865, the City of Burlington, Vermont (the City) operates under a tripartite system of government with the Mayor serving as Chief Executive, the City Council as the legislative body and the Commissioners as the primary policy makers within their respective departments. The City Charter authorizes the provision for the following services for the residents of the City: general administration, public safety, public works, community development, culture and recreation, utilities and education.

1. Summary of Significant Accounting Policies

The accounting policies adopted by the City conform to generally accepted accounting principles (GAAP) as applicable to governmental entities. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing accounting and financial reporting principles. The following is a summary of the more significant accounting policies employed in the preparation of these financial statements.

A. The Financial Reporting Entity

This report includes all of the funds of the City of Burlington, Vermont. The reporting entity consists of the primary government; organizations for which the primary government is financially accountable; and other organizations for which the nature and significance of their relationship with the primary government are such that their exclusion would cause the reporting entity's financial statements to be misleading or incomplete. Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The primary government is financially accountable if it appoints a voting majority of the organization's governing body and it is able to impose its will on that organization or there is a potential for the organization to provide specific financial benefits to or burdens on the primary government. The following entity is reported as a discretely presented component unit, in a separate column in the government-wide financial statements to emphasize that it is legally separate from the City because it is fiscally dependent on the City, but does not provide services almost entirely to the City and the City guarantees debt of the School District. The City Council can override the School District's decisions concerning the debt that the City issues on behalf of the School District.

Burlington School District (the School District) – the School District's primary purpose is to carry out the vision of education in the community. The Burlington School District is governed by a separately elected School Board, the legal entity for conducting a system of public education within the geographic area of a school district. The system was created by, and is governed by, state statutes. Members of a Board are, therefore, state officers chosen by citizens of a district to represent them, and the state, in the legislative management of public

schools. The Board of School Commissioners has the dual responsibility for implementing statutory requirements pertaining to public education and local citizens' desires for educating the community's youth. For detailed information on the Burlington School District accounts, refer to separately issued financial statements, which can be obtained by contacting the School District's Financial Management at 150 Colchester Avenue, Burlington, Vermont 05401.

B. Basis of Presentation

The accounts of the City are organized and operated on the basis of fund accounting. A fund is an independent fiscal and accounting entity with a separate set of self-balancing accounts, which comprise its assets, liabilities, fund equity, revenues, and expenditures or expenses, as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are spent and the means by which spending activities are controlled.

The basic financial statements of the City include both government-wide statements and fund financial statements. The focus of the government-wide statements is on reporting the operating results and financial position of the City as a whole and present a longer-term view of the City's finances. The focus of the fund financial statements is on reporting on the operating results and financial position of the most significant funds of the City and present a shorter-term view of how operations were financed and what remains available for future spending.

Government-wide Statements: The Statement of Net Position and the Statement of Activities display information about the primary government, the City, and its component unit, the Burlington School District. These statements include the financial activities of the overall City, except for fiduciary activities. The statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Eliminations have been made to minimize the double counting of activities between funds. However, interfund services provided and used are not eliminated in the consolidation. These statements distinguish between the governmental and business-type activities of the City. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties.

The Statement of Activities presents a comparison between direct expenses and program revenues for each function of the City's governmental activities and for each segment of the City's business-type activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fund Financial Statements: The fund financial statements provide information about the City's funds, including fiduciary funds. Separate statements for each fund category—governmental, proprietary, and fiduciary – are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds.

The proprietary fund financial statements are reported using the *economic resources* measurement focus and the accrual basis of accounting. Under this method, revenues are recognized when earned and expenses are recorded when liabilities are incurred.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Operating revenues consists of sales of electricity, rents of electric property, fees to transmit electricity of others, sales of renewable energy credits, operation of other utilities to run generation facilities, rent of airport terminal space and buildings, concessions, commissions, parking receipts, sales of water, wastewater user charges, and other miscellaneous fees for service. Nonoperating revenues result from certain nonexchange transactions or ancillary activities. Nonoperating revenues consist of investment earnings, electric services rendered to customers upon their request, passenger facility charges, grant income, and building rents from buildings purchased for future expansion.

Operating expenses are defined as the ordinary costs and expenses for the operation, maintenance and repairs of the electric plant, airport, water facility, and wastewater facility. Operating expenses include the cost of production, purchased power, maintenance of transmission and distribution systems, administrative, and general expenses and depreciation and amortization. Operating expenses do not include the interest on bonds, notes or other evidences of indebtedness and related costs.

The City reports on the following major governmental funds:

General Fund - This is the City's main operating fund. It accounts for all financial resources of the City except those required to be accounted for in another fund.

Capital Projects Fund – This fund accounts for resources obtained and expended for the acquisition of major capital facilities or equipment.

The City reports on the following major enterprise funds:

Electric Fund - This fund accounts for the operations of the Burlington Electric Enterprise Fund. For more details on this fund, refer to its separately issued financial statements.

Airport Fund - This fund accounts for the operations of the Burlington International Airport. For more details on this fund, refer to its separately issued financial statements.

Wastewater Fund - The Division of Public Works provides 3 wastewater treatment plants, 25 pump stations, and 100 miles of collection system for year-round wastewater disposal. For more details on this fund, refer to its separately issued financial statements.

The fiduciary fund financial statements are reported using the *economic resources* measurement focus and the accrual basis of accounting. Under this method, revenues are recognized when earned and expenses are recorded when liabilities are incurred. The City reports the following fund types:

Pension Trust Fund – This fund accounts for monies contributed by the City and its employees and the income on investments, less amounts expended for the pensions of retired City employees. This fund is partially funded by a dedicated tax rate, which is determined by the City's Retirement Board, and subject to annual appropriation by the City Council.

Private-Purpose Trust Fund – This fund is used to report trust arrangements under which resources are to be used for the benefit of firemen injured in the line of duty, Christmas gifts for servicemen overseas, and Christmas dinners for the destitute. All investment earnings, and in some cases the principal of these funds, may be used to support these activities.

Custodial Fund – Effective January 1, 2020, Burlington Electric Department (BED) began to function as a fiscal agent and fund administrator under 30 V.S.A Section 209(d)(3) for Vermont Energy Efficiency Utility (EEU) and Thermal Energy and Process Fuels (TEPF) activities.

C. Measurement Focus

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. Government-wide and proprietary fund financial statements are reported using the economic resources measurement focus. This means that all assets and liabilities associated with the operation of these funds (whether current or noncurrent) are included on the balance sheet (or statement of net position). Equity (i.e., net total assets) is segregated into net investment in capital assets; restricted net position; and unrestricted net position. Operating statements present increases (i.e., revenues) and decreases (i.e., expenses) in net total position.

Governmental fund financial statements are reported using the current financial resources measurement focus. This means that only current assets and current liabilities are generally reported on their balance sheets. Their reported fund balances (net current assets) are considered a measure of available spendable resources, and are segregated into nonspendable; restricted; committed; assigned and unassigned amounts. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net current assets. Accordingly, they are said to present a summary of sources and uses of available spendable resources during a period.

D. Basis of Accounting

Basis of accounting refers to when revenues and expenditures or expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made, regardless of the measurement focus applied.

The government-wide and proprietary fund financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time the liabilities are incurred, regardless of when the related cash flow takes place. Nonexchange transactions, in which the City gives (or receives) value without directly receiving (or giving) equal value in exchange, include property taxes, grants, entitlements, and donations. On the accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. Revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Governmental funds are reported using the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. "Measurable" means the amount of the transaction can be determined, and "available" means the amount is collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. The City considers all revenues reported in governmental funds to be available if the revenues are collected within thirty days after year-end. Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, certain compensated absences, self-insured health and dental benefits, reserves for property and casualty and workers' compensation claims, net pension obligation, post-employment benefits and other long-term liabilities, which are recognized when the obligations are expected to be liquidated or are funded with expendable available financial resources.

General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under leases are reported as other financing sources in governmental funds.

Under the terms of grant agreements, the City funds certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Thus, when program expenses are incurred, there is both restricted and unrestricted net position available to finance the program. It is the City's policy to first apply cost-reimbursement grant resources to such programs, followed by general revenues. Expenditure driven grants are recognized as revenue when the qualifying expenditures have been incurred and other grant requirements have been met.

Recognition of revenues on funds received in connection with loan programs are recognized when loans are awarded and expenses incurred in excess of current grants and program income. An offsetting deferred inflows is recognized for all loans receivable. Loan repayment revenue is recognized as the loans are repaid.

The Burlington Electric Department (the Department) is an enterprise fund of the City. The City has overall financial accountability for the Department; its Council appoints the Commissioners of the Department which oversee its operations, and the City collateralizes the Department's general obligation debt. The Department is also subject as to rates, accounting, and other matters, to the regulatory authority of the State of Vermont Public Service Board (VPSB) and the Federal Energy Regulatory Commission (FERC). In accordance with FASB ASC Topic 980, Regulated Operations (and Codified in GASB Statement 62), the Department records certain assets and liabilities in accordance with the economic effects of the rate making process.

E. Cash and Short-Term Investments

Cash balances from all funds, except those required to be segregated by law, are combined to form a consolidation of cash. Cash balances are invested to the extent available, and interest earnings are recognized in the general fund. Certain special revenue, proprietary, and fiduciary funds segregate cash, and investment earnings become a part of those funds.

Deposits with financial institutions consist primarily of demand deposits, certificates of deposits, and savings accounts. A cash and sweep account is maintained that is available for use by all funds. Each fund's portion of this pool is reflected on the financial statements under the caption "cash and short-term investments".

For purpose of the Statement of Cash Flows, the proprietary funds consider investments with maturities of one year or less to be short-term investments.

F. Investments

Investments, generally, are presented at fair value. Where applicable, fair values are based on quotations from national securities exchanges, except for certain investments that are required to be presented using net asset value (NAV). The NAV per share is the amount of net assets attributable to each share outstanding at the close of the period. Investments measured using NAV for fair value are not subject to level classification.

G. Leases

Effective July 1, 2021, the City implemented a new standard, GASB Statement Number 87, *Leases*.

City as a Lessor: The City recognizes a lease receivable and a related deferred inflow of resources. At the commencement of a lease, the City initially measures the lease receivable at the present value of payments expected to be received during the lease term. Subsequently, the lease receivable is reduced by the principal portion of lease payments received. The deferred inflow of resources is initially measured as the initial amount of the lease receivable, adjusted for lease payments received at or before the lease commencement date. Subsequently, the deferred inflow of

resources is recognized as revenue over the life of the lease term on a straight-line basis over its useful life. The following key assumptions are made:

The City uses its estimated incremental borrowing rate as the discount rate for leases when the interest rate is not explicitly stated.

The lease term includes the noncancellable period of the lease, including renewal terms reasonably certain to be exercised. Lease receipts included in the measurement of the lease receivable are comprised of fixed payments from the lessee.

The City monitors changes in circumstances that would require a remeasurement of its lease receivable and will remeasure the lease receivable if certain changes occur that are expected to significantly affect the amount of the lease receivable.

City as a Lessee: At the commencement of a lease, the City initially measures the lease liability at the present value of payments expected to be made during the lease term. Subsequently, the lease liability is reduced by the principal portion of lease payments made. The lease asset is initially measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs. Subsequently, the lease asset is amortized on a straight-line basis over its useful life. The following assumptions are made:

The City uses the interest rate charged by the lessor as the discount rate. When the interest rate charged is not provided, the City uses its estimated incremental borrowing rate as the discount rate for leases.

The lease term includes the noncancellable period of the lease, including renewal terms reasonably certain to be exercised. Lease payments included in the measurement of the lease liability are comprised of fixed payments and purchase option price, if the City is reasonably certain that it will be exercised.

The City monitors changes in circumstances that would require a remeasurement of its lease and will remeasure the lease asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability. Lease assets are reported with other capital assets and lease liabilities are reported with long-term debt on the statement of net position.

H. Interfund Receivables and Payables

Transactions between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due from/to other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the noncurrent portion of interfund loans).

Advances between funds are offset by a fund balance reserve account in applicable governmental funds to indicate the portion not available for appropriation and not available as expendable financial resources.

Any residual balances outstanding between the governmental activities and businesstype activities are reported in the government-wide financial statements as "internal balances".

I. Jointly Owned Facilities

The Burlington Electric Department has recorded its 50% ownership interest in the McNeil Generating Station as capital assets. The Department is responsible for its proportionate share of the operating expenses of the jointly owned facilities, which are billed to the Department on a monthly basis. The associated operating costs allocated to the Department are classified in their respective expense categories in the statement of operations. Separate financial statements are available from the Department.

J. Equity Interests in Associated Companies

The Electric Department follows the cost method of accounting for its 6.38% Class B common stock, 1.97% Class C common stock and 7.69% Class C preferred stock ownership interest in Vermont Electric Power Company, Inc. (VELCO), and its 5.46% ownership interest in Vermont Transco LLC (Transco). Transco is an affiliated entity of VELCO. VELCO owns and operates a transmission system in the State of Vermont over which bulk power is delivered to all electric utilities in the State of Vermont. Under a Power Transmission Contract with the State of Vermont, VELCO bills all costs, including amortization of its debt and a fixed return on equity, to the State of Vermont and others using the system.

During the year ended June 30, 2022, the Department purchased 47,273 Class A Units and 60,165 Class B Units in Transco for a cost of \$1,074,380.

Schedule of ownership in associated companies at June 30, 2022:

Velco, Class B Common Stock	\$ 1,403,800
Velco, Class C Common Stock	39,200
Velco, Class C Preferred Stock	11,196
VT Transco, LLC, A Units	14,613,571
VT Transco, LLC, B Units	18,599,079
	\$ 34,666,846

K. Inventory and Prepaid Items

Inventory is valued at cost using the first-in/first-out (FIFO) method. The costs of governmental fund-type inventories are recorded as expenditures when purchased rather than when consumed. No significant inventory balances were on hand in governmental funds.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

L. Capital Assets

City

Capital assets, which include property, plant, equipment, land improvements, buildings and improvements, infrastructure, and right to use assets, are reported in the applicable governmental or business-type activities columns in the government-wide financial statements, as well as proprietary and fiduciary fund financial statements. Depreciable capital assets are defined by the City as assets with an estimated useful life of five years or greater, while non-depreciable do not consider estimated useful life. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed.

Property, plant, and equipment are depreciated/amortized using the straight-line method over the following estimated useful lives:

	Capitalization	Estimated	
	Threshold	Service Life	
Land	\$ -	N/A	
Construction in Progress	-	N/A	
Land Improvements	25,000	30 years	
Buildings	-	25-150 years	
Building Improvements	20,000	25-150 years	
Vehicles, Machinery, Equipment and Furniture	10,000	5-15 years	
Right to Use Vehicles, Machinery and Equipment	10,000	5-15 years	
Book Collections	10,000	5 years	
Infrastructure	50,000	10-40 years	

Capital assets reported in the government-wide and proprietary fund financial statements are depreciated in order that the cost of these assets will be charged to expenses over their estimated service lives, generally using the straight-line method of calculating depreciation.

Electric Department

The Electric Department capital assets are stated at historical cost. Provisions for depreciation of general capital assets are reported using the straight-line method at rates based upon the estimated service lives and salvage values of the several classes of property. Depreciation of capital assets of the McNeil Station, the Highgate Converter Facility, and the Winooski One hydroelectric plant are calculated using the straight-line method. However, a portion of the current depreciation expense is only recoverable through future rates. The difference is included in deferred charges (calculated as the straight-line depreciation expense, less the depreciation expense on a sinking fund basis) and will be recovered in future years. See Note 12, Regulatory Assets and Regulatory Deferred Inflows of Resources.

Maintenance and repairs of capital assets are charged to maintenance expense. Replacements and betterments are capitalized to capital assets. When assets are retired or otherwise disposed of, the costs are removed from capital assets, and such costs, plus removal costs, net of salvage, are charged to accumulated depreciation.

The Department's capitalization policy considers four factors. Property will be capitalized when:

- 1) The combined cost to put a unit in service is more than \$500.
- 2) The unit's estimated life is at least three years.
- 3) The unit is vital to the Department and must be controlled, and tracked, even if it falls under the dollar limit stated in (1) above. Watt-hour meters to record electric usage are the only unit in this category.
- 4) The Public Utilities Commission (PUC) rules in a rate making decision that the Department will capitalize a cost that normally would not be capitalized based on the first three factors above. The Department does not have any assets in this category.

The depreciable lives of utility plant are as follows:

	Estimated
	Service Life
Production plant	10-50 years
Transmission plant	33-50 years
Distribution plant	10-50 years
General plant	5-50 years
Other plant	5 years

<u>Discretely Presented Component Unit – School District</u>

Capital assets purchased or acquired with an original cost of \$5,000 or more are reported at historical cost or estimated historical cost. Contributed assets are reported at acquisition value as of the date received. Additions, improvements and other capital outlays that significantly extend the useful life of an asset are capitalized. Other costs incurred for repairs and maintenance are expensed as incurred. Depreciation on all assets is provided on the straight-line basis over the estimated useful lives.

The assets are valued at historical cost when available and estimated historical cost where actual invoices or budgetary data was unavailable. Donated capital assets are valued at their acquisition value on the date received. All retirements have been recorded by eliminating the net carrying values.

Estimated useful lives are as follows:

	Capitalization	Estimated
	Threshold	Service Life
Buildings	\$ 5,000	20-50 years
Machinery and Equipment	5,000	3-50 years
Vehicles	5,000	3-25 years

M. Renewable Energy Credit Sales

The Electric Department received Renewable Energy Certificates (RECs) based on the amount of energy produced by its resources in a year. These RECs have value in terms of allowing the holder to demonstrate compliance with the Renewable Portfolio Standard (RPS) requirements of the various New England states. These RECs may be bought and sold, separate from the underlying energy production, and vary in value based on the amount of supply versus the demands created by the RPS, for that particular type of REC. The ability to claim energy renewability is transferred with the REC (either lost in the case of a REC sale or acquired in the case of a REC purchase).

The Electric Department's resource planning staff monitors output levels from the REC producing units, REC commitments made, the markets for these RECs, and the State statutes and rules that govern the creation and sale of these RECs. The Electric Department has and will continue to involve itself in discussions/proceedings as needed, either in Vermont or elsewhere in New England, where such rules and statutes are the subject at hand.

In 2008, the McNeil Generating Station (McNeil) installed a Regenerative Selective Catalytic Reduction (RSCR) unit. The RSCR unit significantly reduces McNeil's Nitrous Oxide (NOx) emission levels, which allows the station to qualify to sell Connecticut Class 1 Renewable Energy Certificates (RECs). The McNeil RECs are determined to be qualified for sale based on a review of emissions outputs submitted by McNeil. At the end of every quarter, an affidavit is signed stating whether or not McNeil's emissions output met the requirements needed to sell the RECs.

McNeil receives a certification from the State of Connecticut indicating that they met the standards for the quarter based on the statistics provided by McNeil. Sales are recorded as revenue upon delivery of the RECs to the customer.

Effective September 1, 2014, the Electric Department became the 100% owner of the Winooski One hydro facility. Currently operations at the facility are being managed through a contract with Northbrook Energy. Winooski One is a Low Impact Hydro Institute (LIHI) certified generator and is qualified to produce Massachusetts Class 2 RECs (non-waste-to-energy).

The Electric Department receives RECs from the Vermont Wind Project in Sheffield (the Electric Department is entitled to 40% of the output of the 40MW project), the Georgia Mountain Community Wind Farm (the Electric Department has entitlement to the full 100 MW of output from this project), along with RECs from its entitlement to 13.5 MW of the 52 MW Hancock Wind Project. The RECs from all of these wind facilities are qualified for participation in most of the high value New England REC markets.

In February 2015, the Electric Department commissioned a 500 KW AC solar array at the Burlington International Airport (and leases space on the parking garage roof under a long-term agreement between the Department and the Burlington International Airport). Following that, in October 2018, the Department commissioned a 107 KW AC solar array at the Electric Department's offices at 585 Pine Street. The Department owns 100% of these resources. Additionally, the City receives RECs from South Forty Solar, a 2.5 MW solar array, as well as several smaller solar arrays totaling 409 kW. These solar arrays are designed to help reduce the Electric Department's peak demand and energy needs during high priced periods.

The Electric Department no longer receives RECs from Vermont Standard Offer projects purchased by the Vermont Purchasing Agent. At the end of 2016, the Department's status as a distribution utility that sources 100% of the load it serves from renewable sources exempted it from purchasing energy from these projects in 2017. This exemption will continue through at least 2023.

The Department purchases Vermont Tier I RECs to replace the New England Class I RECs that are sold in the market to maintain its ability to claim 100% renewability.

For the fiscal year ended June 30, 2022, REC revenue for McNeil, wind resources, the Winooski One hydro facility, and the solar arrays were \$6,599,441, \$2,341,500, \$670,140, and \$178,252, respectively.

N. Pollution Remediation Obligations

The Electric Department faces possible liability as a potentially responsible party (PRP) with respect to the cleanup of certain hazardous waste sites. The City is currently a PRP as a landowner of a hazardous waste superfund site in Burlington, Vermont that is the subject of a remediation investigation by the Environmental Protection Agency (the EPA). The Department has agreed to share on an equal basis

all past and future costs incurred in connection with any and all settlements or actions resulting from the designation of the City as a PRP at this site. In light of the agreement between the City and the EPA concerning the remediation plan at the site, the Department believes that the likelihood of any liability material to the financial position of the Department is remote and as such, no liability has been accrued as of June 30, 2022.

The Electric Department faces possible liability with respect to the J. Edward Moran Electric Generation Station ("Moran Station"). The Moran Station is a decommissioned coal-fired power plant that was controlled and operated by the Department from 1954 until 1990 when the Department entered into a memorandum of understanding ("MOU") with the City of Burlington transferring responsibility for the Moran Station to the City. The MOU transferred the Moran Station to the City in "as is" condition and held the Department harmless for any and all future liability and or responsibility for such Moran Station and property, excluding environmental remediation (if any) which shall be required in the future by a state or federal environmental regulatory agency, for conditions existing before the transfer. In 2009 the City conducted an assessment of activities at the Moran Station site and was engaged in a corrective action plan with the Vermont Department of Environmental Conservation. The City and the Department entered into a letter of agreement in December 2009 where it was agreed that the Department shall make a \$100,000 payment to the City as settlement of the Department's liability for any and all environmental remediation costs associated with known environmental contamination at the Moran Station. In September 2019, the City began the efforts of creating a Site Resolution Plan and in February 2020, the City Council authorized the Mayor to execute a settlement agreement between the City and the Department to compensate the City for the costs of abating/remediating contaminants that had been identified at that time as requiring such abatement. In June 2022, the Department entered into a new MOU with the City of Burlington that calls for the Department to make a contribution of \$950,715 in eight equal installments with an annual interest rate of 1%.

O. Compensated Absences

It is the City's policy to permit employees to accumulate earned, but unused vacation and sick pay benefits. All vested sick and vacation pay is accrued when incurred in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

P. Liabilities to be Paid from Restricted Assets

The balance in these liabilities represents accrued interest payable on revenue bonds and construction invoices, which will be paid from restricted assets. The restricted assets will also be used for additional construction of certain assets, including certain costs in accounts and contracts payable.

Q. Fund Equity

Fund equity at the governmental fund financial reporting level is classified as "fund balance". Fund equity for all other reporting is classified as "net position".

<u>Fund Balance</u> - Fund balance represents the difference between current assets/deferred outflows and current liabilities/deferred inflows. The City reserves those portions of fund balance that are legally segregated for a specific future use or which do not represent available, spendable resources, and therefore, are not available for appropriation or expenditure. Unassigned fund balance indicates that portion of fund balance that is available for appropriation in future periods.

The City's fund balance classification policies and procedures are as follows:

- 1) Nonspendable funds represents amounts that cannot be spent because they are either (a) not in spendable form (i.e., inventory or prepaid items) or (b) legally or contractually required to be maintained intact (i.e., perpetual care). This fund balance classification includes General Fund reserves for prepaid expenditures, inventory, long-term advances to other funds and nonmajor governmental fund reserves for the principal portion of permanent trust funds.
- 2) Restricted funds represent amounts that are restricted to specific purposes by constraints imposed by creditors, grantors, contributors, or laws or regulations of other governments, or constraints imposed by law through constitutional provisions or enabling legislation. In the case of capital projects fund, these funds are restricted for projects financed by bonds. In the case of permanent fund, it represents the income portion of trust funds.
- 3) Committed funds represent amounts that can only be used for specific purposes pursuant to constraints imposed by formal action, resolutions of the City's highest level of decision-making authority, the City Council. Subsequent City Council approval is necessary to modify or rescind a fund balance commitment.
- 4) <u>Assigned funds</u> represent amounts that are constrained by the City's intent to use these resources for a specific purpose. The City's fund balance policy gives authority to the Mayor to delegate assignments to staff. Approved resolutions after year-end are also classified as assigned funds.
- 5) <u>Unassigned funds</u> represent the residual classification for the General Fund and include all amounts not contained in other classifications. Unassigned amounts are available for any purpose. Temporary fund balance deficits are reported as negative amounts in the unassigned classification in other governmental funds. Positive unassigned amounts are reported only in the General Fund.

When an expenditure is incurred that would qualify for payment from multiple fund balance types, the City uses the following order to liquidate liabilities: restricted, committed, assigned, and unassigned.

<u>Net Position</u> - Net position represents the difference between assets/deferred outflows and liabilities/deferred inflows. Net investment in capital assets, consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction or improvement of those assets. Net position is reported as restricted when there are limitations imposed on use either through enabling legislation adopted by the City or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. The remaining net position is reported as unrestricted.

R. Use of Estimates

The preparation of basic financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures for contingent assets and liabilities at the date of the basic financial statements, and the reported amounts of revenues and expenditures/expenses during the fiscal year. Actual results could vary from estimates that were used.

2. Stewardship, Compliance, and Accountability

A. Budgetary Information

The City follows these procedures in establishing the budgetary data reflected in the financial statements for the General Fund:

- 1) Departments, and departments with commission approval, prepare detailed recommendations to the Mayor on the budget. Prior to June 15, the Mayor, with the assistance of the other members of the Board of Finance, prepares and submits to the City Council a proposed budget for the fiscal year commencing the following July 1. The operating budget includes proposed expenditures and estimated revenues.
- 2) Prior to July l, the budget is legally enacted through passage of a resolution of the City Council.
- 3) The Mayor may propose, with the advice of the Board of Finance, amendments to the budget. Such proposed amendments require a majority approval of the City Council. The amount of such proposed amendments may be decreased by a simple majority vote of the City Council. Such proposed amendments may be increased above the level proposed by the Mayor only with a two-thirds vote of the City Council.
- 4) The Board of Finance is authorized to transfer budgeted amounts between line items within an appropriation account or within accounts of a depart-

- ment. Any revisions which increase the total expenditures of any department function or fund above the original appropriation must be approved by resolution of the City Council.
- 5) That portion of the designated fund balance that consists of operating and capital improvement carry-overs, represents unexpended appropriations, which are allowed to be carried over to later years as provided for by the City Charter or by resolution of the City Council. All other unexpended appropriations lapse at the close of the fiscal year. The City Charter specifically prohibits expenditures in excess of appropriations, except on an emergency basis for health, police, fire and public welfare.
- 6) The City of Burlington tax rate can change each year by the cost of CCTA, retirement, county and debt service without voter approval. However, any rate change on the tax rate for other purposes, above the maximum approved tax rate previously approved by voters, must be approved by City voters.
- 7) Title III, Section 70(a) of the Burlington City Charter defines the legal level of budgeting control at the department level. Excerpts of Section 70(a) are as follows:

No superintendent, Board or commission member or corresponding executive officer of any City department, with the exception of the health, police and fire departments, and then only in case of an emergency, shall expend any money or incur any obligation, unless there is an available appropriation from which the same may be paid and to which it may be charged, and shall not at any time expend any money or incur any obligation in excess of such appropriation. In case any such superintendent, Board or commission member or corresponding executive officer of any city department violates this provision, the city chief administrative officer shall report such occurrence to the mayor and to the city council. The mayor shall advise the city council as to whether there was appropriate justification for such violation and if the mayor and city council agree that such violation was unjustified, the mayor may recommend and the city council may determine that the office shall thereupon become vacant and shall be forthwith filled for the unexpired term of the officials authorized to make the original appointment in such case. Nothing in this section shall be construed to authorize the city council to remove a duly elected school commissioner or the superintendent of schools.

Encumbrance accounting, under which purchase orders, contracts and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is not employed as an extension of formal budgetary integration in any fund in the City.

B. Budgetary Basis

The General Fund final appropriation appearing on the "Budget and Actual" page of the fund financial statements represents the final amended budget after all reserve fund transfers and supplemental appropriations.

C. Budget Over Expenditures

The REIB and fire departments overspent their budget by \$51,386 and \$441,855, respectively. The fire department had offsetting revenues that exceeded budget to cover the expenditures.

D. Deficit Fund Equity

Certain individual funds reflected unassigned fund balance deficits as of June 30, 2022. It is anticipated that the deficits will be eliminated through future departmental revenues, bond proceeds, and transfers from other funds. See the combining statements for deficits, which are reflected as negative unassigned fund balance.

3. Deposits and Investments

Primary Government, excluding Electric Department

A. Custodial Credit Risk - Deposits

The custodial credit risk for deposits or investments is the risk that, in the event of the failure of the bank or counterparty to a transaction, the City will not be able to recover the value of its deposits, investments, or collateral securities that are in the possession of another party. The City's deposits were insured or collateralized as of June 30, 2022.

B. Investment Summary

The following is a summary of the City's investments as of June 30, 2022:

Investment Type	 Amount
Municipal bonds	\$ 1,805,386
Federal agencies	6,676,870
Market-linked certificates of deposits	2,542,284
Total investments	\$ 11,024,540

C. Credit Risk

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. The City's investments in municipal

bonds were rated Aa3 by Moody's at June 30, 2022. Market-linked certificates of deposits were unrated at June 30, 2022.

D. Concentration of Credit Risk

The City places no limit on the amount the City may invest in any one issuer. At June 30, 2022, the City's investment in Connecticut State General Obligation BDS Teachers Retirement Fund A of \$1,037,150 represented 9% of City's investments while each of the remaining investments represented under 5% of City's investments.

E. Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value to changes in market interest rates. The City has a formal investment policy that limits investment maturities based on type of security as a means of managing its exposure to fair value losses arising from increasing interest rates. Per the policy, investments remain sufficiently liquid to enable the City to meet its cash flow requirements. The City categorizes investments with maturities of one year or less as short-term investments. As of June 30, 2022, the maturities of the City's long-term investments were as follows:

			 Maturity	Years		
Investment Type		Fair Value	<u>1-5</u>		<u>6-10</u>	
Municipal bonds	\$	1,805,386	\$ 1,805,386	\$	-	
Federal agencies		6,676,870	6,676,870		-	
Market-linked certificates of deposit	_	2,542,284	 2,542,284	_	-	
Total investments	\$_	11,024,540	\$ 11,024,540	\$		

F. Foreign Currency Risk

Foreign currency risk is the risk that changes in foreign exchange rates will adversely affect the fair value of an investment. The City does not have any such investments, or policies for foreign currency risk.

G. Fair Value

The City categorizes its fair value measurements within the fair value hierarchy established by Governmental Accounting Standards Board Statement No. 72, *Fair Value Measurement and Application* (GASB 72). The hierarchy is based on the valuation inputs used to measure the fair value of the asset and give the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

Level 1 - Unadjusted quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs are observable.

Level 3 – Valuations derived from valuation techniques in which significant inputs are unobservable.

The City categorizes its fair value measurements as follows:

			Fair Value Measurements Using:						
				Quoted prices in active markets for entical assets		Significant observable inputs	Significant unobservable inputs		
<u>Investment Type</u>		Fair Value	(Level 1)			(Level 1) (Level 2)		(Level 3)	
Investments by fair value level:									
Debt securities:									
Municipal bonds	\$	1,805,386	\$	-	\$	1,805,386	\$	-	
Federal agencies		6,676,870		-		6,676,870		-	
Market-linked certificates of deposit	-	2,542,284				2,542,284	_		
Total	\$	11,024,540	\$	_	\$	11,024,540	\$_		

Debt securities classified in Level 2 are valued using either a bid evaluation or a matrix pricing technique. Bid evaluations may include market quotations, yields, maturities, call features, and ratings. Matrix pricing is used to value securities based on the security's relationship to benchmark quote prices. Level 2 debt securities have non-proprietary information that is readily available to market participants, from multiple independent sources, which are known to be actively involved in the market.

Burlington Electric Department

A. Custodial Credit Risk – Deposits

Except for the custodial fund deposits of \$3,706,742, the Department's deposits at June 30, 2022 are insured or collateralized.

B. Investments

The Department has a formal investment policy and is authorized per Article 1, Section 1.1 of the General Bond Resolution to invest in obligations as follows:

- 1) Direct obligations of the United States of America or obligations guaranteed by the United States of America.
- 2) Bonds, notes or other evidence of indebtedness issued or guaranteed by the CoBank, Federal Intermediate Credit Banks, FHLB, FNMA, GNMA, Export-Import Bank of the United States, Federal Land Banks, U.S. Postal Service, Federal Financing Bank, or any agency or instrumentality of or corporation wholly owned by the United States of America.

- 3) New Housing Authority Bonds issued by public agencies or municipalities and fully secured by a pledge of annual contributions under annual contribution contracts with the United States or America, or Project Notes issued by public agencies or municipalities and fully secured by a requisition or payment agreement with the United States of America.
- 4) Obligations of any state, commonwealth or territory of the United States of America, or the District of Columbia, or any political subdivision of the foregoing, with an investment grade rating not lower than the three highest categories by at least one nationally recognized debt rating service.
- 5) Certificates of deposit and bankers acceptances issued by banks which are members of the FDIC and each of which has a combined capital and surplus of not less than ten million dollars, provided that the time deposits in and acceptances of any bank under the Resolution (a) do not exceed at any time 25% of the combined capital and surplus of the bank or (b) are fully secured by obligations described in items 1, 2, 3, and 4 of this paragraph.
- 6) Repurchase contracts with banks, which are described in item 5 of this paragraph, or with recognized primary dealers in government bonds, fully secured by obligations described in items 1, 2, 3, and 4 of this paragraph.

C. Concentration of Credit Risk

Concentration of credit risk of investments is the risk of loss attributable to the magnitude of an investment in a single issuer. The Electric Department's invested balance was primarily in U.S. Treasuries at June 30, 2022.

D. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment. The Electric Department has minimized its risk exposure as its investments are limited to government securities and other conservative investments as outlined in the investment policy.

The Electric Department's investments as of June 30, 2022 (all of which are restricted by Bond resolution) only included money market funds and U.S. Treasury Bills.

The Department is required by its bond indenture to make monthly deposits into the renewal and replacement fund equal to 10% of the monthly revenue bond debt service funding requirements. Funds on deposit may be withdrawn from the renewal and replacement fund for expenses allowed by the bond covenant. Amounts in excess

of \$867,000 at June 30, 2022 may be returned to the revenue fund. A summary of deposits with bond trustees at June 30, 2022 is as follows:

Bond funds:

Construction fund	\$	19,203,851
Renewal and replacement fund	\$	867,000
Debt service fund		2,235,013
Debt service reserve fund		3,536,882
Accrued interest receivable	_	38,474
Total	\$	25,881,220

E. Fair Value

All of the Electric Department's investments as of June 30, 2022, are considered to be Level 1 under the fair value hierarchy.

Discretely Presented Component Unit - School District

A. Credit Risk

Statutes for the State of Vermont authorize the School District to invest in obligations of the U.S. Treasury, agencies and instrumentalities, other states and Canada, provided such securities are rated within the three highest grades by an approved rating service of the State of Vermont, corporate stocks and bonds within statutory limits, financial institutions, mutual funds and repurchase agreements. The School District does not have an investment policy on credit risk. Generally, the School District invests excess funds in savings accounts and various insured certificates of deposit.

B. Custodial Credit Risk

The custodial credit risk for investments is that in the event of failure of the counterparty, the School District will not be able to recover the value of its investments or collateral securities that are in possession of an outside party. Currently, the School District does not have a policy for custodial credit risk for investments.

At June 30, 2022, out of the School Districts deposits of \$36,098,889, \$132,163 were uninsured or uncollateralized.

C. Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The School District does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from fluctuations in interest rates.

Burlington Employees Retirement System (the System)

A. Credit Risk

The System invests in private equities, which are exempt from the credit risk disclosure.

B. Custodial Credit Risk

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, a government will not be able to recover the value of its investment or collateral securities that are in the possession of another party. The System does not have a policy for custodial credit risk.

The System's investment in private equities has a custodial credit risk exposure because the related securities are either uninsured or uncollateralized.

C. Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. The System does not have a policy for interest rate risk.

D. Foreign Currency Risk

Foreign currency risk is the risk that changes in foreign exchange rates will adversely affect the fair value of an investment. The System does not have a policy to manage foreign currency risk.

E. Fair Value

GASB 72 established fair value hierarchy levels based on the valuation inputs used to measure the fair value of the asset. The System does not place their investments by these levels, as they are all measured using NAV (net asset value per share or its equivalent), such as share of index funds or partnership member units.

Investments that are measured at fair value using NAV as a practical expedient are not classified in the fair value hierarchy per GASB 72. Hamilton Lane, Sustainable Woodlands, and USB Realty Investors investment value is based on the System's share of fair value of partner's capital at year-end. The System's share of EB DV and DL Index Funds of the Bank of New York Mellon and Johnson Mutual Funds were valued based on net asset values of the funds derived from audited financial statements of the respective funds. The investment strategy of the System matches the investment strategy of the funds. The primary holdings of the BNY Mellon funds and Johnson Mutual Funds are as follows:

EB DV Non-SL Stock Index Fund – Level 1
EB DL Smid Cap Stock Index Fund – Level 2
EB DV Non-SL International Stock Index Fund – Level 1
EB DV Non-SL Emerging Markets Stock Index Fund – Level 1
Johnson Institutional Core Bond – Level 2

The following summarizes the investment strategies of the underlying BNY Mellon funds and Johnson Mutual funds:

Equities – Stocks traded on U.S. security exchanges are valued by the service approved by the Trustee at closing market prices on the valuation date. Stocks traded on a non-U.S. security exchange are valued at closing market prices on the applicable non-U.S. security exchange on the valuation date. These types of investments are generally categorized within Level 1 of the fair value hierarchy. If market quotations are not readily available for any stocks traded on U.S. or non-U.S. security exchanges, the assets may be valued by a method the Trustee of the fund has determined accurately reflects fair value. In these instances, stocks are generally categorized within Level 2 of the fair value hierarchy.

Bond funds – Fixed income securities are valued on the basis of valuations provided by the service, which determines valuations using methods based on market transactions for comparable securities and various relationships between securities, which are generally recognized by institutional traders. These valuations are based on methods, which include the consideration of: yields or prices of securities of comparable quality, coupon, maturity and type; indications as to values from dealers; and general market conditions. If market quotations are not readily available for valuations, assets may be valued by a method the Trustee of the fund has determined accurately reflects fair value. These types of investments are generally categorized within Level 2 of the fair value hierarchy.

The System categorizes its investments as follows:

			1	Unfunded	Redemption Frequency (If currently		Redemption Notice
Investments measured at the net asset value (NAV):		Value		mmitments	eligible)	y	<u>Period</u>
Hamilton Lane Secondary Fund II LP	\$	23,945	\$	417,305	N/A	(a)	N/A
Hamilton Lane Private Equity Offshore Fund VII Series A LP		599,992		195,175	N/A	(a)	N/A
Hamilton Lane Private Equity Offshore Fund VII Series B LP		267,287		174,774	N/A	(a)	N/A
Sustainable Woodlands Fund II LP		322,154		-	N/A	(a)	N/A
EB DV Non-SL Stock Index Fund		64,079,566		-	daily		1 day
Johnson Institutional Core Bond		44,960,446		-	daily		1 day
EB DL Smid Cap Stock Index Fund		21,539,422		-	daily		1 day
EB DV Non-SL International Stock Index Fund		47,173,823		-	daily		1 day
EB DV Non-SL Emerging Markets Stock Index Fund		19,528,311		-	weekly		2 days
USB Realty Investors LLC - Trumbull Prop	_	12,774,450		-	N/A	(a)	N/A
Total	\$_	211,269,396					

⁽a) Units may be sold at any time on the secondaries market, with approval of the General Partner, although not ordinarily done, as this most likely will result in a loss. Partnership agreements are entered into with the intent of holding them to maturity when the partnerships sell all the remaining assets and declare distributions. Therefore, redemptions are not typically eligible until end of partnership terms.

4. Property Taxes Receivable

The City is responsible for assessing and collecting its own property taxes, as well as education property taxes for the State. Property taxes are assessed based on property valuations as of April 1, annually. Taxes are due four times per year on August 12, November 12, March 12, and June 12. Taxes unpaid after each due date are considered to be late and are subject to 1% interest added on the next day; an additional 4% interest is added after the tenth day late and an additional 1% per month thereafter. Taxes which remain unpaid ten days after the June 12 due date are delinquent and are subject to an 8% penalty and interest calculated at 12%. Unpaid taxes become an enforceable lien on the property and such properties are subject to tax sale.

Property taxes receivable at June 30, 2022 consisted of the following:

Property taxes:		
2022	\$	417,218
2021		399,405
2020		214,437
Prior years		989,990
Less: Allowance for doubtful taxes	_	(233,828)
Total	\$_	1,787,222

5. User Fees Receivable

User fees receivable include amounts due from customers for electric service, rent and passenger facility charges at the airport, water, wastewater, and stormwater usage. User fees receivable are reported net of an allowance for doubtful accounts depending on the aging of the receivables. Water, wastewater, and stormwater delinquent receivables are liened in a similar manner as property taxes, described in Note 4.

User fees receivable and the related allowance for doubtful accounts at June 30, 2022 consist of the following:

		Billed	Estimated	A	Allowance for		
		Service Fees	Unbilled Fees	Ι	Doubtful Fees		<u>Total</u>
Electric	\$	4,947,895	\$ 2,121,852	\$	(159,811)	\$	6,909,936
Airport		1,652,834	-		(7,844)		1,644,990
Wastewater		1,067,891	639,337		(3,000)		1,704,228
Nonmajor Enterprise Funds:							
Water		1,037,193	524,317		(3,000)		1,558,510
Stormwater	_	208,432	123,618	_		_	332,050
Total	\$_	8,914,245	\$ 3,409,124	\$	(173,655)	\$_	12,149,714

6. Departmental and Other Receivables

Departmental and other receivables represent the following receivables, net of allowance for doubtful accounts depending on the aging of the receivables:

				Allowance for Doubtful	
		Gross		Accounts	<u>Total</u>
Police tickets	\$	1,900,318	\$	(1,337,351) \$	562,967
Local option sales tax		647,086		-	647,086
Ambulance		1,470,997		(525,995)	945,002
Church Street marketplace		75,136		-	75,136
Code enforcement		400,005		(92,147)	307,858
Equipment maintenance		72,110		-	72,110
Fire		93,100		(17,996)	75,104
Franchise fees		115,221		-	115,221
Gross receipts tax		436,805		-	436,805
Other	_	222,358		(8,462)	213,896
Total	\$	5,433,136	\$_	(1,981,951) \$	3,451,185

7. Intergovernmental Receivables

This balance represents reimbursements requested from Federal and State agencies for expenditures incurred in fiscal year 2022.

	Governmental		Business-Type			
	Activities		Activities			<u>Total</u>
Community and economic development	\$	465,590	\$	-	\$	465,590
Capital project grants		5,338,046		-		5,338,046
Airport improvement program (AIP) grants		-		8,880,925		8,880,925
COVID and other grants				2,412,780		2,412,780
State Revolving Loan program	_	_		2,156,125	_	2,156,125
Total	\$_	5,803,636	\$	13,449,830	\$	19,253,466

8. Loans Receivable

The City, through various state and federal grant programs, has extended loans for the development or rehabilitation of residential and commercial properties within the City and small business loans for new Burlington businesses. The repayment terms of these loans and interest rates all vary and are contingent on numerous factors outside of the control of the City, such as the financial viability of the projects. It is the City's policy to recognize the grant revenues when the loans are repaid.

The following is a summary of the loans receivable related to Community and Economic Development Office (CEDO), Burlington Community Development Corporation (BCDC) and the Burlington International Airport at June 30, 2022:

		Receivable		Less: <u>Discount</u>		Less: Allowance	Total
CEDO:							
HODAG loans	\$	7,415,942	\$	_	\$	(5,932,754) \$	1,483,188
Housing and urban		, ,					, ,
development programs:							
HOME loans		10,772,252		(4,785,807)		(4,177,698)	1,808,747
Lead paint loans		2,787,088		(150,456)		(1,979,096)	657,536
Other CEDO loans		326,150		(75,436)		(90,465)	160,249
BCDC:							
Relief loan from Champlain Housing		87,018		-		-	87,018
Westlake Parking - \$72,000 annual							
payment at 7% interest with \$448,000							
due on July 26, 2026		614,632	_	-	_	<u> </u>	614,632
Governmental funds subtotal	_	22,003,082		(5,011,699)	-	(12,180,013)	4,811,370
Airport:							
Aviation Support Hanger - annual							
payments of \$93,172 with an interest							
rate of 3%, maturing in June 2026	_	350,784	_	-		<u> </u>	350,784
Total loans receivable	\$_	22,353,866	\$	(5,011,699)	\$	(12,180,013) \$	5,162,154

9. Leases Receivable

For the year ended June 30, 2022, the financial statements include the adoption of GASB Statement No. 87, *Leases*. The primary objective of this statement is to enhance the relevance and consistency of information about governments' leasing activities. This statement establishes a single model for lease accounting based on the principle that leases are financings of the right to use an underlying asset. Under this statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources. The Airport leases office, building, and ground space to various Airport related businesses, car rental companies, food and gift concessions, governmental agencies and others. The lease rates vary and are computed based upon square footage, percentages of gross revenues, and combinations of the two. Material leases valued at more than \$1,000,000 are shown in more detail below.

The Airport entered into a 195-month lease as a lessor for the use of Airport - GSA - National Weather Service. An initial lease receivable was recorded in the amount of \$4,147,896. As of June 30, 2022, the value of the lease receivable was \$3,915,611. The lessee is required to make monthly fixed payments of \$23,648. The lease has an interest rate of 1.394%. The value of the deferred inflow of resources as of June 30, 2022 was \$3,893,119, and Airport recognized lease revenue of \$254,776 during the fiscal year. The Airport has 1 extension option for 60 months.

The Airport entered into a 114-month lease as lessor for the use of the Airport - BETA North Hangar. An initial lease receivable was recorded in the amount of \$1,852,847. As of June 30, 2022, the value of the lease receivable was \$1,852,847. The lessee is required to make monthly fixed payments of \$18,313. The lease has an interest rate of 1.170%. The value of the deferred inflow of resources as of June 30, 2022 was \$1,657,811, and the Airport recognized lease revenue of \$195,037 during the fiscal year.

The Airport entered into a 178-month lease as lessor for the use of the Airport Heritage Building 890. An initial lease receivable was recorded in the amount of \$2,723,276. As of June 30, 2022, the value of the lease receivable was \$2,553,565. The lessee is required to make monthly variable fixed in substance principal and interest payments of \$16,886. The lease has an interest rate of 1.362%. The value of the deferred inflow of resources as of June 30, 2022 was \$2,539,684, and the Airport recognized lease revenue of \$183,592 during the fiscal year. The lessee has 2 extension options, each for 60 months.

The Airport entered into a 60-month lease as lessor for the use of the Airport - Budget Rent-A-Car. An initial lease receivable was recorded in the amount of \$2,750,716. As of June 30, 2022, the value of the lease receivable was \$2,205,841. The lessee is required to make monthly fixed payments of \$46,498.42. The lease has an interest rate of 0.577%. The value of the deferred inflow of resources as of June 30, 2022 was \$2,200,572, and the Airport recognized lease revenue of \$550,143 during the fiscal year.

The Airport entered into a 60-month lease as lessor for the use of the Airport - Hertz Dollar. An initial lease receivable was recorded in the amount of \$2,730,920. As of June 30, 2022, the value of the lease receivable was \$2,189,967. The lessee is required to make monthly fixed payments of \$46,164. The lease has an interest rate of 0.577%. The value of the deferred inflow of resources as of June 30, 2022 was \$2,184,736, and the Airport recognized lease revenue of \$546,184 during the fiscal year.

The Airport entered into a 60-month lease as lessor for the use of the Airport - ELRAC Concession agreement. An initial lease receivable was recorded in the amount of \$2,791,297. As of June 30, 2022, the value of the lease receivable was \$2,238,384. The lessee is required to make monthly fixed payments of \$47,184. The lease has an interest rate of 0.577%. The value of the deferred inflow of resources as of June 30, 2022 was \$2,233,038, and the Airport recognized lease revenue of \$558,259 during the fiscal year.

The Airport entered into an 87-month lease as lessor for the use of the Airport - Hudson News. An initial lease receivable was recorded in the amount of \$1,735,179. As of June 30, 2022, the value of the lease receivable was \$1,514,856. The lessee is required to make monthly fixed payments of \$18,131. Additionally, there are monthly other reasonably certain payments of \$1,263. The lease has an interest rate of 0.833%. The value of the deferred inflow of resources as of June 30, 2022 was \$1,495,844, and the Airport recognized lease revenue of \$239,335 during the fiscal year.

Regarding the non-material leases: There are eighteen leases falling into this category. These leases range in length from 24 months to 154 months. As of June 30, 2022, the value of the individual lease receivables ranged from \$41,972 to \$640,745. The range of monthly fixed payments for this group of leases is \$637 to \$15,272. The range value of the deferred inflow of resources as of June 30, 2022 was \$13,082 to \$570,204, and Airport recognized lease revenues ranging from \$7,780 to \$182,286 for each lease during the fiscal year.

Regulated Leases

The Airport leases office, building and ground space to various airlines. These leases are excluded from lease receivables and related deferred inflows per GASB Statement No. 87, as these are regulated leases. Lease revenue for the year ending June 30, 2022 was \$1,309,189. One year remains in the contracts (fiscal year 2023) and minimum expected receipts for fiscal year 2023 are \$1,237,005.

10. Interfund Accounts

Interfund receivable and payable accounts as of June 30, 2022 were as follows:

	Due from		Due to
<u>Fund</u>	Other Funds	<u>(</u>	Other Funds
General Fund	\$ 3,823,883	\$	-
Nonmajor governmental funds:			
Parking facilities	-		2,239,706
Church street marketplace	-		46,881
Community development corporation		_	1,537,296
Total	\$ 3,823,883	\$	3,823,883

The composition of advances to/from other funds (amounts considered to be long-term) as of June 30, 2022 is as follows:

	A	Advances to	Adv	vances from		
<u>Fund</u>	<u>C</u>	Other Funds	Other Funds			
General Fund	\$	703,308	\$	-		
Capital Projects Fund (major fund)	_	_	_	703,308		
Total	\$	703,308	\$	703,308		

The City reports interfund transfers between many of its funds. The sum of all transfers presented in the table agrees with the sum of interfund transfers presented in the governmental and proprietary fund financial statements. The following is a summary of interfund transfers made in fiscal year 2022:

Governmental Funds:		Transfers In	<u>T</u>	Transfers Out			
Major funds:							
General Fund	\$	5,436,615	\$	4,434,585			
Capital Projects fund		4,691,147		-			
Nonmajor governmental funds:							
Special revenue funds:							
Traffic		-		-			
Parking facilities		-		64,400			
Community and economic development		754,709		2,045,522			
TIF waterfront		-		51,079			
TIF downtown		-		91,807			
Church street marketplace		21,000		-			
Impact fees		-		421,815			
Permanent funds:							
Cemetery	·	-		23,811			
Subtotal Nonmajor Governmental funds		775,709		2,698,434			
Business-type Funds:							
Major fund:							
Electric		-		2,274,239			
Wastewater		-		1,163,570			
Nonmajor funds:							
Water		-		358,759			
Stormwater	į	50,702		24,586			
Subtotal Business-type Funds:		50,702		3,821,154			
Grand Total	\$	10,954,173	\$	10,954,173			

Significant transfers include Electric, Wastewater, Water and Stormwater primarily for payments in lieu of taxes to the General Fund. The General Fund transfer out to the Capital Projects Fund was primarily for the use of assigned fund balance for capital projects.

11. Capital Assets

Capital asset activity for the City's governmental and business-type activities for the year ended June 30, 2022 was as follows:

Coparial assets, not being depreciated			Beginning Balance		Increases		Decreases		Ending Balance
Tand

12. Regulatory Assets and Regulatory Deferred Inflows of Resources

For the Electric Department, regulatory assets and regulatory deferred inflows of resources at June 30, 2022 comprise the following:

Deferred depreciation expense to be		
recovered in future years	\$	1,265,260
COVID-19 capitalized personnel costs		227,139
IBEW pension back-payment		304,643
Triennial consulting engineer report	_	36,668
Total regulatory assets	\$_	1,833,710
Deferred depreciation expense - McNeil Plant	\$	2,874,376
Deferred depreciation expense - operating	_	2,785,939
Total regulatory deferred inflows of resources	\$	5,660,315

Provisions for depreciation of capital assets are reported using the straight-line method at rates based upon the estimated service lives and salvage values of the several classes of property. However, a portion of the current depreciation expense is only recoverable through future rates. The difference is included in deferred charges (calculated as the straight-line depreciation expense less the depreciation expense on a sinking fund basis) and will be recovered in future years. The Department recorded straight-line depreciation of \$4,798,210 for the year ended June 30, 2022. In 2022, \$930,427 of deferred depreciation expense was realized. Unamortized deferred depreciation balance of \$1,265,260 remained at June 30, 2022. The deferred inflows represent accumulated deferred depreciation balances that became negative due to the fact that the financed assets were close to being fully depreciated when compared to the future debt sinking fund requirements.

13. Deferred Outflows of Resources

Deferred outflows of resources represent the consumption of net assets by the City that is applicable to future reporting periods. Deferred outflows of resources have a positive effect on net position, similar to assets. Deferred outflows of resources related to pensions and OPEB will be recognized as expense in future years are described in the corresponding pension and OPEB notes. Deferred outflows of resources also represent unamortized balances of deferred amounts on refunded debt.

14. Short-Term Debt

A. Grant Anticipation Note (GAN)

In November 2021, the Airport renewed the GAN 3.065%. The drawdowns during fiscal year 2022 were \$3,829,737, and repayments were \$1,288,680 with

outstanding balance of \$2,541,057 at June 30, 2022. The unused limit at June 30, 2022 was \$7,458,943.

B. Revenue Anticipation Note

On June 30, 2022, the City renewed on behalf of the Electric Department, a \$5,000,000 General Obligation Revenue Anticipation Note (line of credit) with a local bank, placing the line of credit directly with the Electric Department. This line of credit matures on June 30, 2024. The Electric Department had the entire line of credit balance of \$5,000,000 available for use during fiscal year 2022 and there was no activity during the year.

C. State Revolving Loan Interim Notes

The Wastewater, Water and Stormwater Funds had interim loans from the State of Vermont EPA Clean Water State Revolving Fund with a beginning balance of \$6,522,666 at July 1, 2021, additional drawdowns of \$1,923,418 during fiscal year 2022, and permanent refinancing of \$3,012,529. Available balance for use was \$4,379,334 at June 30, 2022.

15. Long-Term Obligations – Primary Government

A. Types of Long-Term Obligations

General Obligation (GO) Bonds. The City issues general obligation bonds to provide resources for the acquisition and construction of major capital facilities and to refund prior bond issues. General obligation bonds have been issued for both governmental and proprietary activities. Bonds are reported in governmental activities if the debt is expected to be repaid from governmental fund revenues and in business-type activities if the debt is expected to be repaid from proprietary fund revenues.

No-Interest Revolving Loans. – The State of Vermont offers a number of no-interest revolving loan programs to utilize for predetermined purposes. Two of the five no-interest loans do charge a 2% administration fee. The City has borrowed money from the Vermont Special Environmental Revolving Fund for sewer and stormwater projects. These bonds are both general obligation and revenue supported bonds.

<u>Revenue Bonds</u> – The City issues bonds where the City pledges income to pay the debt service. Revenue bonds are reported in business type activities only because the debt is expected to be repaid from proprietary fund revenues.

<u>Unamortized Premiums and Discounts</u> – Debt premiums and discounts incurred in connection with the sale of bonds are amortized over the terms of the related debt. Unamortized balances are included as a component of long-term debt.

<u>Certificates of Participation (COPS)</u> – The City enters into agreements for the purpose of financing the acquisition and/or renovation of land and buildings. These agreements qualify as long-term debt obligations for accounting purposes (even though they

include clauses that allow for cancellation of the certificate of participation in the event the City does not appropriate funds in future years). The Certificates of Participation are reported in governmental activities because all of the debt is expected to be repaid from general governmental revenues.

Other Notes Payable – The City has other notes payable to finance various capital projects through local banks and U.S. government agencies.

<u>Equipment Financing Notes Payable</u> – The City enters into agreements for the purpose of financing the acquisition of major pieces of equipment. Notes are reported in governmental activities if the debt is expected to be repaid from general fund revenues and in business-type activities if the debt is expected to be repaid from proprietary fund revenues.

<u>Leases Payable</u> – The rent of snow equipment by the Airport qualified as GASB 87 lease liability and will be repaid by Airport proprietary fund revenues.

<u>Compensated Absences</u> – It is the policy of the City to permit certain employees to accumulate earned but unused benefits. The City allows employees to carryover up to 360 hours of vested vacation time to the next fiscal year. The City also allows all employees hired prior to July 1, 2000 to carry over the lesser of 25% of their sick leave balance or 120 hours. City employees hired after July 1, 2000 may carryover earned sick leave balances; however, it is not a vested benefit upon termination. Compensated absences are paid by the applicable fund where the employee is charged, specifically the General Fund, special revenue funds and enterprise funds.

<u>Insurance Reserves</u> – This liability represents an estimate of claims incurred but not reported and includes only an estimate for known loss events expected to later be presented as claims. The City is unable to estimate the amount of unknown loss events expected to become claims and expected future developments on claims already reported. Insurance reserves are generally liquidated by the General Fund.

<u>Pension and Other Post-employment Benefits</u> – The City has recorded a liability for governmental and business-type activities in the Statement of Net Position and in the individual enterprise funds which represent their actuarially determined liabilities for pension and other post-employment benefits. These costs relate to retirement and subsidized health care and life insurance for retirees during the period from retirement to the date of eligibility for social security benefits. Our proprietary fund pension and OPEB liabilities are liquidated by the Electric, Airport, and other enterprise funds. Remaining pension and OPEB liabilities are paid by the General Fund.

A detailed listing of the general obligation bonds and other debt payable is as follows:

				Amount
	Serial			Outstanding

D. Advanced Refunding

On March 16, 2021, the Airport issued taxable airport revenue refunding bonds 2021 Series A (the "refunding bonds") in the amount of \$5,175,000 with variable interest rates ranging from 1.2% to 3.0% and released debt service reserves of \$2,157,700 to partially advance refund \$5,085,000 of the 2012 and 2014 Series A Revenue Bond payments with interest rates of 4-5% maturing on July 1, 2021, January 1, 2022 and July 1, 2022. After issuance costs and discount of \$329,908, and funding of the new debt service reserve of \$258,962, the net proceeds were \$6,743,830. The net proceeds from the issuance of the refunding bonds were used to purchase U.S. government securities and those securities were deposited in an irrevocable trust with an escrow agent to provide debt service payments until the refunded bonds mature. The advance refunding met the requirements of an insubstance debt defeasance and the refunded bonds were removed from the Airport's financial statements.

As a result of the advance refunding, the Airport reduced its total debt service cash flow requirements by \$1,589,226, which resulted in an economic gain (difference between the present value of the debt service payments on the old and new debt) of \$481,634. Defeased debt at June 30, 2021 was \$5,085,000.

E. Equipment Notes Payable

The City acquired certain equipment under direct purchase financing agreements repaid with General Fund, Airport Fund, Wastewater and the Water Funds. The notes are collateralized by the following equipment and include the following repayment terms.

		Governmental Activities	Business-Type Activities		
Airport equipment - payments are to be made in equal annual installments of \$74,487 including interest at 2.77% annually, maturing on August 10, 2025.	\$	-	\$	279,246	
General fund, traffic, and airport equipment - payments are to be made in equal semiannual installments of \$201,469 including interest at 2.37% annually, maturing on September 2, 2024.		345,466		408,432	
Airport equipment - payments are to be made in equal semiannual installments of \$172,507 including interest at 2.99% annually, maturing on September 18, 2027.		-		1,737,842	
Airport and parks vehicles, DPW equipment - payments are to be made in equal semiannual installments of \$172,696 including interest at 2.465% annually, maturing on September 30, 2023.		375,519		130,055	
Wastewater truck - payments are to be made in equal monthly installments of \$1,812 including interest at 3.76% annually, maturing on February 20, 2025.		-		55,089	
General fund vehicles -rental payments are to be made in equal monthly installments of \$102,833, including interest at 3.45%, maturing on May 15, 2023.		99,353		-	
Water truck - payments are to be made in equal annual installments of \$16,338 including interest at 4.15% annually, maturing on March 15, 2026.		-		59,095	
Water equipment and vehicles - payments are to be made in equal semiannual installments of \$159,498, including interest at 1.64% annually, maturing on June 19, 2027.		765,840		363,840	
General fund vehicles - payments are to be made in semiannual installments that range from \$320,181 to \$153,457, including interest at 1.10% annually, maturing on November 1, 2030.		1,999,588		-	
General fund equipment - payments are to be made in semiannual installments of \$95,379, including interest at 0.93% annually, maturing on May 1, 2026.		747,280		-	
General fund, wastewater and water equipment - payments are to be made in semiannual installments of \$159,368, including interest at 0.93% annually, maturing on May 1, 2028.	_	1,630,793	_	222,383	
Total Equipment Financing Notes Payable	\$_	5,963,839	\$_	3,255,982	

Future minimum payments under the equipment financing notes, which exclude the Electric Department, consisted of the following as of June 30, 2022:

Fiscal		C	iovei	nmental Acti	vitie	S	Business-Type Activities				es
Year		Principal		Interest		<u>Total</u>		Principal		Interest	<u>Total</u>
2023	\$	1,501,279	\$	91,976	\$	1,593,255	\$	784,276	\$	73,831 \$	858,107

Total	\$ 43,034,53	35 \$ 13,636,208	\$ 56,670,743

17. Deferred Inflows of Resources

Deferred inflows of resources are the acquisition of net assets by the City that is applicable to future reporting periods. Deferred inflows of resources have a negative effect on net position, similar to liabilities. Deferred inflows of resources related to pension and OPEB will be recognized as expense in future years and are described in the corresponding pension and OPEB notes.

Governmental funds report *unavailable revenue* in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period.

The Electric Department's regulatory deferred inflows of resources are disclosed in Note 12.

Deferred inflows in relation to the Airport Department's leases receivable are disclosed in Note 9.

18. Governmental Funds – Fund Balances

Following is a summary of the City's fund balances at June 30, 2022:

19. Retirement System (GASB 68)

The City follows the provisions of *GASB Statement No. 68, Accounting and Financial Reporting for Pensions* with respect to the Burlington Employees' Retirement System (the System).

A. Plan Description

The System is a cost sharing, single employer, defined benefit pension plan covering substantially all of its employees except elective officials, other than the Mayor, and the majority of the public-school teachers, who are eligible for the Vermont State Teacher's Retirement System. The plan is broken down into Class A participants and Class B participants. Class A participants are composed of firemen and policemen. Class B participants include all other covered City employees. The System does not issue a stand-alone financial report.

The System is governed by an eight-member board. The eight members include three appointed by the City Council, two Class A members of the system selected by the Class A membership, two Class B members of the system elected by the Class B membership, and the City Treasurer as an ex officio member. Of the Class A and Class B board members, no two shall be employed at the same department.

The City Council has the authority to amend the benefit terms of the System by enacting ordinances and sending them to the Mayor for approval.

As of June 30, 2022, there are 882 active members and 814 retirees or beneficiaries currently receiving benefits. Additionally, there are 656 former employees with vested rights.

B. Benefits Provided

Class A participants vest 20% after three years of creditable service, and 20 percent for each year thereafter until they are 100% vested after 7 years of creditable service. The normal benefit is payable commencing at age 55 or with 25 years of service. Class A participants who retire at or after age 55 with 7 years of creditable service are entitled to a retirement benefit, payable monthly for life, equal to 2.75% of their average final compensation (AFC) during the highest three non-overlapping twelve-month periods (five years for certain non-union police employees) times creditable service not in excess of 25 years plus .5% of the AFC times years of creditable service between 25 and 35 years, prior to age 60 and a yearly COLA based on CPI. Class A retirees could alternatively elect to choose an accrual rate of 3.25% and one-half the yearly COLA, or an accrual rate of 3.8% (3.6% for service from July 2006 forward) and no COLA. The half and no COLA options have been eliminated for new policemen hired after July 1, 2006 and new firemen hired after January 1, 2007. Also, these new hires have a 2.65% accrual rate only. Employees may retire prior to age 55 and receive reduced retirement benefits. Class A employees have unreduced benefits after 25 years of service, regardless of age.

All eligible City Class B employees vest 20% after three years of creditable service, and 20% for each year thereafter until they are 100% vested after 7 years of creditable service. Class B participants who retire at or after age 65 are entitled to a retirement benefit, payable monthly for life, equal to 1.60% of AFC (at age 65) during the highest three non-overlapping twelve-month periods times creditable service at age 65 not in excess of 25 years plus 0.5% of AFC times creditable

service at age 65 in excess of 25 years and a yearly COLA based on the CPI. Class B retirees could alternatively elect to choose an accrual rate of 1.9% for service up to June 30, 2006 and 1.8% thereafter and one half the yearly COLA, or an accrual rate of 2.2% for service up to June 30, 2006 and 2.0% thereafter and no COLA. The half and no COLA options have been eliminated for new hires after January 1, 2006 and they are only entitled to a 1.4% accrual rate. Employees may retire prior to age 65 and receive reduced retirement benefits. Creditable service or an actuarial increase is used after age 65. For Class B IBEW participants hired after October 30, 2012, the number of years used in the calculation of AFC was changed from three years to five. Also, the disability retirement was revised from 75% of pay to 66^{2} /₃% of pay.

The System also provides accidental and line of duty death benefits for Class A participants, and disability and survivor income benefits for both Class A and Class B participants. The benefits are changed by negotiation and by the Retirement Board with budgetary approval by the City Council.

C. Contributions

Participants contribute a set percentage of their gross regular compensation annually. Class A participants contribute 12.28% of earnable compensation for the first 35 years of creditable service, and none thereafter. Class B participants, who elected to continue to be eligible for early retirement benefits at 2% per year deduction between ages 55 and 65 contribute 6.2%. All Class B participants not covered by a collective bargaining agreement contribute 5.34% and all Class A employees not covered by a collective bargaining agreement contribute 14.42%.

The Board establishes employer contributions based on an actuarially determined contribution recommended by an independent actuary. The actuarially determined contribution is the estimated amount necessary to finance the costs of benefits earned by the System members during the year, with an additional amount to finance a portion of any unfunded accrued liability. The calculation of the actuarially determined contribution is governed by the applicable provisions of the Retirement Code.

D. Net Pension Liability

The components of the net pension liability as of June 30, 2022, measured as of June 30, 2021, are shown below:

Total pension liability	\$	310,778,910
System fiduciary net position	_	(248,934,922)
Net pension liability	\$_	61,843,988
Plan fiduciary net position as a		
percentage of the net pension liability		80.10%

Target Allocations – The long-term expected rate of return on pension plan investments was selected from a best estimate range determined using the building block approach. Under this method, an expected future real return range (expected returns, net of pension plan investment expense and inflation) is calculated separately for each asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return net of investment expenses by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major class are summarized in the following table:

		Long-term
		Expected
	Target Asset	Real rate
Asset Class	Allocation	of Return
Core Fixed Income	17.50%	3.70%
US Bonds - Dynamic	7.50%	3.70%
U.S. Large Cap Equity	31.00%	7.10%
U.S. Small Cap Equity	9.00%	7.40%
International Developed Equity	20.50%	9.90%
International Emerging Markets Equity	7.00%	11.20%
Private Equity	0.50%	10.20%
Real Estate	6.00%	7.40%
Timberland	1.00%	7.40%

<u>Discount Rate</u> – The discount rate used to measure the total pension liability was 7.20%. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments to current System members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate – The following presents the System's net pension liability calculated using the discount rate of 7.20%, as well as what the System's net pension liability would be if it was calculated using a discount rate that is one percentage-point lower (6.20%) or one percentage-point higher (8.20%) than the current rate:

				Current		
		1% Discount				1%
		<u>Decrease</u>		Rate		<u>Increase</u>
Primary government	\$	88,157,331	\$	55,834,380	\$	28,835,071
Discretely presented component unit	_	9,311,807	_	6,009,608		3,222,896
Net Pension Liability	\$_	97,469,138	\$	61,843,988	\$	32,057,967

E. Deferred Outflows and (Inflows) of Resources

For the year ended June 30, 2022, the City recognized pension expense of \$8,128,990. In addition, the City reported deferred outflows of resources and deferred (inflows) of resources related to pension from the following sources:

		Deferred	Deferred
		Outflows of	(Inflows) of
		Resources	Resources
Primary Government:	_		
Fiscal year 2022 deferred pension contributions	\$	9,717,126	\$ -
Changes in proportional share of contributions		1,397,500	(1,361,687)
Difference between expected and actual pension experience		1,732,751	-
Changes in assumptions		3,337,000	-
Difference between projected and actual investment earnings	_	-	(26,822,778)
Total Primary Government		16,184,377	(28,184,465)
Discretely Presented Component Unit:			
Changes in proportional share of contributions		99,153	(134,966)
Difference between expected and actual pension experience		186,501	-
Changes in assumptions		359,170	-
Difference between projected and actual investment earnings	_	-	(2,887,009)
Total Discretely Presented Component Unit	_	644,824	(3,021,975)
Total	\$	16,829,201	\$ (31,206,440)

Deferred outflows of resources related to pension resulting from contributions subsequent to the measurement date will be recognized in pension expense in the year ended June 30, 2023. Other amounts reported as deferred outflows of resources and deferred (inflows) of resources related to pension will be recognized in pension expense as follows:

		Deferred		
		Outflows/		
		(Inflows) of		
	_	Resources		
Year ended June 30:				
2023	\$	(2,541,224)		
2024		(4,394,043)		
2025		(6,511,567)		
2026	_	(8,270,380)		
Total Primary Government		(21,717,214)		
Year ended June 30:				
2023		(270,772)		
2024		(515,356)		
2025		(700,858)		
2026	_	(890,165)		
Total Discretely Presented				
Component Unit	_	(2,377,151)		
Total	\$_	(24,094,365)		

F. Rate of Return

For the year ended June 30, 2022, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expenses, was -13.2%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

20. Retirement System (GASB 67)

The System follows the provision of GASB Statement No. 67, *Financial Reporting for Pension Plans*.

A. Actuarial Assumptions

The total actuarially determined contribution to the system for 2022 was \$10,821,716. A summary of the actuarial assumptions as of the latest actuarial valuation is shown below:

Valuation Date June 30, 2021

Actuarial cost method Entry Age Normal Actuarial

Cost Method (level percentage of salary)

Actuarial assumptions:

Investment rate of return 7.20% (Prior: 7.30%)

Inflation rate 2.60%

Post-employment cost-of-living

adjustment 3.00%

Assumed annual rates of salary increases 3.50% - 10.00%

Ongoing actuarial valuation of the System involves estimates of the reported amounts and assumptions about probability of occurrence of events far into the future. Examples include assumptions about future employment mortality and future salary increases. Amounts determined regarding the net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The actuarial assumptions used in the June 30, 2021 valuation were based on the results of the most recent actuarial experience study covering the period July 1, 2012 to June 30, 2017.

Mortality rates were based on the RP-2014 Mortality Tables. This mortality assumption was selected based on the most recently published mortality study released by the Society of Actuaries.

<u>Discount Rate</u> – The discount rate used to measure the total pension liability was 7.2%. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments to current System members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

<u>Net Pension Liability</u> – The components of the net pension liability, measured as of June 30, 2022, were as follows:

Total pension liability	\$	319,075,820
Plan fiduciary net position	_	(209,424,801)
Net pension liability	\$	109,651,019
Plan fiduciary net position as a		
percentage of the net pension liability		65.63%

21. Vermont State Teachers' Retirement System

A. Plan Description

All of the teachers employed by the Burlington School District (BSD), a component unit of the City, participate in the Vermont State Teachers' Retirement System (VSTRS), a cost-sharing multiple-employer defined benefit pension plan with a special funding situation, covering nearly all public day school and nonsectarian private Union teachers and administrators as well as teachers in schools and teacher training institutions within and supported by the State of Vermont that are controlled by the State Board of Education. Membership in the VSTRS for those covered classes is a condition of employment. During the year ended June 30, 2020 (the most recent period available), the retirement system consisted of 23,436 participating members.

The plan was established effective July 1, 1947, and is governed by *Title 16, V.S.A. Chapter 55*. Subsequent Vermont state legislation, *Act 74*, which became effective on July 1, 2010, contained numerous changes to the plan benefits available to current and future members, as well as a change in access to health care coverage after retirement, resulting from a multi-party agreement to provide sustainability of quality pension and retiree health benefits for Vermont teachers.

The general administration and responsibility for formulating administrative policy and procedures of the VSTRS for its members and their beneficiaries is vested in the Board of Trustees consisting of six members. They are the Secretary of Education (ex-officio), the State Treasurer (ex-officio), the Commissioner of Financial Regulation (ex-officio), two members and one alternate elected by active members of the System under rules adopted by the Board and one retired member and one alternate elected by the Board of Directors of Association of Retired Teachers of Vermont. The Chair is elected by the Board and acts as executive officer of the Board.

All assets are held in a single trust and are available to pay retirement benefits to all members. Benefits available to each group are based on average final compensation (AFC) and years of creditable service. The Vermont State Agency of Administration issues a publicly available Annual Comprehensive Financial Report (ACFR) that includes financial statements and required supplementary information for the

VSTRS. That report may be viewed on the State's Department of Finance & Management website at: http://finance.vermont.gov/reports and publications/ACFR.

B. Benefits Provided

The VSTRS provides retirement, and disability benefits, annual cost-of-living adjustments, health care and death benefits to plan members and beneficiaries. There are two levels of contributions and benefits in the System: Group A - for public school teachers employed within the State of Vermont prior to July 1, 1981 and elected to remain in Group A; and Group C - for public school teachers employed within the State of Vermont on or after July 1, 1990. Group C also includes those teachers hired prior to July 1, 1990 and were in Group B on July 1, 1990. When *Act 74* became effective on June 30, 2010, Group C was further bifurcated into Groups 1 and 2. Group 1 contains members who were at least 57 years of age or had at least 25 years of service, and Group 2 contains members who were less than 57 years of age and had less than 25 years of service.

Benefits available to each group are based on average final compensation (AFC) and years of creditable service, and the full chart is disclosed in the stand-alone BSD financial statements.

C. Contributions

VSTRS is a cost-sharing, public employee retirement system with one exception: all risks and costs are not shared by the School District, but are the liability of the State of Vermont. VSTRS is funded through State and employee contributions and trust fund investment earnings; and the School District has no legal obligation for paying benefits. Required contributions to the System are made by the State of Vermont based on a valuation report prepared by the System's actuary, which varies by plan group. The Vermont State Teachers Retirement System estimates the contributions on behalf of the School District's employees included in the teacher's retirement plan, which approximates \$6,807,198 or 19% of total payroll for employees covered under the plan.

Employee contribution rates by plan group follow:

<u>VSTRS</u>	Group A	Group C - Group 1	Group C - Group 2
Employee Contributions	5.5% of gross salary;	5.0% of gross salary	5.0% of gross salary with 5 or more years of service as of 7/1/14
	contributions stop after 25 years of creditable service		6.0% of gross salary if less than 5 years of service as of 7/1/14

Employee contributions totaled \$1,955,100 during the year and were paid by the School District to the State of Vermont. The School District has no other liability under the plan. The School District's total payroll for all employees covered under this plan was \$35,307,041 for the year ended June 30, 2022. Beginning in 2016, school districts that pay for teachers with federal dollars are required to include costs of pensions in

the federal grant, lowering the liability for the State. Federally funded pension costs reimbursed to the State by the Supervisory Union for the fiscal year ending June 30, 2022 were \$365,853. The Supervisory Union's total payroll for all federally funded employees covered under this plan was \$1,897,581 for the year ended June 30, 2022.

D. Pension Liabilities

The State is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of member employers. Therefore, these employers are considered to be in a special funding situation as defined in GASB No. 68 and the State is treated as a nonemployer to VSTRS. Since the School District does not contribute directly to VSTRS, no net pension liability was recorded at June 30, 2020. The State's portion of the collective net pension liability that was associated with the School District was \$79,841,269 as of June 30, 2022.

The State of Vermont's proportionate share of the net pension liability associated with the School District is equal to the collective net pension liability, actuarially measured as of June 30, 2021, multiplied by the School District's proportionate share percentage. The School District's proportionate share percentage was based on its reported salaries to the total reported salaries for all participating employers. At June 30, 2021, the School District's proportion was 4.709% which was an increase of 0.101% from its proportion measured as of June 30, 2020.

E. Pension Expense

For the year ended June 30, 2022, the School District recognized total pension expense and revenue of \$10,218,483 for support provided by the State of Vermont for the VSTRS plan.

F. Significant Actuarial Assumptions and Methods

The total pension liability for the June 30, 2021 measurement date was determined by an actuarial valuation as of June 30, 2019 rolled forward to June 30, 2020 using the actuarial assumptions outlined below.

<u>Investment Rate of Return</u> – 7.00% net of pension plan investment expenses, including inflation.

Inflation -2.30%.

<u>Salary Increases</u> – ranging from 3.30% to 10.50%.

<u>Deaths After Retirement</u> – PubT-2010 Teacher Employee Amount-Weighted Table with generational projection using scale MP-2019 for pre-retirement, PubT-2010 Teacher Healthy Retiree Amount-Weighted Table with generational projection using scale MP-2019 for healthy retirees, and the PubNS-2010 Non-Safety Disabled Retiree Amount-Weighted Table with generational projection using scale MP-2019 for disabled retirees.

<u>Inactive Members</u> - Valuation liability for the VSTRS plan equals 100% of accumulated contributions.

<u>Unknown Data for Participants</u> - For the VSTRS plan, it is the same as those exhibited by participants with similar known characteristics. If not specified, participants are assumed to be male.

<u>Percent Married</u> - 85% of male members and 35% of female members are assumed to be married.

Cost-of-Living Adjustments – Adjustments for the VSTRS plan are assumed to occur on January 1 following one year of retirement. For the VSTRS plan this occurs at the rate of 2.40% per annum for Group A members and 1.35% per annum for Group C members (beginning at age 62 for Group C members who elect reduced early retirement). The January 1, 2022 COLA is assumed to be 4.60% for Group A and 2.30% for Group C.

<u>Actuarial Cost Method</u> – Uses the Entry Age Actuarial Cost Method. Entry age is the age at date of employment, or, if date is unknown, current age minus years of service. Normal Cost and Accrued Actuarial Liability are calculated on an individual basis and are allocated by salary, with Normal Cost determined using the plan of benefits applicable to each participant.

For the VSTRS plan, the asset valuation method used equals the preliminary asset value plus 20% of the difference between the market and preliminary asset values. The preliminary asset value is equal to the previous year's asset value (for valuation purposes) adjusted for contributions less benefit payments and expenses and expected investment income. If necessary, a further adjustment is made to ensure that the valuation assets are within 20% of the market value.

The *long-term expected rate of return* on the VSTRS plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) developed for each major asset class. These best estimate ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Best estimates of arithmetic rates of return for each major asset class included in the target asset allocation as of June 30, 2021 are summarized in the following table:

		Long-term
		Expected
	Target Asset	Real rate
Asset Class	Allocation	of Return
Global Equity	24.00%	5.05%
US Equity - Large Cap	4.00%	4.00%
US Equity - Small/Mid Cap	3.00%	4.50%
Non-US Equity - Large Cap	7.00%	5.50%
Non-US Equity - Small Cap	0.00%	0.00%
Emerging Markets Debt	4.00%	3.00%
Core Bonds	19.00%	0.00%
Private & Alternative Credit	10.00%	4.75%
US TIPS	3.00%	-0.50%
Core Real Estate	4.00%	3.75%
Non-Core Real Estate	4.00%	5.75%
Private Equity	10.00%	6.75%
Infrastructure/Farmland	3.00%	4.25%

G. Discount Rate

The discount rate used to measure the total pension liability was 7.00% for the VSTRS plan. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy which exceeds the actuarially determined contribution rate. Based on these assumptions, the fiduciary net position was projected to be available to make all projected future benefit payments to current VSTRS members. The assumed discount rate has been determined in accordance with the method prescribed by GASB 68.

22. Other Post-Employment Benefits (OPEB)

GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, replaces the requirements of GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions. This statement establishes standards for recognizing and measuring liabilities, deferred outflows of resources, deferred inflows of resources, and expense/expenditures. This statement identifies the methods and assumptions that are required to be used to project benefit payments, discounted projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service. The City's post-employment benefit plan is a single-employer plan.

A. City OPEB Plan

All the following OPEB disclosures are based on a measurement date of June 30, 2022.

General Information about the OPEB Plan

Plan Description

The City provides post-employment healthcare benefits for retired employees through the City's plan. The OPEB plan is not administered through a trust that meets the criteria in paragraph 4 of GASB 75.

The City indirectly provides post-employment healthcare for retired employees through an implicit rate covered by current employees. Retirees of the City who participate in this single-employer plan pay 100% of the healthcare premiums to participate in the City's healthcare program. Since they are included in the same pool as active employees, the insurance rates are implicitly higher for current employees due to the age consideration. This increased rate is an implicit subsidy the City pays for the retirees.

In addition, the City allows certain retired employees to purchase health insurance through the City at the City's group rate. GASB 75 recognizes this as an implied subsidy and requires accrual of this liability.

Benefits Provided

The City provides medical, prescription drug, mental health/substance abuse, and life insurance to retirees and their covered dependents. All active employees who retire from the City and meet the eligibility criteria may receive these benefits.

Contributions

The employees contribute 5.83% of their compensation for fiscal year 2022.

Plan Membership

At July 1, 2022 (the last full valuation date), the following employees were covered by the benefit terms:

Inactive plan members or beneficiaries	
currently receiving benefit payments	433
Active plan members	623
Total	1,056

Actuarial Assumptions and Other Inputs

The total OPEB liability was determined by an actuarial valuation as of July 1, 2022, using the following actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified:

Inflation 2.60% Rate of annual aggregate payroll growth 2.60%

Discount rate 3.54% (prior 2.16%)

Healthcare cost trend rates 6.50% in 2021, reducing by 0.2% each year to

an ultimate rate of 4.60% per year rate for

2031 and later

Since the OPEB plan is not funded, the selection of the discount rate is consistent with the GASB 75 standard linking the discount rate to the 20- year AA municipal bond index for unfunded OPEB plans. The discount rate was based on the published Bond Buyer GO 20-Bond Municipal Index effective as of June 30, 2022.

Mortality rates were as follows:

- Class A: RP-2014 Adjusted to 2006 Total Dataset Mortality Table, projected to the valuation date with Scale MP-2021.
- Class B: RP-2014 Adjusted to 2006 Total Dataset Mortality Table, projected to the valuation date with Scale MP-2021, set forward two years.
- Disabled: RP-2014 Adjusted to 2006 Disabled Mortality Table, projected to the valuation date with Scale MP-2021.

The actuarial assumptions used in the valuation were based on the results of the experience study that was performed for the five-year period ending June 30, 2017.

Discount Rate

The discount rate used to measure the total OPEB liability was 3.54%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate.

Total OPEB Liability

The City's total OPEB liability was measured as of June 30, 2022 and was determined by an actuarial valuation as of July 1, 2022.

Changes in the Total OPEB Liability

The following summarizes the changes in the total OPEB liability for the past year.

	Total OPEB <u>Liability</u>
Balance as of June 30, 2021	\$ 6,938,319
Changes for the year:	
Service cost	446,755
Interest	160,062
Differences between expected	
and actual experience	(1,243,743)
Changes in assumptions	
or other inputs	(912,019)
Benefit payments	50,602
Net Changes	(1,498,343)
Balance as of June 30, 2022	\$ 5,439,976

Sensitivity of the Total OPEB Liability to Changes in the Discount Rate

The following presents the total OPEB liability calculated using the discount rate of 3.54%, as well as what the total OPEB liability would be if it was calculated using a discount rate that is one percentage-point lower (2.54%) or one percentage-point higher (4.54%) than the current rate:

Current					
1%	1% Discount				
<u>Decrease</u>	Rate	<u>Increase</u>			
\$ 6,172,410	\$ 5,439,976	\$ 4,827,298			

Sensitivity of the Total OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents the total OPEB liability, as well as what the total OPEB liability would be if it were calculated using healthcare cost trend rates that are one percentage-point lower or one percentage-point higher than the current healthcare cost trend rates:

1%	Cost Trend	1%
<u>Decrease</u>	Rates	<u>Increase</u>
\$ 4 952 962	\$ 5 439 976	\$ 6.029.852

<u>OPEB Expense and Deferred Outflows of Resources and Deferred (Inflows) of</u> Resources Related to OPEB

For the year ended June 30, 2022, the City recognized an OPEB expense of \$365,065. At June 30, 2022, the City reported deferred outflows and (inflows) of resources related to OPEB from the following sources:

	Deferr	ed Deferred
	Outflow	s of (Inflows) of
	Resource	<u>Resources</u>
Difference between expected and actual		
experience	\$ 44,8	91 \$ (1,606,441)
Change in assumptions	939,8	11 (804,724)
Changes in proportional share of		
contributions	378,2	06 (378,206)
Total	\$ 1,362,9	08 \$ (2,789,371)

Amounts reported as deferred inflows and outflows of resources related to OPEB will be recognized in OPEB expense as follows:

Year Ended June 30:		
2023	\$	(241,752)
2024		(241,761)
2025		(241,554)
2026		(320,608)
2027	_	(380,788)
Total	\$_	(1,426,463)

B. Burlington School District OPEB Plan

Plan Description

In addition to providing pension benefits, the City provides post-employment health-care insurance benefits for retired employees from the Burlington School District. The OPEB Plan is a single-employer defined benefit plan.

Benefits Provided

The City provides medical benefits in various options for both active employees and retirees. Each class of employees are eligible for explicit subsidies based on dates of enrollment and years of service. Spouses of retirees are able to remain on the applicable plan as long as the retiree is covered. Surviving spouses are allowed to continue coverage only as permitted by COBRA.

The City provides life insurance benefits to certain classes of employees. Office personnel retired on/before June 30, 2018 and AFSCME (bus, food, technology services, and maintenance) employees are eligible to obtain \$10,000 in life insurance at normal, disability, or termination retirement with the premiums being paid by the School District.

Eligibility

All employees are eligible for disability retirement with 10 years of service. All employees are eligible to retire after termination with the District if at termination the employee is age 50 with 15 years of service. Retiree health benefits will commence at age 55 for these terminated employees. Retiree health benefits are only available to Teachers, Administrative Staff, and Paraeducators.

Teachers/Administrative Staff

Certified teachers and staff are eligible for retiree health care benefits until age 65 once they meet the District's retirement eligibility requirements:

- 1. Age 55 and 15 years of service
- 2. 30 years of service

Paraeducators

Paraeducators are eligible for retiree health care benefits until age 65 once they meet the District's retirement eligibility requirements, which is age 55 with 20 years of service.

Food, Maintenance, Bus, Technology Services

Food, maintenance, technology services, and bus personnel are eligible for subsidized life insurance once they meet the School District's retirement eligibility requirements, which are as follows:

- 1. Age 55
- 2. 25 years of service

These groups are only eligible for subsidized life insurance and are ineligible to continue health coverage with the District at retirement.

Employees Covered by Benefit Terms

At June 30, 2022, the following employees were covered by the benefit terms:

Retirees and spouses	46
Active plan members	585
Total	631

The active participants' number above may include active employees who currently have no health care coverage.

<u>Total OPEB Liability, OPEB Expense and Deferred Outflows of Resources and Deferred (Inflows) of Resources Related to OPEB</u>

The total OPEB liability was measured as of June 30, 2022 and was determined by an actuarial valuation as of that date.

For the year ended June 30, 2022, the District recognized OPEB expense of \$386,848. At June 30, 2022, the District reported deferred outflows of resources and deferred (inflows) of resources related to OPEB from the following sources:

	Deferred			Deferred	
	Outflows of			Inflows of	
	Res	sources	Resources		
Difference between expected and actual					
experience	\$ 13	31,735	\$	362,376	
Change in assumptions	22	20,684	_	755,072	
Total	\$ 35	52,419	\$_	1,117,448	

Amounts reported as deferred outflows of resources and deferred (inflows) of resources related to OPEB will be recognized in OPEB expense as follows:

Year Ended June 30:		
2023	\$	(196,535)
2024		(119,446)
2025		(165,601)
2026		(61,353)
2027		(61,353)
Thereafter	_	(160,741)
Total	\$	(765,029)

Discount Rate

The discount rate is the assumed interest rate used for converting projected dollar related values to a present value as of June 30, 2022. The discount rate determination is based on the yield for 20-year tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher (or equivalent quality on another rating scale). The rate of 4.09% per annum for June 30, 2022 was based upon a measurement date of June 30, 2022. The sensitivity of the total and net OPEB liability to changes in discount rate are as follows:

			Current		
	1%		Discount		1%
	Decrease		Rate		Increase
_	(3.09%)	_	(4.09%)	_	(5.09%)
\$	6,770,336	\$	6,394,701	\$	6,029,502

Healthcare Trend

The healthcare trend is the assumed dollar increase in dollar-related values in the future due to the increase in the cost of health care. The healthcare cost trend rate is the rate of change in per capita health claim costs over time as a result of factors such as medical inflation, utilization of healthcare services, plan design and technological developments. The sensitivity of the total and net OPEB liability to changes in healthcare cost trend rates are as follows:

			Healthcare		
Cost Trend					
	1% Decrease	_	Rates	_	1% Increase
\$	5,786,185	\$	6,394,701	\$	7,096,931

Actuarial Methods, Inputs and Assumptions

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples included assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress presents multi-year trend information that shows whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial liabilities for benefits.

The total OPEB liability for the Plan was determined as of June 30, 2022 based on an actuarial valuation date of June 30, 2022.

Discount Rate: 4.09% as of June 30, 2022 and 2.19% for July 1, 2021

Experience Study

Best actuarial practices call for a periodic assumption review and Nyhart recommends the School District to complete an actuarial assumption review (also referred to as an experience study).

Health Care Trend Rates

<u>FYE</u>	Rates	$\underline{\text{FYE}}$	Rates
2023	7.5%	2026	6.0%
2024	7.0%	2027	5.5%
2025	6.5%	2028	5.0%
		2029+	4.5%

Inflation Rate: 2.3% per year

Mortality:

Teachers and Admin employees and retirees: SOA Pub-2010 Teacher Headcount Weighted Mortality Table fully generational using Scale MP-2021

Non-Teacher Employees and retirees: SOA Pub-2010 General Headcount Weighted Mortality Table fully generational using Scale MP-2021

Disabled Retirees: SOA Pub-2010 Non-Safety Disabled Retiree Headcount Weighted Mortality Table fully generational using Scale MP-2021

Surviving Spouses: SOA Pub-2010 Continuing Survivor Headcount Weighted Mortality Table fully generational using Scale MP-2021

Salary Increase Rate

General wage inflation of 2.3% plus merit/productivity increases based on the assumptions used in the City of Burlington actuarial valuation as of June 30, 2021 for non-teachers and Vermont State Teachers Retirement System (VSTRS) OPEB actuarial valuation as of June 30, 2022 for teachers and administration.

Benefit Changes

There have been no substantive plan provision changes since the last full valuation, which was for the fiscal year ending June 30, 2020.

23. Other Post Employment Benefit (OPEB) Plans – Burlington School District

Vermont State Teachers' Retirement System

A. Plan Description

The Vermont State Teachers' Retirement System provides postemployment benefits to eligible VSTRS employees who retire from VSTRS through a cost-sharing, multiple-employer postemployment benefit (OPEB) plan (the Plan).

The plan covers nearly all public day school and nonsectarian private high school teachers and administrators as well as teachers in schools and teacher training institutions within and supported by the State that are controlled by the State Board of Education. Membership in the system for those covered classes is a condition of employment. During the year ended June 30, 2020, the Plan consisted of 7,094 retired members or beneficiaries currently receiving benefits and 9,996 active members.

Vermont Statute Title 16 Chapter 55 assigns the authority to VSTRS to establish and amend the benefits provisions of the Plan and to establish maximum obligations of the Plan members to contribute to the Plan. Management of the Plan is vested in the Vermont State Teachers' Retirement System Board of Trustees, which consists of the Secretary of Education (ex-officio), the State Treasurer (ex-officio), the Commissioner of Financial Regulation (ex-officio), two trustees and one alternate who are members of the system (each elected by the system under rules adopted by the Board) and one trustee and one alternate who are retired members of the system receiving retirement benefits (who are elected by the Association of Retired Teachers of Vermont).

All assets of the Plan are held in a single trust and are available to pay OPEB benefits to all members. The Vermont State Agency of Administration issues a publicly available Annual Comprehensive Financial Report (ACFR) that includes financial statements and required supplementary information for the VSTRS. That report may be viewed on the State's Department of Finance & Management website at: http://finance.vermont.gov/reports and publications/ACFR.

B. Benefits Provided

VSTRS retirees and their spouses are eligible for medical, prescription drug, and dental benefits on a lifetime basis if the retiree is eligible for pension benefits.

C. Contributions

The contributions chart is disclosed in the stand-alone Burlington School District financial statements.

Premium Reduction Option: Participants retiring on or after January 1, 2007 with a VSTRS premium subsidy have a one-time option to reduce the VSTRS subsidy percentage during the retiree's life so that a surviving spouse may continue to receive the same VSTRS subsidy for the spouse's lifetime. If the retiree elects the joint and

survivor pension option but not the Premium Reduction Option, spouses are covered for the spouse's lifetime but pay 100% of the plan premium after the retiree's death.

D. OPEB Liabilities

The State is a nonemployer contributor and is required by statute to make all actuarially determined employer contributions on behalf of member employers. Therefore, these employers are considered to be in a special funding situation as defined in GASB 75 and the State is treated as a nonemployer to VSTRS. Since the District does not contribute directly to VSTRS, no net OPEB liability was recorded at June 30, 2022. The State's portion of the collective net OPEB liability that was associated with the District was \$51,875,317.

The State of Vermont's proportionate share of the net OPEB liability associated with the District is equal to the collective net OPEB liability, actuarially measured as of June 30, 2021, multiplied by the District's proportionate share percentage. The District's proportionate share percentage was based on its reported salaries to the total reported salaries for all participating employers. At June 30, 2021, the District's proportion was 4.067% which was an increase of 0.070% from its proportion measured as of June 30, 2020.

E. OPEB Expense

For the year ended June 30, 2022, the District recognized total OPEB expense and revenue of \$3,427,753 for support provided by the State of Vermont for the Plan.

F. Discount Rate

The discount rate is the single rate of return, that when applied to all projected benefit payments, results in an actuarial present value that is the sum of the actuarial present value of projected benefit payments projected to be funded by plan assets using a long-term rate of return, and the actuarial present value of projected benefit payments using a yield or index rate for 20-year tax exempt general obligation municipal bonds with an average rating of AA/Aa or higher.

G. Healthcare Trend Rate

Health care trend measures the anticipated overall rate at which health plan costs are expected to increase in future years. The trend rate assumptions were developed using Segal's internal guidelines, which are established each year using data sources such as the 2021 Segal Health Trend Survey, internal client results, trends from other published surveys prepared by the S&P Dow Jones Indices, consulting firms and brokers, and CPI statistics published by the Bureau of Labor Statistics.

H. Actuarial Methods and Assumptions

The total OPEB liability for the Plan was determined by an actuarial valuation as of June 30, 2021, using the following methods and assumptions applied to all periods included in the measurement:

Actuarial Cost Method

The Entry Age Normal Actuarial Cost Method is used to determine costs. Under this funding method, a normal cost rate is determined as a level percent of pay for each active Plan member and then summed to produce the total normal cost for this Plan. The unfunded actuarial liability is the difference between the actuarial liability and the actuarial value of assets.

Amortization

The total OPEB liability of this Plan is amortized on an open 30-year period. The amortization method is a level dollar amortization method.

Asset Valuation Method

The Asset Valuation Method used equals the preliminary asset value plus 20% of the difference between the market and preliminary asset values. The preliminary asset value is equal to the previous year's asset value (for valuation purposes) adjusted for contributions less benefit payments and expenses and expected investment income. If necessary, a further adjustment is made to ensure that the valuation assets are within 20% of the market value.

The long-term expected rate of return on both plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) developed for each major asset class. These best estimate ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Best estimates of arithmetic rates of return for each major asset class included in the target asset allocation as of June 30, 2021 are summarized in the following table:

		Long-term Expected
	Target Asset	Real rate
Asset Class	Allocation	of Return
Global Equity	29.00%	5.05%
US Equity - Large Cap	4.00%	4.00%
US Equity - Small/Mid Cap	3.00%	4.50%
Non-US Developed Market Equities	7.00%	5.50%
Emerging Markets Debt	4.00%	3.00%
Core Bonds	19.00%	0.00%
Private & Alternative Credit	10.00%	4.75%
US TIPS	3.00%	-0.50%
Core Real Estate	4.00%	3.75%
Non-Core Real Estate	4.00%	5.75%
Private Equity	10.00%	6.75%
Infrastructure/Farmland	3.00%	4.25%

Assumptions

The actuarial assumptions used to calculate the actuarially determined contribution rates can be found in the Report on the Actuarial Valuation of Post- Retirement Benefits of the Vermont State Teachers' Retirement System Prepared as of June 30, 2016 completed by Buck Consulting. As of June 30, 2021, they are as follows:

Discount Rate	2.20%
Salary Increase Rate	Varies by age
Non-Medicare	6.7% graded to 4.5% over 10 years
Medicare	6.0% graded to 4.5% over 11 years
Retiree Contributions	Equal to health trend
Pre-retirement Mortality	PubT-2010 Teacher Employee Headcount-
	Weighted Table with generational projection using
	Scale MP-2019.
Post-retirement Mortality	Retirees: PubT-2010 Teacher Healthy Headcount-
	Weighted Table Spouses: 109 % of the Pub-2010
	Contingent Survivor Headcount-Weighted Table,
	both Retiree RP- Retirees and Spouses with
	generational projection using Scale MP-2019.

I. Changes in Net OPEB Liability

Changes in net OPEB liability are recognized in OPEB expense for the year ended June 30, 2021 with the following exceptions:

Changes in Assumptions

Differences due to changes in assumptions about future economic, demographic or claim and expense factors or other inputs are recognized in OPEB expense using a straight-line amortization method over a closed period equal to the average expected remaining service lives of active and inactive members in each plan. The first year is recognized as OPEB expense and the remaining years are shown as either deferred outflows of resources or deferred inflows of resources. The amortization period was twenty-seven years as of July 1, 2021. For the fiscal year ended June 30, 2021, there were no changes in assumptions except for the discount rate being increased from 2.21% to 2.20%.

24. Defined Contribution Plans

The City offers its employees a Defined Contribution Plan (DCP) in accordance with Internal Revenue Code Section 457(b) through the International City/County Management Association's (ICMA) Retirement Corporation and Nationwide Retirement Solutions, which is also supplemented with the Post Employment Health Plan (PEHP) for its police and fire employees. The DCP permits full-time employees to defer a portion of their salary until future years. Deferred compensation is not available to employees until termination, retirement, or death. The PEHP permits contributions to offset medical expenses upon separation from service or retirement. The City has no liability for losses under these plans, but does have the duty of due care that would be required of an ordinary prudent investor for safeguarding purposes only. The investments are self-directed by employees.

25. Commitments and Contingencies

A. Burlington International Airport

Grants

Amounts received or receivable from grantor agencies, including possible grant assurance violations, are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount of expenditures which may be disallowed by the grantor cannot be determined at this time, although the Fund expects such amounts, if any, to be immaterial.

Construction Commitments

The Airport has a number of ongoing Airport Improvement Program (AIP) projects for construction and land acquisition as well as several Passenger Facility Charges (PFC) projects for terminal improvements that are funded from restricted assets. AIP projects include taxiway reconstruction, storm-water treatment projects, building demolition related to previously acquired property and land acquisition. The PFC projects include energy projects, cargo apron reconstruction, escalator and baggage carousel projects and related work.

B. Electric Department Commitments and Contingencies

The Burlington Electric Department (BED) receives output from generation of the McNeil Generating Station, the Burlington Gas Turbine, the Winooski One hydro facility, the Airport Solar array, and the Pine Street Solar array. Except for the McNeil Generating Station (for which BED is the operator and 50% owner), BED owns 100% of the remaining resources and is also responsible for their operation.

In addition to energy provided by its owned generation, BED purchases a portion of its electricity requirements pursuant to long-term (greater than one year in duration) contracts. During the fiscal year ended June 30, 2022, long-term sources of purchased power included:

- New York Power Authority (NYPA) power from hydro stations on the Niagara and St. Lawrence rivers under contracts through September 1, 2025 (Niagara) and through April 30, 2032 (St. Lawrence).
- Under the Vermont Wind contract, BED receives 16 MW (40%) of Vermont Wind's wind farm in northeast Vermont (Sheffield) through October 18, 2026.
 BED's 16 MW entitlement is expected to provide approximately 10% of BED's annual energy requirements.
- BED purchases energy from the Georgia Mountain Community Wind (GMCW) project with commercial operation on December 31, 2012. Pursuant to a 25-year contract, BED receives 10MW (100%) entitlement from Georgia Mountain's wind farm in Milton/Georgia, Vermont. GMCW is expected to produce energy sufficient to meet 9% of BED's annual energy needs.
- Deliveries pursuant to a ten-year contract with Hancock began in December 2016. Under the contract, BED will receive 13.5 MW (26.5%) of Hancock's wind farm. It is expected to produce energy sufficient to meet approximately 11% of BED's annual energy needs.
- Prior to 2017, BED has received energy from long-term purchases from a number of small in-state resources under a state mandated feed-in tariff program (called Standard Offer Resources). Effective January 1, 2017, BED was exempted from purchasing energy from these high-priced resources (in recognition of its 100% renewable energy purchases). BED expects this exemption to continue through at least 2023.

- The Burlington City Council, the Vermont Public Service Board, and the voters of Burlington have approved a 23-year energy-only contract with Hydro-Quebec. The contract was executed and deliveries began (for BED) in November 2015. Under the contract, BED will receive 5 MW of contract energy for the period November 1, 2015 to October 31, 2020 and a second (additional) 4 MW of contract energy for the period November 1, 2020 to October 31, 2038. BED's entitlement is expected to provide approximately 6%-15% of BED's annual energy requirements depending on whether one, or both, contract entitlements are flowing in a particular year.
- In 2013, BED entered a long-term power agreement to purchase the output of a proposed 2.5 MW solar generating facility to be located in Burlington (South Forty Solar). This facility came online in January of 2018 and provides the Department with VT Class 2 RECs as well as energy and reduced capacity and transmission requirements.
- In addition to South Forty Solar, BED purchased the output from 7 small in-city solar projects under long-term agreements that amount to 414kW.
- In 2017, BED signed a two-year contract with Great River Hydro with deliveries beginning January 1, 2019. In 2019, this contract was extended for five additional years from 2021 through 2024. The Department receives 7.5 MW during 16 peak hours of each day, along with the attributed RECs (that qualify as VT Class I). This contract is sources from one or more hydro facilities in the State of Vermont.

Energy and Capacity Payments under these long-term power supply contracts were \$13,884,484 for the year ended June 30, 2022. Budgeted commitments under these long-term contracts and long-term contracts approved and executed for future delivery periods total approximately \$69,144,498 for the 5-year period from July 1, 2022 to June 30, 2027.

	Budgeted
Fiscal Year	Commitment
2023	\$ 15,399,469
2024	16,048,962
2025	15,396,546
2026	12,465,867
2027	9,833,654
Total	\$ 69,144,498

The remainder of BED's energy requirement (if any) is satisfied through short-term purchases including:

- Short-term purchases from a number of market counterparties, if necessary.
- Net exchange of energy through the Independent System Operator New England power markets.

The costs of power purchased under these contracts are accounted for as purchase power expenses in the statements of revenues, expenses, and changes in net position. The percentages of the Department's total energy requirements were provided as follows:

	2022
McNeil Generating Station and Gas Turbine	34.0%
Winooski One	8.0%
New York Power Authority	5.0%
Wind Production	25.0%
Hydro-Quebec	15.0%
Great River Hydro	12.0%
In-City Solar	1.0%
Total	100.0%

Note the percentages are relative to the Department's total sources rather than a percentage of requirements, and the Department sells RECs associated with much of the above generation and the above table should not be considered a representation of BED's renewability. In fiscal year 2022, the sources of energy shown above exceed BED's annual energy requirement.

C. Other Funds' Commitments and Contingencies

Grant Programs

The City participates in a number of federally assisted grant programs. These programs are subject to program compliance audits by the grantors or their representatives. The audits of these programs for, or including, the year ended June 30, 2022 have not yet been conducted. Accordingly, the City's compliance with grant application requirements will be established at some future date. The amount, if any, of expenditures which may be disallowed by the granting agencies cannot be determined at this time, although the City expects such amounts, if any, to be immaterial.

D. General Commitments and Contingencies

The City has several claims for which the insurance carriers have issued a reservation of rights. The City is not able to assess the likelihood or the amount, if any, of an unfavorable outcome on these cases at this time.

Insurance Reserves

Starting fiscal year 2016, the City has a large-deductible workers' compensation plan with Travelers Indemnity Company and maintains a fund in its budget to cover claims as they occur up to the insurance limit. Prior to fiscal year 2016, the City was self-insured for workers' compensation. Hickok & Boardman, the City's insurance agent, provides the City with data estimating reserve development of prior year claims. The City's claim reserve estimates are not created by an external actuary but are heavily based in actuarial concepts. Travelers Indemnity Company acts as the third-party administrator to process, pay, and administer the claims after which they bill the City for reimbursement. The City has an irrevocable standby letter of credit with the Travelers Indemnity Company as beneficiary in the amount of \$1,800,000 to secure the payment of claims.

The City is self-insured for health insurance. This plan is administered by a third-party administrator that is responsible for approval, processing and payment of claims, after which they bill the City for reimbursement. The City has reinsurance for individual claims in excess of \$130,000 and for aggregate stop loss of 125% of projected claims.

The City also self-insures for dental insurance. This plan is administered by a third-party administrator that is responsible for approval, processing and payment of claims, after which they bill the City for reimbursement. Each covered employee is guaranteed \$1,500 of paid claims per year after which the employee must pick up any excess costs.

The costs associated with these self-insurance plans are budgeted in the General Fund and allocated to other funds based on the following:

Type Allocation Method

Workers' Compensation 50% Experience and 50% Exposure

Health Number of Employees and Levels of Coverage
Dental Actual Claims and Administration Fees Paid

At June 30, 2022, the City has recorded an estimated liability of \$879,450 and \$11,744 in the General Fund, which represents the short-term payable for health and dental claims, respectively, as of June 30, 2022. A long-term reserve liability of \$298,632 is included for claims incurred but not reported on the governmental statement of net position mostly represents workers' compensation claims incurred on or before June 30, 2022, but not paid by the City as of that date.

Settled claims resulting from insured risks have not exceeded coverage in the past three fiscal years.

The City has elected to pay actual unemployment claims instead of enrolling in an unemployment insurance program. No liabilities have been accrued as the City is not able to make an estimate as to any future costs.

26. Net Position Restatement

The Burlington Electric Enterprise Fund implemented a change in accounting policy for the costs associated with Vermont RES compliance from an annual expense to an inventory basis resulting in beginning net position restatement of \$484,553.

27. Subsequent Events

Management has evaluated subsequent events through February 28, 2023, which is the date the Annual Comprehensive Financial Report was available to be issued.

On August 25, 2022, the City issued \$19,180,000 General Obligation Bond Public Improvement Bonds, Series 2022A maturing November 1, 2042 with an interest rate of 5%. On August 25, 2022, the City issued \$30,120,000 in General Obligation Downtown Tax Increment Bonds, Series 2022 maturing November 1, 2035 with an interest rate of 5.0%.

On September 15, 2022, the City issued \$3,000,000 Series 2022 General Obligation Bond Anticipation Note for the Electric Department, maturing September 15, 2023 with an interest rate of 2.79%

28. New Accounting Pronouncements

The Governmental Accounting Standards Board (GASB) has issued GASB Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements* (P3a and APAs), and GASB Statement No. 96, *Subscription-Based Information Technology Arrangements* (SBITAs), effective for the City beginning with its fiscal year ending June 30, 2023. These statements establish new reporting and disclosure requirements for P3s, APAs, and SBITAs. Management is currently evaluating the impact of implementing these statements.

SUPPLEMENTARY STATEMENTS AND SCHEDULES

Combining Financial Statements

NONMAJOR GOVERNMENTAL FUNDS

SPECIAL REVENUE FUNDS

Special revenue funds are established to account for resources obtained and expended for specific purposes and restricted by law or local action.

- ➤ <u>Traffic:</u> The Traffic Division provides planning, engineering, operations, and maintenance of the traffic signs, markings, and signals that allow the transportation system to operate safely and efficiently for all modes of travel.
- Parking Facilities: The Parking Facilities fund is used to account for the Marketplace parking garage, College Street garage, and various public parking spaces.
- Community and Economic Development: The Community and Economic Development Office (CEDO) works with the community to foster economic vitality, preserve and enhance neighborhoods, improve the quality of life and the environment, and promote equity and opportunity for all residents of Burlington.
- Church Street Marketplace: Church Street Marketplace manages the public right of way for a four-block pedestrian mall and business improvement district. This includes maintenance, marketing and administrative services.
- ARPA: The ARPA fund is used to account for activities reimbursed through federal grants under the ARPA program.
- Impact Fees: Impact fees are assessed against new development to help offset the costs of new infrastructure required by the City's growth. These funds are restricted for the use of capital improvement projects.
- Community Development Corporation (BCDC): The organization's primary purpose is to carry out the industrial and economic development within the City. As such, the purposes of the Corporation include fostering, encouraging and assisting the physical location of business enterprises in the Greater Burlington area and otherwise fulfilling the purposes of a "local development corporation".
- ➤ <u>Telecom Sales Proceeds:</u> The fund is used for holding proceeds of the sale for future City programs.

PERMANENT FUNDS

Permanent funds are established to account for certain assets held by the City in a fiduciary capacity as trustee.

- <u>Cemetery:</u> This fund is used to account for the sale of endowments and interest for maintenance of cemetery.
- ➤ Gift fund: This fund is used to account for a bequest by Horatio G. Loomis in 1902 and interest to be used by the Fletcher Free Library; a bequest from L. Deming in 1972 for use by the parks department for the removal and planting of trees; a bequest of M. Waddell in 1988 to be used for planting flowers in public flower beds; and contributions by the Norman Knight Charitable Foundation to assist the police department with DARE Program.

DEBT SERVICE FUNDS

Debt service funds are established to account for tax increment revenues covering debt service expenditures for districts established under 24 V.S.A.

- Tax Increment Financing Waterfront: The Waterfront TIF Fund is utilized for enhancing public infrastructure and making the waterfront area more accessible and vibrant.
- Tax Increment Financing Downtown: The Downtown TIF Fund is utilized for enhancing public infrastructure in the Downtown District, including structured parking, utility upgrades and renovations, and streetscape improvements.

NONMAJOR PROPRIETARY (ENTERPRISE) FUNDS

Enterprise funds are established to account for activities that are financed and operated in a manner similar to private business enterprises, where the intent of the governing body is that the activity be self-supporting based on user charges.

- <u>Water:</u> Delivery of potable water to residents of Burlington and wholesale to the Colchester Fire District.
- <u>Stormwater:</u> Stormwater addresses state and federal stormwater requirements to improve the water quality of Lake Champlain and the Winooski Rivers, as well as the streams that flow into them.

STATISTICAL SECTION

The City of Burlington's Annual Comprehensive Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the City's overall financial health.

Financial Trends	Page
These schedules contain trend information to help the reader understand how the City's financial performance and well-being have changed over time.	150 - 154
Revenue Capacity These schedules contain information to help the reader assess the City's most significant local revenue source, the property tax.	155 – 158
Debt Capacity These schedules present information to help the reader assess the	
affordability of the City's current levels of outstanding debt and the City's ability to issue additional debt in the future.	159 - 163
Demographic and Economic Information	
These schedules offer demographic and economic indicators to help the reader understand the environment within which the City's financial activities take place.	164 - 165
Operating Information	
These schedules contain service and infrastructure data to help the reader understand how the information in the City's financial report relates to the service the City provides and the activities it performs.	
relates to the service the City provides and the activities it performs.	166 - 168

Subtotal - Overlapping Debt			41,170,000		
Grand Total Direct and Overlapping Debt			\$ 123,340,210		

Source: Outstanding debt for the Burlington School District is from the financial statements of the School District reported a discretely presented component unit for the City of Burlington.

Note: The Burlington School District is within geographic boundaries of the City. The debt of this overlapping government is borne by the property taxpayers of the City. When considering the District's ability to issue and repay long-term debt, the entire debt burden borne by the property taxpayers should be taken into account.

Enterprise funds debt is excluded from the City's direct debt above as that is being repaid with user fees.
