

**CREATION OF URBAN RESERVE PATHWAY:  
PROPOSED FILL PLACEMENT**

Image from 1980's blueprint  
of former tank farm.  
Proposed fill area in yellow  
(approximate).

Existing conditions: trees will be thinned (mostly invasive that have established since the late 1990's) to allow for sightlines from the bikepath. Shoreline walking pathway being designed, follows approximate route of current path.

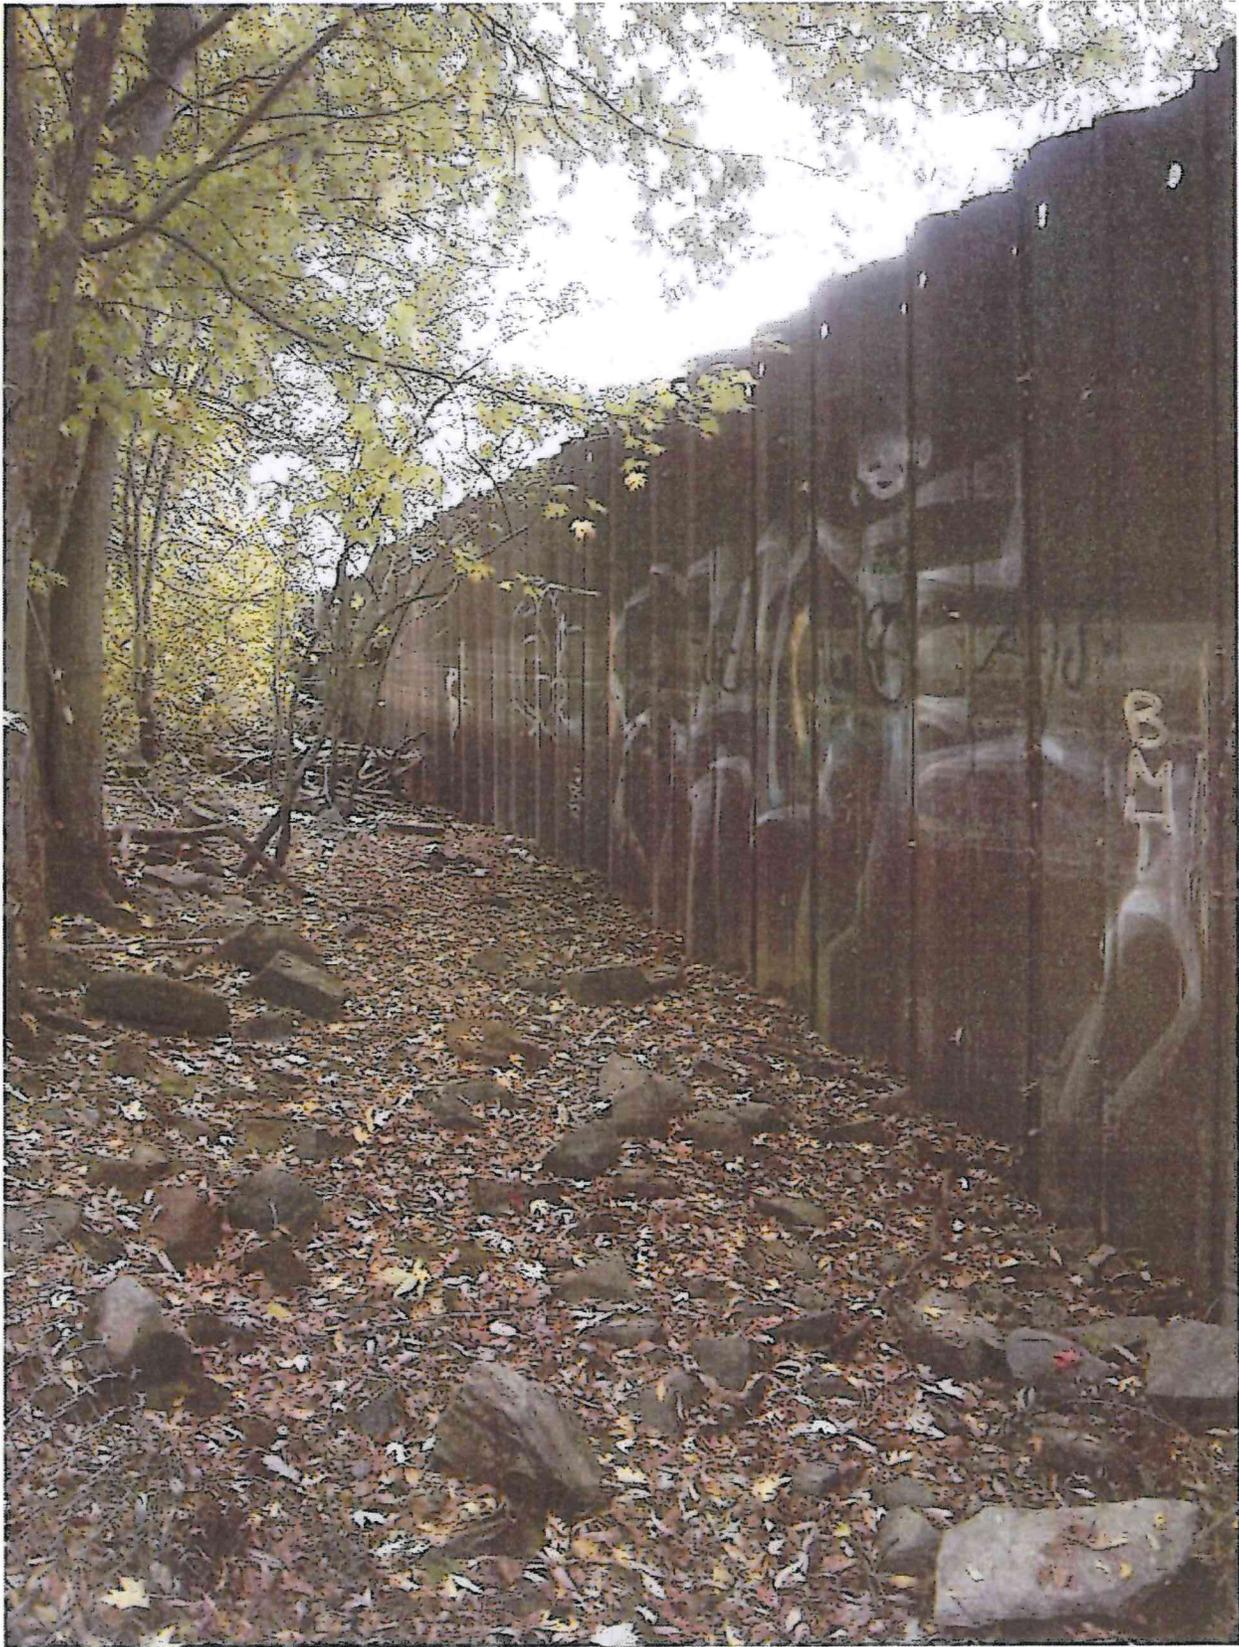

inside northwest corner

looking south from northwest corner

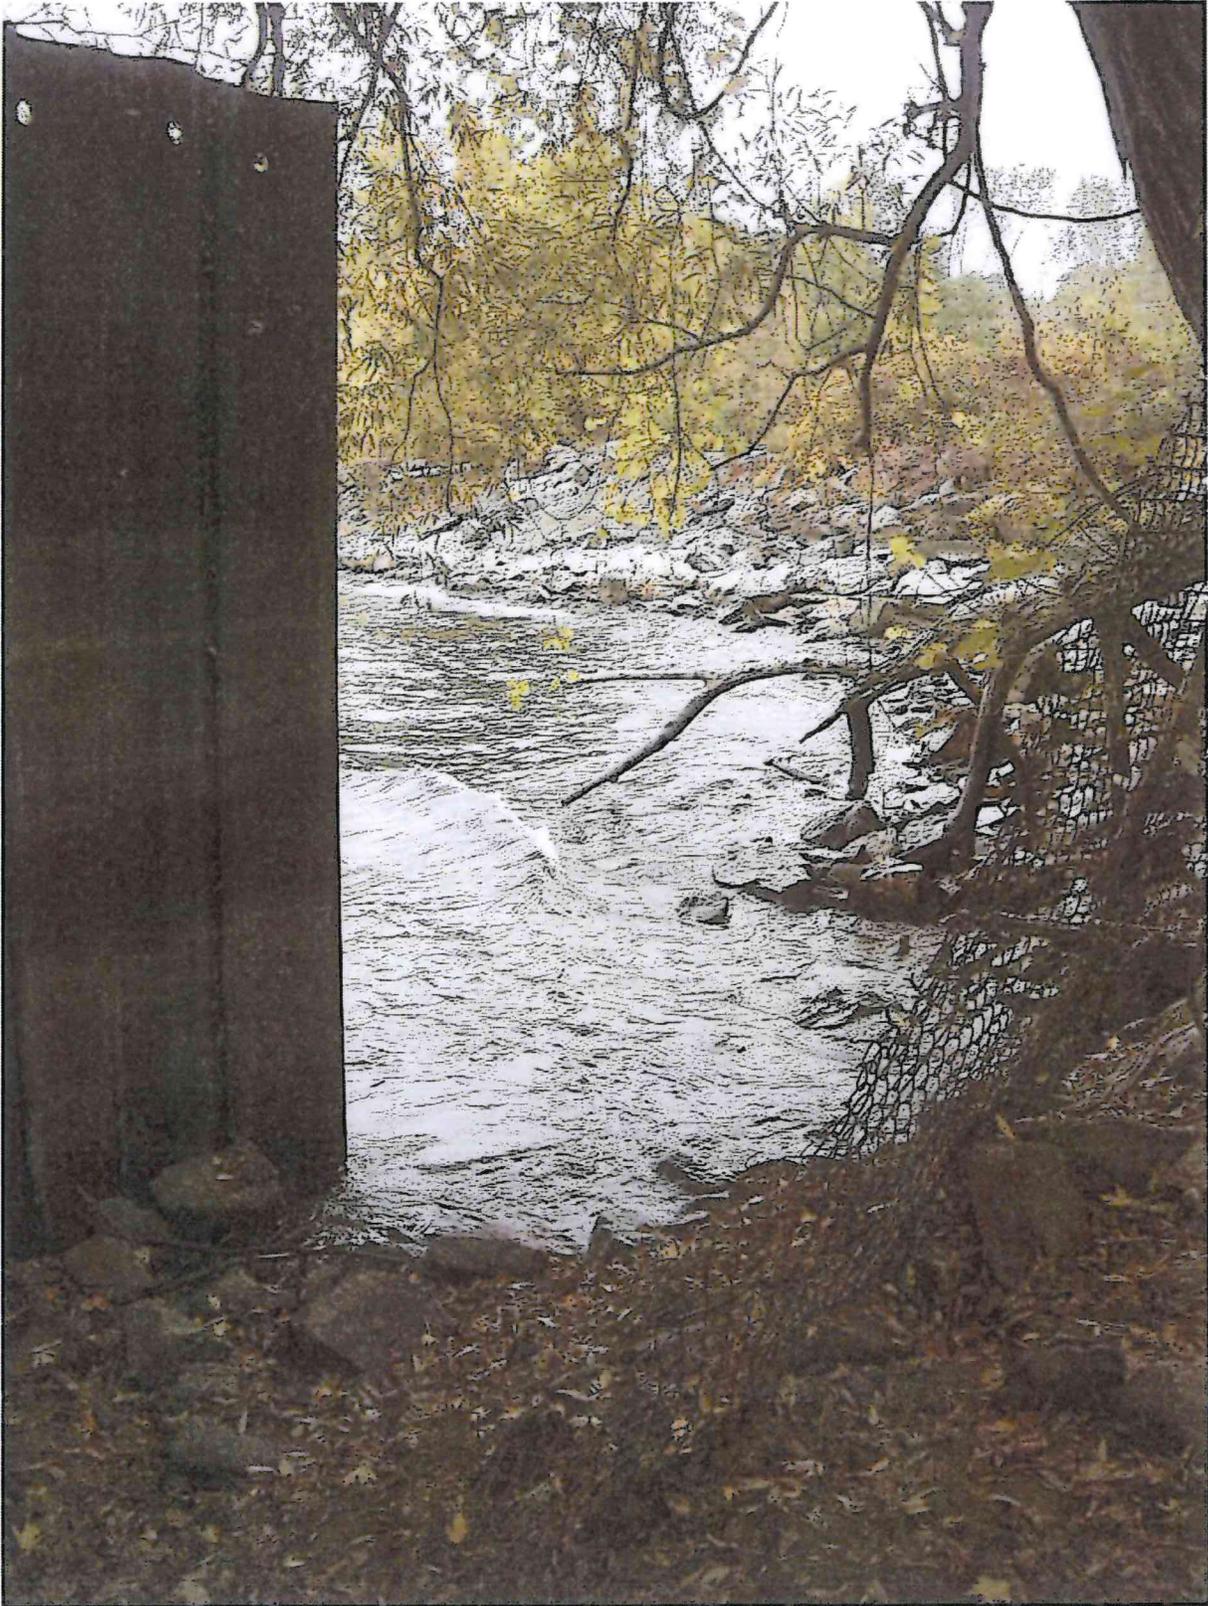

Buckled area of sheetpile on west wall: to be shred up as part of scope

Looking west inside of north wall: to be reinforced

Looking west at north wall from open end: to be closed, extended to shore

Looking east through end of north wall

Looking southwest at north wall from dog park "beach"
