## ADDENDUM #2 – Leddy Park Bike Park Design/Build RFP

**Date:** March 7, 2024  
**To:** All Bidders  
**From:** Burlington Parks, Recreation & Waterfront  
**Re:** Addendum #2 | Leddy Bike Park Design/Build RFP

Provided below is the City's response to the outstanding question regarding the level of design required for the Leddy Park Bike Park Design/Build RFP.

1. Wondering what level design documents will be needed. Will we need a full survey of the site and engineered drawings?
  - a. *Drawings stamped by a licensed and insured engineer are required for this project (see the City Standard Contract Conditions, Exhibit E in the RFP, for insurance requirements). The priority for the design documents will be to provide written specification for materials, an overall site plan, detail drawings of technical features, and record/as-built drawings if any deviations are made during construction. These requirements are primarily for liability purposes and to ensure the park can be maintained according to its original design intent.*
