

Timestamp	Check each 2010 priority that should also be a 2020 priority when City Council draws maps and adjusts how we vote in Burlington for the next 10+ years.	Preserve Incumbency ?	How many Wards should Burlington have?	Should we keep municipal districts?	Should Students be predominantly in a single Ward	Keep neighborhoods intact?	Should Burlington have At large City Councilors	Even v. Odd number of City Councilors	How many representatives per Ward?	TIP: Thoughtful responses have more impact.
10/1/2021 22:23:41	Total number of councilors divided by population, Keep geographic areas intact, Minimize the population difference between wards, Boundaries follow major roads as much as possible, Relationship to state districts, Overall deviation less than 10%	Yes	8	No	No	Yes	None	Even	2	Thank you for listening
10/4/2021 18:46:33	Number of wards, Boundaries follow major roads as much as possible, Ward size matters for citizen communication and campaigning, Relationship to state districts	No	9	Yes	Yes	Yes	Some	Odd	Yes	Thank you for listening
10/4/2021 18:48:25	Number of wards, Boundaries follow major roads as much as possible, Ward size matters for citizen communication and campaigning, Relationship to state districts	No	9	Yes	Yes	No	Some	Odd	3	Waterfront and Downtown Ward is badly needed
10/5/2021 17:29:37	Total number of councilors divided by population, Number of wards, Keep geographic areas intact, Minimize the population difference between wards, Boundaries follow major roads as much as possible, Academic institutions should be in more than one ward, Ward size matters for citizen communication and campaigning, Minimize changes from current wards, Relationship to state districts, Overall deviation less than 10%	Yes	8	No	No	Yes	None	Have no preference	2	We should go back to 2 councilors per ward and not the district model. Burlington's population and the issues we face warrant more representation, not less, and the opportunity for more points of view on the council. We have been cultivating a monoculture of sorts by limiting representation. Yes, debates on issues will take longer, but should also bring about better outcomes by having the benefit of diverse points of view. I just want fair representation and the chance for more than one point of view per ward, which I believe is possible with 2 councilors per ward, with staggered terms.
10/5/2021 17:48:35	Total number of councilors divided by population, Keep geographic areas intact, Minimize changes from current wards, Relationship to state districts, Overall deviation less than 10%	Yes	8	Yes	Yes	Yes	None	Even		
10/6/2021 6:06:10	Total number of councilors divided by population, Number of wards, Keep geographic areas intact, Minimize the population difference between wards, Ward size matters for citizen communication and campaigning	No	7	No	No	Yes	None	Odd	2	I would like the city to seriously consider returning to 2 City Council members from each Ward, whether it be 7 or 8.
10/16/2021 0:25:45	Number of wards, Minimize the population difference between wards, Ward size matters for citizen communication and campaigning	No	8	No	No	Maybe	None	Have no preference	2	If the city were sliced into wards irregardless of neighborhood boundaries or other affinities, people might get to know "others" better. These redistricting priorities look different to me today that they did in 2013. I'm suspicious of racism, and 'otherism'. All ward residents do together is NPA and elect representatives. Why do we have to be like, have affinities? Maybe we would be more comfortable with diversity if we mixed more. I looked at a map of city and imagined ward slices done by a computer creating slices determined by equal population in each slice. I liked it.

10/18/2021 9:02:06	Keep geographic areas intact, Minimize the population difference between wards, Boundaries follow major roads as much as possible, Ward size matters for citizen communication and campaigning	No	7	No	Yes	Yes	All	Odd	I would like to see more than 1 per. I feel as though the 1 per model you end up with hyper represented districts by the one who wins vs a winner and runner up model would show a broader representation of the wants of the group (no winner takes all)	I feel like there is a crazy amount of animosity among our current city council and a lot of infighting between sides and between the council and the mayors group leading to our wheels of government moving at glacial speed.
10/18/2021 17:03:42	Keep geographic areas intact, Minimize the population difference between wards, Ward size matters for citizen communication and campaigning	No	8	No	Yes	Yes	None	Have no preference	1	
10/18/2021 17:56:59	Total number of councilors divided by population, Number of wards, Ward size matters for citizen communication and campaigning, Minimize changes from current wards, Overall deviation less than 10%	No	8?	No	** Maybe	Yes	None	Even	2?	Redistricting after 2010 census was poorly done. Awkward set up resulted. Stick to what worked for years. Sometime ago, there were 6 wards in Burlington. Just because population grew, the number of councilors grew. Was this necessary? This is a daunting project. Take the time needed to get it right.
10/18/2021 18:07:03	Minimize the population difference between wards, Ward size matters for citizen communication and campaigning, Overall deviation less than 10%	No	10	No	No	Yes	None	Odd	2	
10/18/2021 18:31:54	Total number of councilors divided by population, Keep geographic areas intact, Minimize the population difference between wards, Overall deviation less than 10%	No	7	No	** Maybe	Yes	None	Even	2	
10/18/2021 22:13:02	Total number of councilors divided by population, Number of wards, Minimize changes from current wards	Yes	8	No	** Maybe	Yes	None	Even	2	
10/19/2021 7:57:38	Total number of councilors divided by population, Minimize the population difference between wards, Boundaries follow major roads as much as possible, Ward size matters for citizen communication and campaigning	Yes	8	Yes	No	Maybe	Some	Have no preference	1	
10/20/2021 17:05:58	Number of wards, Keep geographic areas intact, Minimize changes from current wards	No	8	Yes	** Maybe	Yes	None	Have no preference	2	

Timestamp	Check each 2010 priority that should also be a 2020 priority when City Council draws maps and adjusts how we vote in Burlington for the next 10+ years.	Preserve Incumbency ? 10/20/2021 17:06:58	Total number of councilors divided by population, Minimize the population difference between wards, Academic institutions should be in more than one ward, Relationship to state districts	Yes	8	Yes	** Maybe	Maybe	Some	Odd	2 and it should be ranked voting	In many ways, geographical boundaries are important because of issues that affect certain locations. However many people work, visit, recreate etc in other parts of the city so that's why I think city council should be a mix. I also think student representation is important because they live here over 8+ months of the year, and many are even here year round. City decisions affect them and can also influence whether or not they stick around post grad. Plus, they may live all over due to rent prices, other jobs, etc. And I think allowing the "younger voice" to influence older more "traditional" voices is important. It often feels as if some parts of Burlington are very much traditionalists which does not attract immigration or diversity, and could increase gentrification, all bad things!
10/20/2021 17:28:49	Minimize the population difference between wards	Yes	8	Yes	No	No	None	Odd	1	Before making any changes make sure you know what could happen.
10/20/2021 17:51:23	Total number of councilors divided by population, Number of wards, Minimize the population difference between wards, Academic institutions should be in more than one ward, Ward size matters for citizen communication and campaigning, Overall deviation less than 10%	No	10	Yes	** Maybe	No	None	Odd	3	Both mayoral and city council races has seen huge sums of campaign monies impacting political access to an equal understanding of each candidate. I would support campaign contribution limits, control of dark money, and increased media access given to each candidate.
10/20/2021 18:34:58		No	44,743	No	No	No	None	Have no preference	0 44743 represent themselves	Burlington surveys have been proven to be not used so why I am I bothering?
10/20/2021 18:51:59	Total number of councilors divided by population, Minimize changes from current wards	Yes	8	Yes	No	Yes	Some	Odd		
10/20/2021 18:59:27	Keep geographic areas intact, Minimize the population difference between wards, Relationship to state districts, Overall deviation less than 10%	No	8	No	Yes	Yes	None	Have no preference	2	I haven't found the district reps to be a useful addition. I think having 2 reps/ward was clearer and simpler.
10/20/2021 19:46:07	Total number of councilors divided by population, Keep geographic areas intact, Boundaries follow major roads as much as possible, Ward size matters for citizen communication and campaigning, Minimize changes from current wards	No	The same as there are now.	No	No	Yes	Some	Odd	2	Listen to the people when it comes to issues for the city, to make sure that is what most would like.
10/20/2021 20:29:17	Number of wards, Minimize the population difference between wards, Minimize changes from current wards, Overall deviation less than 10%	Yes	8	Yes	** Maybe	Yes	Some	Odd	2

10/21/2021 4:54:24	Total number of councilors divided by population, Keep geographic areas intact, Minimize the population difference between wards, Boundaries follow major roads as much as possible	No	no change		No	Maybe	None	Have no preference	1.5	I think right now there is not good representation on council. It is very skewed and does not represent all ideologies of citizens. I wish there was a way to ensure more diversity of political ideology on council so discussions and outcomes are more balanced.
10/22/2021 16:15:17					Yes
