PROJECT NOTES:

This plan set, combined with the contract, provides construction details for the building project. The lead carpenter shall verify that site conditions and dimensions are consistent with these plans before starting work. Work not specifically detailed shall be constructed to the same quality as similar work that is detailed. All work shall be done in accordance with international building and local codes.

Written dimensions and specific notes shall take precedence over scaled dimensions and general notes. The sale person/designer shall be consulted for clarification if site conditions are encountered that are different than shown. If discrepancies are found in the plans or notes, or if a question arises over the intent of the plans or notes, the carpenter or sub-contractor shall verify and is responsible for all dimensions (including rough openings).

All trades shall maintain a clean work site at the end of each work day.

Please see additional notes called out on other sheets.
