UPGRADE YOUR EXPECTATIONS WITHOUT UPGRAADING YOUR BUDGET.
When we introduced our advanced H3 window, Window & Door magazine gave it the Crystal Achievement Award for innovation.

Since then, all we’ve done is make it even better.

At the core of the H3 is our patented Fusion Technology™. It integrates three perfect materials – extruded aluminum, vinyl and wood – into one perfect window. This unique fusion results in improved energy efficiency & performance, noticeably enhanced aesthetics, an extreme seal, and easier installation.

Still “The Most Innovative Window Of The Year.”

The past few years have seen some incredible improvements to an already over-achieving window line. We recently introduced our H3 Accessory Frame with four available profiles. Now we’ve added a completely new lineup of simulated divided lite grille profiles to give our H3 windows even more design options.

You’ll also find our H3 FeelSafe product line making a name for itself in Zone III impact-prone locations. Add the continuous head and sill offered on all of our H3 products, and you’ll see why our H3 Series remains a game changer.
 Nobody’s Ever Built A Casement Like This Before.

H3

Like all our products, Sierra Pacific awning windows are custom made, by hand, to your exact specifications. We think you’ll notice the difference in how they look and how they perform.

Awnings are a great choice when you want the fresh air of an open window even if it’s raining. Our awning windows are commonly used alone or combined underneath a large picture window to provide ventilation.

H3 Awning Window

Mix and match the H3 with our premium line to help stay within budget.

Sealed and mitered corners outside, non-mitered inside. Architectural sandblast all at 1/8”.

Choose from nine species of interior wood.

Wood interior for warmth, beauty and thermal insulation with 4 9/16” standard jamb depth. Not just a veneer like some windows. Select ponderosa pine is standard. Available natural, primed, or factory finished, and in 8 other wood species.

Seamless factory mull system stops water with integral continuous head and sill mulls.

Extra strong Griff™ metal base frame for superior rigidity, tight corners, wind pressure against me, and enhanced resistance to air or water leaks. No tiny components are visible when window is closed.

Exposed patented Fusion Technology™ integrals 3 perfect materials into 1 perfect window.

Innovative snap lock design means no unsightly screws or fasteners on the interior. Only minor nail holes to fill in the screen track.

Proprietary patented Fusion Technology™ integrates 3 perfect materials into 1 perfect window.

Top of the line 3-piece handle and operating hardware are standard.

Premium weatherstripping.

Custom sizing to 1-3/4” available.

Revolutionary patent pending H3 Accessory Frame integrates with nail fin to allow easy installation of four different profiles with no additional nailing.

Innovative rigid nailing fin for greater structural integrity, improved water barrier and easy installation. The H3 virtually eliminates racking problems.

Now available in our FeelSafe impact line.

No future building a window like this before.
Nobody’s Ever Built A Double Hung Like This Before.

**H3**

- **Thicker, stronger extruded aluminum cladding.** Ours is at least twice as thick as competitors’ roll-form cladding for greater durability and dent resistance.

- **Wood interior for warmth, beauty and thermal insulation with 4-9/16” standard jamb depth.** Not just a veneer like other mid-priced windows. Select ponderosa pine is standard. Available natural, primed, or factory finished, and in 8 other wood species.

- **Integral rigid nailing fin for greater structural integrity, improved water barrier and easy installation.** The H3 virtually eliminates racking problems.

- **Protected to the core against water with our exclusive patented CoreGuard Plus™ wood treatment for superior rot resistance.**

- **Sealed and mitered corners outside, non-mitered inside.** Seamless factory mull system stops water with integral continuous head and sill mulls.

- **Seamless factory mull system stops water with integral continuous head and sill mulls.** Now available in our FeelSafe impact line.

- **Proprietary patented Fusion Technology™ integrates 3 perfect materials into 1 perfect window.**

- **Revolutionary patent-pending H3 Accessory Frame integrates with nail fin to allow easy install of four different profiles with no additional nailing.**

- **Low profile surface mounted lock with easy to operate lever.**

- **Constant force balance for smooth, easy operation.**

- **Available for new construction applications with integral nailing fin or as an insert window for replacement applications.**

- **Choose from nine species of interior wood.**

- **Concealed jambliner just like on our custom built, high end windows.**

- **Easy-tilt sash for easy cleaning.**

- **Premium weatherstripping.**

- **Custom sizing to 1/8” available.**

- **Mix and match the H3 with our premium line to help stay within budget.**

- **Low profile surface mounted lock with easy to operate lever.**

- **Extra-strong 0.078” vinyl base frame for superior rigidity, tight corners, total protection against rot and enhanced resistance to air or water leaks.**

- **Sealed and mitered corners outside, non-mitered inside.**

- **Seamless factory mull system stops water with integral continuous head and sill mulls.**

- **Extra-strong 0.078” vinyl base frame for superior rigidity, tight corners, total protection against rot and enhanced resistance to air or water leaks.**
Nobody’s Ever Built A Slider Like This Before.

Our H3 horizontal slider comes with solid performance, plenty of glass & accessory options. Available in larger sizes.

- Thicker, stronger 0.055” extruded aluminum cladding. It’s at least twice as thick as competitors’ roll-form cladding for greater durability and dent resistance.
- Protected to the core against water with our exclusive patented CoreGuard Plus™ wood treatment for superior rot resistance.
- Wood interior for warmth, beauty and thermal insulation. Not just a veneer like some windows.
- Extra-strong 0.078” vinyl base frame for superior rigidity, tight corners, total protection against rot, and enhanced resistance to air or water leaks.
- Jamb depth options up to 8-1/8”.
- Innovative snap-lock design means no unsightly screws or fasteners on the interior. Only minor nail holes to fill in the screen track.

Proprietary patented Fusion Technology™ integrates 3 perfect materials into 1 perfect window.

- Up to a 1” glass thickness for more glazing options; including triple IG.
- Proprietary patented H3 Accessory Frame integrates with nail fin to allow easy install of four different profiles with no additional nailing.
- Integral rigid nailing fin for greater structural integrity, improved water barrier and easy installation. The H3 virtually eliminates rocking problems.
- Single or triple configurations.

- Precision stainless steel rollers are standard.

- Mitered corners and narrow sash stiles & rails for a full view.

- Minimal curtains and narrow sash rails for a full view.

- Select ponderosa pine is standard. Available natural, primed, or factory finished, and in 8 other wood species.

- Interior vinyl track mechanism is available in beige or white to blend seamlessly with a painted white interior.

- Thicker, stronger 0.055” extruded aluminum cladding. It’s at least twice as thick as competitive roll-form cladding for greater durability and dent resistance.

- Our H3 easy-glide slider is a welcome addition to our option-rich, easy-tilt double hung, and our casement and awning windows. Depending on design and operational preference, each is an exceptionally smart choice for new construction or window replacement.

- Available with simulated divided lite grilles or our grilles between the glass.

- Single or triple configurations.

- Up to a 1” glass thickness for more glazing options; including triple IG.

- Proprietary patented Fusion Technology™ integrates 3 perfect materials into 1 perfect window.

- Innovative snap-lock design means no unsightly screws or fasteners on the interior. Only minor nail holes to fill in the screen track.

- Integral rigid nailing fin for greater structural integrity, improved water barrier and easy installation. The H3 virtually eliminates rocking problems.

- Up to a 1” glass thickness for more glazing options; including triple IG.

- Proprietary patented H3 Accessory Frame integrates with nail fin to allow easy install of four different profiles with no additional nailing.

- Integral rigid nailing fin for greater structural integrity, improved water barrier and easy installation. The H3 virtually eliminates rocking problems.

- Mitered corners and narrow sash stiles & rails for a full view.

- Minimal curtains and narrow sash rails for a full view.

- Select ponderosa pine is standard. Available natural, primed, or factory finished, and in 8 other wood species.

- Interior vinyl track mechanism is available in beige or white to blend seamlessly with a painted white interior.

- Thicker, stronger 0.055” extruded aluminum cladding. It’s at least twice as thick as competitive roll-form cladding for greater durability and dent resistance.
Get ready to widen your views with the newly introduced H3 Direct Set. Up to 50 square feet of glass as a single unit or in combination, with future configurations going even larger. The slim frame design and narrow sight lines make its contemporary profile the perfect match for our H3 Casement, Sliding and Double Hung windows. It’s a look that’s opening up new possibilities in H3 design.
A Top Performer In Zone III Areas.

**H3**

H3 has long been a favorite with architects, builders and homeowners. With the addition of our hurricane resistant FeelSafe glazing, H3 FeelSafe is an amazing and often necessary choice for zone III homebuilders. Exceptionally easy to install and extremely energy efficient, choose from casement, awning, double hung and direct set. Our full H3 FeelSafe line is perfect for coastal building challenges.

**Famous patented H3 Fusion Technology™.**

- Rigid nailing fits for extraordinarily easy installation, nearly eliminating racking problems.
- Standard AAMA 2604 powder coat finish with optional AAMA 2605 powder coat finish.
- Multiple exterior clad accessory options that require no through-frame anchors.
- Wide selection of hurricane-resistant laminated FeelSafe impact glazing.
- Multiple clad accessory options that require no through-frame anchors.
- Continuous head and sill, certified with combinations up to 3 wide and 2 high.
- High-strength tempered or annealed glass.
- Special polyvinyl butyral bonding.
- Sealed airspace.
- High-strength tempered or annealed glass.
What’s the best glazing for your windows and patio doors? Obviously, what’s best for a freezing northern winter is not necessarily right for a hot southern summer. We have the answer. With one of the broadest selections of glazing options in the window industry, Sierra Pacific lets you choose exactly the right performance glass for your exact weather and environmental conditions.

You can choose glazing to improve your energy efficiency and lower your energy bills. You can capture the sun’s heat, or reflect it. You can also reduce outside noise, block the sun’s damaging UV rays, or even enhance your privacy.

**High Performance Glazing Options.**

**Fine Tune Your Windows For Optimal Performance.**

**The Advantage Of No-Metal Spacers.**

One of the technological advances that make our Aspen windows perform so well is our patented No-Metal TrueWarm® Edge spacers. Many window manufacturers use aluminum spacers between their panes of glass. These conduct cold and heat, and that’s not good for thermal performance.

Our no-metal warm edge spacers are 100% polymer structural foam, for excellent thermal performance and a superior seal.

**Cardinal’s triple layer silver product with their exclusive XL Edge Spacer for superior performance. 95% UV protection. Solar heat gain coefficient of 0.27.** Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass. * ***

The same superior performance as regular Low E 366 (above), but with the addition of i89 coating on the interior surface to increase insulating value and reduce solar heat gain. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve protective film or with Preserve and Neat coating.*** **

Cardinal’s newest glazing innovation. It has an amazingly low 0.18* solar heat gain coefficient to keep out the heat even in the blazing sun. Slightly tinted. Blocks 98% of UV rays. Less heat gain when it’s hot, less heat loss when it’s cold, and maximum glare control. Also available with Preserve protective film or with Preserve and Neat coating.*** **

A very high (0.70*) coefficient for capturing solar heat gain. Ideal for reducing your heating bills in colder climates. Superior insulation value blocks cold and keeps in the heat. Also available with Preserve protective film or with Preserve and Neat coating.*** **

The same superior performance as regular Low E 180 (above), but with the addition of i89 coating on the interior surface to increase insulating value. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve protective film or with Preserve and Neat coating.*** **

Insulated for improved energy efficiency. Single surface low e coating to reduce solar heat gain and block UV rays.

FeelSafe® Insulated Low E
with or without Sea Turtle Glazing

FeelSafe® Laminated
with or without Sea Turtle Glazing

*All values shown are center of glass. ** Interior surface coatings, also known as surface #4, are applied to the interior (room-side surface) of a dual pane IG unit, resulting in improved thermal performance and lower heating costs. Because the coating reflects heat back into the room, the interior side pane of glass will be slightly cooler in winter, causing a higher potential for interior condensation. *** Available when selecting XL Edge Spacer.
A Premium Factory Finish.

Nothing beats a factory finish performed with state-of-the-art equipment under rigorously controlled, ultra-clean conditions.

Sierra Pacific gives you two premium options: Ultra Stain and Ultra Coat.

Ultra Stain is an advanced, multi-step process that brings out all the beauty of your wood interior. Ultra Coat is a white or black durable interior paint.

Both Ultra Stain and Ultra Coat are so tough, they resist scratching and marring and so superior, they provide advanced protection against moisture.

We happen to think that your windows should match your cabinetry perfectly. So whether it's your den or your kitchen, or throughout the whole house, Sierra Pacific lets you choose from nine beautiful woods for your windows, patio doors and trim. In fact, as long as it's workable, we're willing to make your windows out of any wood in the world.

We happen to think that your windows should match your cabinetry perfectly. So whether it's your den or your kitchen, or throughout the whole house, Sierra Pacific lets you choose from nine beautiful woods for your windows, patio doors and trim. In fact, as long as it's workable, we're willing to make your windows out of any wood in the world.
The exterior of Sierra Pacific H3 windows is fully encased in low maintenance, heavy-duty, extruded aluminum. Ours is at least twice as thick as our competitors’ roll-form cladding.

What's more, our finishing process leads the industry in durability and environmental safety. Non-hazardous AAMA 2604 and 2605 powder-coatings have the color retention, surface hardness and scratch resistance necessary to withstand even the harshest conditions.

As for colors? Nobody gives you more choices than Sierra Pacific. 75 colors and some sensational textures allow you to add warmth, a splash of cheerfulness or a new statement to your designs. We'll also custom match any color you choose.

MAKE OUR WINDOWS UNIQUELY YOURS.

With our grille and hardware design options, you can make the look of your H3 windows truly complement your home—whether your décor is traditional, contemporary, or something in between.

**Casement Hardware.**

Our standard handle is the Encore from Truth. It’s the same high-end handle as on our premium casements. It folds out of the way of window treatments, and comes in beautiful hardware finishes, including our newly created black matte finish.

**Double Hung Hardware.**

Easy-tilt latches make window cleaning a breeze. Available in multiple finishes.

**Grilles Between The Glass.**

Grilles between the glass come in your choice of profiles: 5/8” or 1” contour or 5/8” flat. Available in 8 colors. Two-tone grilles also available.

**Grille Configurations.**

Your grilles can be as traditional or as unique as you choose. Our standard configurations include equal and prairie. But with our custom configurations, we’re ready to transform your inspiration into reality.

---

CLASSIC APPEAL, MODERN EASE.

Sierra Pacific offers two ways to achieve the classic appeal of traditional divided lights. Our newly expanded selection of simulated divided light profiles, with optional aluminum spacers between the glass, and our grilles between the glass, giving you the visual appeal you want without the grille ever getting in your way.

**Simulated Divided Lite Profiles**

5/8”  7/8”  1”  1-1/4”  2”

**Grille Configurations**

Equal  Prairie  Bronze spacer option shown.
One of the industry’s top performers keeps getting design improvements to make it even easier to install, more efficient to own and more beautiful to look at.

**Patented H3 Accessory Frame**

This is an entirely different frame cladding profile system with an integral nailing fin, in four available profiles. Four cover options snap in place on the frame with a clip system. No through-frame anchors or excessive nail holes, leaving you an integrated frame that gives homeowners the flexibility to choose the aesthetic they want.

**Exterior Trim Add-on Profiles**

Need box mulls or other adaptations in the field? We’ve also created a new set of H3 add-ons with the same profiles as our accessory frames.
Sierra Pacific wood windows and doors are protected by CoreGuard Plus™ wood treatment, a patented process that, when needed, penetrates wood right to the core to repel water, so our windows and patio doors are less likely to warp or swell and have superior dimensional stability. In addition, CoreGuard Plus contains fungicides and insecticides to deeply protect all wood species from pests and rotting. Amazingly, this strong protection comes from a naturally organic, water-based treatment with nearly zero VOCs, which helps us maintain our strict environmental stewardship.

Sierra Pacific Windows and Doors are backed by our fully transferable 30/20 Limited Warranty (20/10 for commercial products). It provides 30 year residential AAMA 2605 clad exterior coating coverage, 20 year insulated glass coverage, 10 year parts coverage, 2 year labor coverage, and 10 year AAMA 2604 clad exterior coating coverage. For warranty specifics, please refer to SierraPacificWindows.com.
The H3 isn’t just remarkably advanced. It’s also remarkably easy to install and finish. A rigid nailing fin is integral to H3 windows. It produces greater structural integrity, an improved water barrier and the virtual elimination of racking problems.

Plus, our innovative snap-lock design also means no unsightly screws or fasteners on the interior and fewer nail holes to fill. In fact, the only nail holes on the casement are in the screen track.

The bottom line is that you save time. And time is money.
Our 1,900,000-Acre Manufacturing Plant.

Sierra Pacific Industries, our parent company, sustainably manages 1.9 million acres of timberland. We’re the largest millwork producer and one of the largest lumber companies in the U.S.

But our size is only a small part of the story.

Sierra Pacific Industries plants 7 million new trees every single year. So 100 years from now, our forests will have more trees—and bigger trees—than today.

As a proud part of this family-owned, environmentally-committed company, Sierra Pacific is the only window company that maintains continuous quality control from the moment our tree seeds are planted until our beautiful wood windows are produced, approved and delivered to you.

Historic Charm Goes Modern

NEW Westchester
Double Hung Windows

SIERRA PACIFIC WINDOWS
The tireless work of our engineers and designers has paid off. Introducing our new Westchester Double Hung windows, a huge improvement to a classic look.

Designed to bring back the original charm of windows hand-crafted over a century ago, they offer narrower check-rail sightlines with updated structural and thermal performance. You’ll also find many new patent pending innovations, including a traditionally styled combination sash lock.

The Westchester is crafted with fully clad exteriors using durable extruded aluminum.

**PG50 performance rating on most standard sizes.**

0.28 U-value with dual insulated Lo-E 366 and argon.

60” x 108” maximum size for 1-3/4” sash.

Thermally broken sash construction.

Bottom sash tilt latch for easy cleaning.

60” x 80” maximum size for 1-3/4” sash.
Innovating improvements to a timeless design, the Westchester is one of our highest performers, with structural and thermal performance ratings rarely found in the Double Hung market. Yet each Westchester is built with historically accurate sash proportions, making it ideal for architecturally accurate renovations or for a touch of elegance in new construction projects.
**EXTERIORS DESIGNED TO LAST.**

Clad exteriors are fully encased in low maintenance, heavy-duty, extruded aluminum that's at least twice as thick as roll-form cladding.

What's more, nearly all color finishes feature our environmentally friendly AAMA 2605 powder-coating, which leads the industry in durability and environmental safety. Our Textured Collection uses AAMA 2604 powder-coating to retain its rich texture.

As for colors? An industry-leading 75 choices along with some sensational textures allow you to add warmth, a bright splash or a new statement to your designs. We'll also custom match any color you choose.
THE ELEGANT LOOK OF TRADITIONALLY STYLED SASH LOCKS.

Historic accuracy even makes its way into the patent pending sash locks, which are designed to match the traditional charm that works so well in both residential and commercial applications.

THE AUTHENTICITY OF WOOD.

Rich, genuine wood give Westchester window interiors an authentic touch that makes a remarkable difference to interior spaces.

Choose from nine beautiful wood species to match your interiors perfectly. And if your design needs take you someplace else, not to worry. As long as it’s workable, we’ll make your windows out of nearly any species you like.

Choose From Nine Interior Wood Species, Or Custom, And Thirteen Interior Trim Options.

Sierra Pacific is proud to be the only window company that manufactures its products with complete vertical integration. The full cycle makes use of every part of our wood resources, all the way down to bark and sawdust that’s burned to create energy for the communities we call home.
THE CHARM OF YESTERDAY, CUSTOMIZED FOR TODAY.

Starting with a classic shape, we give you many ways to make Westchester your own. And all of them are constructed with the meticulous craftsmanship that makes this double hung window a lasting enhancement to any space.

Your Westchester grilles can add a look as unique as you like, from our standard traditional and contemporary configurations to your choice of custom designs.

SIMULATED DIVIDED LITE PROFILES
A classic look that’s energy-efficient.
Highly Engineered For Better Performance.

The Westchester maintains higher air, water and structural capabilities and improved thermal ratings even as we engineered larger sash sizes.

Triple glazed windows with argon have a U-value as low as .17. Dual glazed reach a U-value of .28 with LoE-366 and argon. Performance numbers like these demonstrate the rigorous engineering standards and technology that are built into the re-imagining of this classically designed window.

Low E 366
- Combines triple layer silver product for superior performance. 95% UV protection. Solar heat gain coefficient 0.27. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low E 366 with i89 Coating*
- The same superior performance as regular Low E 366, but with the addition of i89 coating on the interior surface to increase insulating value and reduce solar heat gain. Meets the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low E 340
- Combines newest glazing innovation. Has an extremely low 0.18 solar heat gain coefficient to keep out the heat even in the blazing sun. Triple glazed. Blocks 98% of UV rays. Less heat gain without hot, less heat loss when it’s cold, and the best glare control under the sun. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low E 180 Passive Solar
- A very high 0.70 solar heat gain coefficient. Ideal for reducing your heating bills in colder climates. Superior insulating value blocks cold and keeps in the heat. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 180 Passive Solar with i89 Coating**
- The same superior performance as regular Low-E 180, but with the addition of i89 coating on the interior surface to increase insulating value and improve the thermal performance and lower heating costs. Because the coating reflects heat back into the room, the room-side pane of glass will be slightly colder in winter, causing a higher potential for interior condensation.

*All values shown are center of glass. **Interior surface coatings, also known as surface #4, are applied to the interior (room-side surface) of a dual pane IG unit, resulting in improved thermal performance and lower heating costs. Because the coating reflects heat back into the room, the room-side pane of glass will be slightly colder in winter, causing a higher potential for interior condensation.

Choose Glazing Perfect For Your Environment.

Low E 366
- Combines triple layer silver product for superior performance. 95% UV protection. Solar heat gain coefficient 0.27. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low E 366 with i89 Coating*
- The same superior performance as regular Low E 366, but with the addition of i89 coating on the interior surface to increase insulating value and reduce solar heat gain. Meets the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 180 Passive Solar with i89 Coating**
- The same superior performance as regular Low-E 180, but with the addition of i89 coating on the interior surface to increase insulating value. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 366
- Combines triple layer silver product for superior performance. 95% UV protection. Solar heat gain coefficient 0.27. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low E 366 with i89 Coating*
- The same superior performance as regular Low E 366, but with the addition of i89 coating on the interior surface to increase insulating value and reduce solar heat gain. Meets the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low E 340
- Combines newest glazing innovation. Has an extremely low 0.18 solar heat gain coefficient to keep out the heat even in the blazing sun. Triple glazed. Blocks 98% of UV rays. Less heat gain without hot, less heat loss when it’s cold, and the best glare control under the sun. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low E 180 Passive Solar
- A very high 0.70 solar heat gain coefficient. Ideal for reducing your heating bills in colder climates. Superior insulating value blocks cold and keeps in the heat. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 180 Passive Solar with i89 Coating**
- The same superior performance as regular Low-E 180, but with the addition of i89 coating on the interior surface to increase insulating value. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Further customize your Westchester windows with tinted, patterned, obscure or other specialty glass. It’s a smart choice for privacy, security or just design preference.

**The Advantage of No-Metal Spacers.**

One of the technological advances that makes our Westchester windows perform so well are patented No-Metal TrueWarm® Edge spacers.

Many window manufacturers use aluminum spacers between their panes of glass. These conduct cold and heat, and that’s not good for thermal performance.

Our no-metal warm edge spacers are 100% polymer structural foam, for excellent thermal performance and a superior seal.

**Add Decorative Glass.**

*Available on select products.

- GlassEdge
- Obscure
- Rain
- Narrow Reed
- Specky Lite*
- Satin Clic
- White Laminated
- Bronze Tint
- Grey Tint
- Green Tint

Exterior Trim Profiles As Impressive As The Windows.

The Westchester exterior trim profile system comes in four available styles that snap in place on the frame with a clip system. No through-frame anchors or excessive nail holes, leaving you an integrated frame that gives homeowners the flexibility to choose the aesthetic they want.

Screens have an aluminum frame which matches the exterior clad color. You can choose your screen mesh, from standard fiberglass to the improved visibility and even smaller insect barrier of BetterVue® or UltraVue™.

Several Screen Choices

Hidden and beautifully simple, FlexScreen is the first screen of its kind made of flexible spring steel to fit firmly into screen tracks. No screen frames, no hardware, just refreshingly easy installation.
All materials in the production of Sierra Pacific windows and doors are highly valued and responsibly used. This includes the select wood that comes from over 2 million acres of forestland owned by our parent company, Sierra Pacific Industries. Thanks to advancements in “sustained yield” forest management and timber harvesting, we will nearly triple the amount of wood growing on our lands in the next 100 years.
