Subject: Conservation Board meeting today

[WARNING]: This email was sent from someone outside of the City of Burlington.

Hi Scott, Please add this email to their agenda for today. I want to strongly support the suggestions offered by Caryn Connolly in her email regarding the need to educate us(the Burlington residents) and also annually provide a tickler/ reminder via a postcard on how we all can help and do our part to address our changing climate. Caryn also mentioned reaching out to the schools and I would include UVM and Champlain. Since it is educational, one might hope this topic would find its ways on to Curriculum Cimmitees' agendas also.

People are so busy today , some of our good intentions fall by the wayside. A friendly reminder with some easy low cost suggestions would be appreciated by many. Thank you Scott and thank you Conservation Board for including this in your discussion.

Sharon Bushor
Ward 1 Resident
