

# The Champlain Parkway:

# Let's do it right!

**Please join us!** A panel and public discussion "Champlain Parkway: Let's Do it Right!" focuses on the project background, critiques the current design, and explores several alternate choices. The goal is to shape it right now and build a street we can all love. This needs to be a win-win for the neighborhoods, the city, and the environment.

**Panelists** include three Burlingtonians—former longtime Burlington Department of Public Works Director and City Engineer Steve Goodkind, P.E.; Transportation analyst Tony Redington, MPA; and architect Diane Gayer, AIA.

**Safe Streets Burlington** seeks a stop to the current design work, adding safety and connectivity improvements throughout the route, and insuring separate, safe walk and bicycle facilities. SSB desires changes while minimizing delay and costs to the \$43 million project. Information can be found on the SSB website: [safestreetsburlington.com](http://safestreetsburlington.com)

**For more information:** Diane Gayer, Vermont Design Institute: 802-355-2150 or [vtdesign@sover.net](mailto:vtdesign@sover.net)  
Tony Redington: 802-343-6616 or [TonyRVT99@gmail.com](mailto:TonyRVT99@gmail.com)

**Wednesday, February 3rd**

**Doors open & view materials: 6:30 pm**

**Presentations & Discussion: 7–9 pm**

**Arts Riot / 400 Pine Street, Burlington**

**Co-sponsors of the event include:**

Safe Streets Burlington (SSB),  
South End Alliance (SEA),  
Vermont Design Institute (VDI),  
Coalition for a Livable City (CLC)
