TEUC Meeting
April 27, 2021
Presentation Overview

- Project Overview
- Interchange Concepts
- Interchange Scoring & Recommendations
  - South Burlington City Council & Committees
  - I-89 Technical Committee
- Proposed I-89 Corridor Bundles
- Next Steps
2018 ECOS Plan Metropolitan Transportation Plan (MTP) Priorities

- 70% of Funding goes to System Preservation
- Concentrate growth in our Villages and Downtowns
  - 90% of HH growth in areas planned for growth
- Safety (HCL) Improvements
- TDM Programs
- Transit Service Enhancements
- Increases in walking/biking
- ITS Investments
- Capacity expansion only when needed

The strategies strike a balance between:
- Reducing congestion
- Fixing high-crash locations
- Enhancing walking, biking & transit
- Increasing livability by investing in areas planned for growth
MTP Outcomes – Meeting our transportation /land use/climate/energy goals

- The significant MTP investment in bike/ped, transit, and park & ride projects, if fully implemented, is estimated to have the following impacts on regional travel through 2050:
  - 2.4% decrease in Vehicle Miles Traveled (VMT)
  - 4.6% decrease in Vehicle Hours of Travel (VHT)
  - Increase in Non-Automobile Mode-Share from about 12% to 16%
  - 90% fleet electrification to meet the State's energy goal of having 90% of Vermont's energy needs provided by renewable sources by 2050
  - 77% Reduction in Fuel Consumption compared to 2015
Project Study Area

37 miles & 7 interchanges, arterials immediately adjacent to the interchanges.
Chittenden County I-89 2050 Study

Project Overview

Our schedule for successfully moving from project kick-off through stakeholder engagement and technical evaluations to develop a comprehensive, forward-looking plan for the I-89 corridor.

**Discovery**

**Task 1: Project Initiation & Kick-Off**
- May – June 2019
- Project initiation and kick-off meetings with Technical and Advisory Committees.
- Study area map, Committee meeting materials.
  - TC: 1 Meeting
  - AC: 1 Meeting

**Task 2: Analyze Current Conditions & Future Base**
- May – December 2019
- Existing conditions data collection, coordinate with resource agencies, and develop integrated modeling suite.
  - TC: 1 Meeting
  - AC: 1 Meeting

**Task 3: Corridor Vision & Goals**
- October 2019 – July 2020
- Articulate vision and goals for the corridor through input from Committees, Focus Groups, and the public. Develop 2035 and 2050 Build models. Existing conditions summary, calibrated 2035 and 2050 No build models, Committee meeting materials.
  - TC: 1 Meeting
  - AC: 1 Meeting
  - Up to 4
  - PM: Up to 3

**Task 4: Interchange Evaluation**
- June – April 2021
- Evaluate transportation and land use implications of new and/or improved interchanges.
  - TC: 1 Meeting
  - AC: 1 Meeting
  - Up to 4
  - PM: Up to 3

**Task 5: Alternatives Identification & Evaluation**
- Late Spring/Summer/Fall 2021
- Identify preliminary strategies for the corridor and evaluate three 2050 Build alternatives. Present results to Committees, Focus Groups, and the public. Corridor Vision & Goals, Vision & Goals graphic, meeting materials.
  - TC: 1 Meeting
  - AC: 1 Meeting
  - Up to 4
  - PM: Up to 3

**Task 6: Implementation Plan**
- Fall/Winter 2021/2022
- Identify preferred alternative with phasing recommended for 2035 and 2050. Preferred alternative evaluation matrix, implementation plan, meetings materials.
  - TC: 1 Meeting
  - AC: 1 Meeting

**Task 7: Final Report**
- Winter 2022
- Develop draft and final report.
  - TC: 1 Meeting
  - AC: Up to 3

**Activities**
- Technical Committee
- Advisory Committee
- Focus Groups
- Public Meeting/Workshop

**Deliverables**
- TC
- AC
- PM

**Meetings**
- TC
- AC
- PM

Current I-89 Vision & Goals

The 2050 Vision for the I-89 Corridor through Chittenden County is an interstate system (mainline and interchanges) that is safe, resilient, and provides for reliable and efficient movement of people and goods in support of state, regional, and municipal plans and goals.

- **Safety**: Enhance safety along the I-89 Study Corridor and Adjacent interchanges for all users.

- **Livable, Sustainable and Healthy Communities**: Promote compact growth that supports livable, affordable, vibrant, and healthy communities.

- **Mobility & Efficiency**: Improve the efficiency and reliability of the I-89 Corridor and Adjacent Interchanges for all users.

- **Environmental Stewardship & Resilience**: Establish a resilient I-89 Corridor that minimizes environmental impacts associated with the transportation system.

- **Economic Access & Vitality**: Improve economic access and vitality in Chittenden County.

- **System Preservation**: Preserve and improve the condition and performance of the I-89 Corridor

*There is significant uncertainty about long-lasting changes on where people will live and how they will travel in the future due to the COVID-19 pandemic, technology, demographics, and other dynamics. We recognize that the I-89 Vision, Goals, Objectives and implementation actions that will follow will need to be monitored and reassessed periodically to ensure that they address the evolving situation.*
Two Rounds of Interchange Evaluation

First Round of Interchanges Evaluated
1. Exit 10A – Bolton
2. Exit 12B – South Burlington
3. Exit 13 Full Interchange – South Burlington
4. Exit 13 U-Turn – South Burlington
5. Exit 13 Hybrid – South Burlington
6. Exit 14N – South Burlington
7. Exit 15 Full Interchange – Winooski
8. Exit 17N - Milton

Second Round of Interchanges Evaluated
- Exit 12B – South Burlington
- Exit 13 Hybrid – South Burlington
- Exit 13 SPDI – South Burlington
- Exit 14 Enhanced Cloverleaf – South Burlington
- Exit 14 DDI – South Burlington
Process after this study

There are likely to be three kinds of recommendations coming out of this study. Each will have a different implementation process. All projects must be included in CCRPC’s MTP and TIP if federal funding is required.

- Minor capital investments (shared-use paths, sidewalks, crosswalks, park and ride lots, technology, signage, lane or ramp changes, etc.) – These will follow the normal capital budgeting and implementation process of the responsible agency (VTrans or municipality).

- Operational investments (transit services, transportation demand management programs, etc.) – These will follow the normal operating budget process of the responsible agency (VTrans, GMT, or municipality).

- Major capital investments (Interchange or I-89 projects) – These will have to go through a NEPA process and it may require an Environmental Impact Statement (EIS).

The timing of the different types of investments will be included in Task 6 – Implementation Plan and include monitoring of conditions and triggers (what circumstances will trigger the need for improvements).
Interchange Concept

Plans
Second Round of Interchange Evaluation: Exit 12B

1. New Interchange
Interchange Evaluation: Exit 13

1. Hybrid + Bike Overpass
2. New Interchange: Single Point Urban Interchange
Interchange Evaluation: Exit 14

1. Diverging Diamond Interchange
2. Enhanced Cloverleaf
10' Shared Use Paths (Both Sides)

Reduce Radii at All Ramps to Slow Speeds & Enhance Bike/Ped Safety

New I-89 Overpass

Second Northbound On-Ramp Lane

New Collector/Distributor Lanes (NB & SB)
Second Round Interchange Evaluation Metrics – 1 of 2

**SAFETY GOAL:** Enhance safety along the I-89 Study Corridor and Adjacent Interchanges for all users
- Ramp Spacing
- Safety Impact
- Bike/Ped Safety

**LIVABLE, SUSTAINABLE, & HEALTHY COMMUNITIES GOAL:** Promote compact growth that supports livable, affordable, vibrant, and healthy communities.
- Consistent with Regional Plan
- ROW Impacts
- Environmental Justice / Underserved Populations
- How each Interchange Supports or Detracts from City Center

**MOBILITY & EFFICIENCY GOAL:** Improve the efficiency and reliability of the I-89 Corridor and Adjacent Interchanges for all users.
- Interchange Trips, VMT & VHT
- I-89 Corridor V/C
- Average Delay
- Bike/Ped Connectivity
- Effect of interchanges on volumes on selected roads
- Impacts to Exit 12 traffic
ENVIRONMENTAL STEWARDSHIP GOAL: Establish a resilient I-89 Corridor that minimizes environmental impacts associated with the transportation system.

- Wetland Impacts
- River Corridors
- Natural Habitats
- Fuel Consumption
- Change in Impervious Area
- Noise Impacts (High level)

ECONOMIC ACCESS GOAL: Improve economic access and vitality in Chittenden County.

- Connectivity to Areas Planned for Growth
- Job Access
- Impacts to Employment Opportunities
- Access to the Airport

SYSTEM PRESERVATION GOAL: Preserve and improve the condition and performance of the I-89 corridor.

- Asset Maintenance Cost
- Construction Cost
- Maintenance & Construction Cost
Interchange Evaluation
Matrix Overview
## Exits 12B & 13

### Evaluation Matrix Results

<table>

</thead>
<tbody>
<tr>
<td><strong>Exit 12B</strong></td>
<td></td>
</tr>
<tr>
<td>+ Largest % reduction in traffic at Exit 12 (-14%)</td>
<td>– Largest ROW impact (4 acres)</td>
</tr>
<tr>
<td>+ Largest % reduction in traffic on Williston Road east of Exit 14 (-15%)</td>
<td>– Greatest increase in impervious area (3.4 acres)</td>
</tr>
<tr>
<td>+ Potential for more, higher paying jobs resulting from interchange</td>
<td>– Largest % increase in traffic on VT 116 south of I-89 (+39%)</td>
</tr>
<tr>
<td><strong>Exit 13 Hybrid</strong></td>
<td></td>
</tr>
<tr>
<td>+ Lowest overall construction &amp; preservation cost ($106M)</td>
<td>– Left exit for I-189 U-turn movement not standard design</td>
</tr>
<tr>
<td>+ Provides new bike/ped connectivity across I-89</td>
<td></td>
</tr>
<tr>
<td><strong>Exit 13 Single Point Diamond Interchange</strong></td>
<td></td>
</tr>
<tr>
<td>+ Largest % reduction in traffic at Exit 14 (-13%)</td>
<td>– Largest % increase in traffic on Dorset Street south of I-89 (+33%)</td>
</tr>
<tr>
<td>+ Largest % reduction in traffic on Dorset Street at UMall (-17%)</td>
<td></td>
</tr>
<tr>
<td>+ Provides new bike/ped connectivity across I-89</td>
<td></td>

Alternative Comparisons

<table>
<thead>
<tr>
<th>Strengths</th>
<th>Weaknesses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exit 14 Enhanced Cloverleaf</td>
<td>- Much higher increase in impervious area (+4.8 acres)</td>
</tr>
<tr>
<td>+ Higher % decrease in anticipated crashes (-5%)</td>
<td>- Potential bike/ped conflicts at uncontrolled ramp entrances</td>
</tr>
<tr>
<td>+ Collector/Distributor lanes minimize weave/merge conflicts on I-89</td>
<td></td>
</tr>
<tr>
<td>+ Lowest overall construction &amp; preservation cost ($119M)</td>
<td></td>
</tr>
<tr>
<td>Exit 14 Diverging Diamond Interchange</td>
<td>- Lower overall capacity than Existing Conditions and Enhanced Cloverleaf</td>
</tr>
<tr>
<td>+ Provides fully signalized path for pedestrians &amp; cyclists to cross I-89 and Williston Road</td>
<td>- Results in 3-4% increase in traffic on parallel routes (Winooski Main Street, Limekiln Road)</td>
</tr>
<tr>
<td>+ Results in net reduction in impervious area (-0.5 acres)</td>
<td></td>
</tr>
</tbody>
</table>
Interchange

Recommendations to Date
Interchange Recommendations to Advance for further Evaluation

- South Burlington City Council (April 19th): Exit 12B

- South Burlington Committees:
  - Planning Commission: Exit 13 SPDI
  - South Burlington Energy Committee: Reconstruct Exit 13
  - Bicycle and Pedestrian Committee: Exit 13 SPDI & Exit 14 DDI
  - Economic Development Committee: Exit 12B

- I-89 Technical Committee (VTrans & Municipalities): Exit 13 SPDI
Moving Forward
Proposal & Next Steps
## Proposed I-89 Corridor Bundles for I-89 Advisory Committee’s Consideration

Next Steps

▪ Public Meeting: **April 29**

▪ Advisory Committee Meeting #5: **May 19**
  – Decision on Interchanges and Bundles

▪ Corridor Evaluation & Public/Stakeholder Involvement: **Summer/Fall 2021**
  – Includes identifying the need for I-89 widening

▪ Draft & Final Report: **Winter 2021/2022**
Thank you!
