Subject: please send to conservation board members

[WARNING]: This email was sent from someone outside of the City of Burlington.

Dear Conservation Board,

I spoke at your last Conservation Board meeting during the public comment period. I mentioned conservation burial as a possibility for the brownfields site on Pine St which is under consideration for development. As someone mentioned at the meeting (I couldn't see who it was) this would have to be pending review of site soil suitability, of course. If not the Pine Street site, perhaps there are other lands that the City already owns or might purchase that would be suitable for conservation burial. I wanted to follow up with a [short video](#) about conservation burial and how it has been an effective means for conserving land in the U.S.

My best regards,
Ruby Perry
