

Miro Weinberger, Mayor; Max Tracy, President City Council; Zoe Richards, Chair Conservation Board; Ben Traverse, Chair Parks Commission; Andy Montroll, Chair Planning Commission,

300 people have signed a petition on Action Network telling you to Conserve and Remediate the Pine Street Barge Canal.

Here is the petition they signed:

We ask that the City of Burlington (Mayor, City Council, relevant Boards and Commissions) work immediately toward conserving in the public domain, for the welfare of human and non-human residents, the land at 453 and 501 Pine Street. The entire Barge Canal site should become a park accessible to all and a laboratory for nature-based solutions to toxic post-industrial pollution.

You can view each petition signer and the comments they left you in the attached PDF.

Thank you,

Save Open Space-Burlington (SOS-B)

Not all development is good development. As a pro-more housing constituent who believes Russ Scully's plans to develop the parking lot is a wonderful idea (despite the fact that more traffic on Pine

Street will only further create traffic jams and frustrated drivers speeding through the school zone and speeding along Hayward because it's taking so long to get from downtown to Flynn) on this development idea I simply can't get behind it. Boardwalks. Natural remediation. Yes. This makes sense. Don't be stupid and dig up a super fund site.

62. John Cirignano (*ZIP code: 05401*)

63. Claudia Rose (*ZIP code: 05450*)

Nature knows best how to cleanse and heal this area of our unenlightened past. Let's add it to our commons with the commitment to return our land and lake to its pristine and healthy past.

Our children will thank us.

64. Carroll Albertson (*ZIP code: 05401*)

How about using the area for craft and garden sales? Leave as many trees as possible and use open space for parking. Add it to the Art Hop with art venders.

65. David Schein (*ZIP code: 05401*)

66. Joshua Dam (*ZIP code: 05401-4025*)

Please, no more development such as housing!

100. Louise Andrews (ZIP code: 05407)

101. Virginia Hobbs (ZIP code: 05401)

It is irresponsible to allow development of a superfund site.

102. Kim Marie Glynn (ZIP code: 05482)

103. Ray Gonda (ZIP code: 05403)

Lets get hop'n and use this property for something. This is as good as idea as any and better than most.

104. Alora Goodkind (ZIP code: 05408)

105. Gordon Clark (ZIP code: 05401)

We don't need more development in Burlington, we need to preserve the land we have left - and in the case of the Pine Street Barge Canal site, to heal it as well. Thanks for taking leadership to make this happen in our town!

106. Grace Smith (ZIP code: 05401)

107. Grace Per Lee (ZIP code: 05401)

If we keep developing Burlington's waterfront, pretty soon we'll lose the character that makes it special.

I love the idea of preserving the natural spaces we have.

108. Marie M Davis (ZIP code: 05401)

109. Larry Miller (ZIP code: 05401)

Preserve the land forever! It's a perfect place for a park.

110. Patricia Spaulding (ZIP code: 05401)

Even if this property were not a Superfund Site, it's time to start protecting our lakefront and making it accessible to the public. It's a shame to have lakefront property developed and marked with no

trespassing signs. Very basic principles of city planning begin with doing an inventory of all land to see every kind of feature: historical, social, natural, hazards, vistas, etc. Then you design accordingly. To put housing in a place like the Barge Canal would be the opposite of good planning. You begin with an exhaustive inventory and choose from that information, not the other way around.

111. Gregory Epler Wood (ZIP code: 05401)

Many years ago, before I knew its history or knew any better, I spoke to a City staffperson about bridging this land with an elevated Southern Connector. (Naive me.) But she said something to the effect, "Isn't it better to keep this land as greenspace with animals and plants?" So where is that person now that we need her?!?

112. Guy Derry (ZIP code: 05401)

It would be great to see a pedestrian-friendly tree park. Possibly with occasional light-footprint vending... such as farmers' stands or food trucks.

113. Hannah Leigh (ZIP code: 05401)

114. Olga Lopatina (ZIP code: 05401)

115. Heather Fitzgerald (ZIP code: 05401)

116. Holly Godfrey (ZIP code: 05401)

117. Jim Holway (ZIP code: 05408)

This may be an opportunity to flex Burlington's climate & environmental consciousness profile. Please demonstrate real leadership by keeping this among Burlington's natural spaces - Let's be creative in making this a top-side safe public use option while allowing nature to heal underneath.

119. Isaac Gittelsohn (ZIP code: 05403)

120. Emily Walter (ZIP code: 05401)

This land is toxic and unfit for building housing. It should remain untouched as wetlands are meant to be. Miro, you've already "made your mark". NO MORE DISASTERS PLEASE!

121. Jane Dunbar (ZIP code: 05401)

122. Janet Hicks (ZIP code: 05401)

Keep this land for the city and Continue to give back to the city residents rather than take away and sell off to private developers who do not have the residents interest. Do it now make it happen you destroying the very idea of a people's home. Keep it in a city trust for perpetuity. You are making a grave mistake which exposes your true interest.

145. roman kokodyniak (ZIP code: 05647)

I was a previous resident of Burlington and quite familiar with the Barge Canal as a serious super fund site.

Please let natural processes long term bring back health to this key part of Burlington and Lake Champlain.

Look towards the future. What will the people of the future want. More housing? More highways? I'm sure those people will have had enough of those things. They will be crowded in, and weary of development.

Think of the things that make the town good now. It's the empty, traffic free space of church street. It's the city parks. It's the wide open spaces of the waterfront with views of the Adirondacks. Rock point, red rocks, the beaches. We are glad that people of the past had the foresight to preserve and curate these spaces for us, their children and grandchildren and so on.

It would be wonderful to have a small nature park right in the middle of the city. It's already a wildlife corridor. I've seen foxes, rabbits, ducks, geese, bald eagles, possums and raccoons passing through here. It's not a good place for condos or a highway.

Remediation and preservation of this place is just one option. There are others, like expanded water

treatment. UVM is the school where John Todd developed “living machine” ecological water treatment. Though it would be a small scale operation, because they take a lot of acreage. But what better way to show the world that we are a green city than by using technology developed right here? One example of this already exists in the Veterans Memorial rest area outside of Sharon VT.

It seems like we mostly have a crisis of creative solutions, rather than scarcity and dire straits. Let's try something new. Healing the past and making a better future in the same project is my vote.

Thank you for taking the time to hear our ideas. Please think “what will Burlingtonians want 7 generations from now”.

Great idea. There could be a boardwalk

to keep people off the toxic land as they walk or bike. Also, could be a research station trying various plantings to heal industrial toxins. Could also be a site for school field trips to educate our students.

Please remediate and open to the public instead of developing. This could be a great park.

We need to use this space as a testament to mother nature. The healing that is going on now should be protected and shared. We, city people need a space to run wild among the rhysomes.

What a wonderful gift this would be to all the people of Burlington, and to the state of Vermont. Let's make this happen.

Pine Street Coalition/Vermont Racial Justice Alliance/Fortieth Burlington Champlain "RIGHTway" plan preserves a public space corridor and access with a sidewalk and separate, safe bikeway.

Conserve this precious place! In addition to the benefits of preserving it, developing it will likely lead to water management problems in the area

This will be good for the people of Burlington, and could be lasting legacy for you.

This is an excellent idea! It would fit with the work done on the bike path, and with efforts to more naturally control storm water.

Frankly traffic is so bad on Pine street that there should be no new development until the Champlain Parkway and Connector by the railroad go in. Sandra on Flynn Ave.
