The Contractor shall verify all information shown herein work be used from best available sources and may change without prior notice. Bids are subject to change subject to the Modification Engineers approval. The Contractor shall notify the City of Burlington Public Works Department prior to any application of materials or construction. The Contractor shall notify the City of Burlington Public Works Department prior to any application of materials or construction.

4. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public.

5. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public.

6. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public.

7. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public.

8. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public. The Contractor shall be responsible for ensuring that the dust created during the excavation of the construction project is confined and does not create an nuisance or safety hazard to the public.

**TREE PRUNING AND PROTECTION (AS DIRECTED BY RESIDENT ENGINEER)**

1. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

2. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

3. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

4. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

**TYPICAL CONCRETE SIDEWALK WITH CONCRETE CURB AND GRASS TURF BAND**

1. The Contractor shall be responsible for ensuring that the concrete sidewalk with concrete curb and grass turf band is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the concrete sidewalk with concrete curb and grass turf band is installed in accordance with the plans.

**TYPICAL PRECAST CONCRETE CATCH BASIN WITH CAST IRON GRATE**

1. The Contractor shall be responsible for ensuring that the precast concrete catch basin with cast iron grate is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the precast concrete catch basin with cast iron grate is installed in accordance with the plans.

**TYPICAL CONCRETE SIDEWALK AROUND DRIVEWAY**

1. The Contractor shall be responsible for ensuring that the concrete sidewalk around driveway is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the concrete sidewalk around driveway is installed in accordance with the plans.

**TYPICAL PRECAST CONCRETE CATCH BASIN WITH CAST IRON GRATE**

1. The Contractor shall be responsible for ensuring that the precast concrete catch basin with cast iron grate is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the precast concrete catch basin with cast iron grate is installed in accordance with the plans.

**TYPICAL STORM TRENCHES**

1. The Contractor shall be responsible for ensuring that the storm trenches are installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the storm trenches are installed in accordance with the plans.

**TYPICAL SECTION A CONCRETE SIDEWALK ACROSS DRIVEWAY**

1. The Contractor shall be responsible for ensuring that the concrete sidewalk across driveway is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the concrete sidewalk across driveway is installed in accordance with the plans.

**GENERAL CONSTRUCTION SPECIFICATIONS**

1. All work shall be in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

2. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

3. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

4. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

5. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

6. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

7. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

8. Tree Pruning shall be performed without damage or injury to the trees. The Contractor shall be responsible for ensuring that the trees are pruned in accordance with the Vermont Agency of Natural Resources (VARNR) guidelines for tree pruning.

**TYPICAL DRAINAGE PAVING**

1. The Contractor shall be responsible for ensuring that the drainage paving is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the drainage paving is installed in accordance with the plans.

**TYPICAL GRASS TURF BAND**

1. The Contractor shall be responsible for ensuring that the grass turf band is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the grass turf band is installed in accordance with the plans.

**TYPICAL CONCRETE CURBS**

1. The Contractor shall be responsible for ensuring that the concrete curbs are installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the concrete curbs are installed in accordance with the plans.

**TYPICAL BITUMINOUS CONCRETE DRIVEWAY APRON WITH SIDEWALK DETAIL**

1. The Contractor shall be responsible for ensuring that the bituminous concrete driveway apron with sidewalk detail is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the bituminous concrete driveway apron with sidewalk detail is installed in accordance with the plans.

**TYPICALoji INLET CASTING**

1. The Contractor shall be responsible for ensuring that the jeti inlet casting is installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the jeti inlet casting is installed in accordance with the plans.

**TYPICAL BREAKER PLANS**

1. The Contractor shall be responsible for ensuring that the breaker plans are installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the breaker plans are installed in accordance with the plans.

**TYPICAL STORM TRENCHES**

1. The Contractor shall be responsible for ensuring that the storm trenches are installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the storm trenches are installed in accordance with the plans.

**CONCEPT PLANS**

1. The Contractor shall be responsible for ensuring that the concept plans are installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the concept plans are installed in accordance with the plans.

**TYPICAL DETAILS & SPECIFICATIONS**

1. The Contractor shall be responsible for ensuring that the typical details & specifications are installed in accordance with the plans.

2. The Contractor shall be responsible for ensuring that the typical details & specifications are installed in accordance with the plans.
