NOTICE OF WORK

Date: 10/14/15

To: Residents

From: Laura Wheelock P.E.
Public Works Engineer

Subject: Shelburne St Roundabout – Utility Location Work

The Department of Public Works wants to provide residents with a notice of the upcoming work to be performed in the area of the Shelburne Street roundabout. The work will take place at night between the hours of 7PM and 6AM Monday through Saturday, starting Monday evening, October 19th and is expected to take 6 weeks. This work is being done to locate existing utilities and connections in the area of the roundabout and will consist of two activities.

The first activity will consist of using ground penetrating radar to identify underground utilities and estimate their depths. This activity will be relatively quiet.

The second activity will consist of excavations at approximately 100 selected sites to confirm utility depths and utility conflict points. This activity is expected to begin around October 28th and will generate a moderate amount of construction noise.

During both activities traffic patterns along Locus St., Shelburne St., South Willard St., St Paul St., and Ledge Rd. may be modified. Shelburne St. will be reduced to 2 lanes. Please follow the instructions of local traffic control measures and flaggers as required.

For more information please check the DPW website <https://www.burlingtonvt.gov/DPW>. Thank you for your cooperation. If you have any questions please contact Laura Wheelock at LWheelock@burlingtonvt.gov or 802-540-0397.
