Swap on-street parking for
buffered bike lanes on North
Avenue?

AN INTERIM PROJECT

A SAFER NORTH AVENUE

An interim (pilot) project is coming to North Avenue in 2016.

Why? To reduce crashes, calm traffic, make school travel safer, and give people walking, biking and driving equal opportunities on this shared route. We're currently planning for the areas with on-street parking and we value your input!

This project is a partnership between the City of Burlington and the North Avenue Task Force.
