Subject: South End Plan

I just spent time reviewing the plan BTV South End-my head is still spinning. I appreciate the constant request for public input, but have to admit I am a little overwhelmed. It is not clear to me in the document who I should address questions to, so I hope you will pass this one if you are not the proper person. I know this is a huge undertaking.

Actions are mixed in with dreams and ideas- Is there any "executive" study or one place we can reference that might list the activities that we can expect to see, i.e., sidewalks, bridge reconstruction, etc; then a list of activities the consultants/city recommend, then a list of ideas for further discussion?

The reference to the Blodget property states something like " while in transition". Has it been sold- what do we know about the use/future of that property?

I see the Mayor recently said he will not support a plan that includes housing- does this impact the proposal to build multi family housing on the city/school owned property behind Champlain school?

Thanks for all you work.
