RE: Consent Agenda Item: Lake Street Meter Changes

Recommendation
Staff recommends that the Commission adopt the following rate structure for the northern most 18 meters on Lake Street: $1.00 per hour for a maximum of three (3) hours from May 1st – October 31st & $0.40 per hour for up to ten (10) hours from November 1st – April 30th.

Purpose & Need
The purpose is to manage the on street parking spaces on Lake Street. The need is to increase metered space occupancy rates along Lake Street.

</tr>
</tbody>
</table>
Considerations

The rate structure for the Lake Street meters meets the recommendations of the December 2015 Downtown Parking and Transportation Management Plan. The Downtown Parking and Transportation Management Plan recommends seasonal rate adjustments on Burlington’s waterfront. In parallel with this, staff conducted occupancy car counts on metered spaces along Lake Street from College Street to the northern terminus of Lake Street; the data shows an average occupancy rate of 31% from College to the northern terminus of Lake Street; the Vehicle Loading Zones were not included in the data collection. Due to the Downtown Parking and Transportation Management Plan recommendations and the data collected, DPW staff is proposing to change meter rates along Lake Street for the northern most 18 meters on Lake Street. The meter rate will remain what currently exists; $1.00 per hour for a maximum of three (3) hours from May 1st – October 31st; however, rates would go down to $0.40 per hour for up to ten (10) hours from November 1st – April 30th. It is important to note, there are fifteen (15) metered spaces, one ADA Space, and two Vehicle Loading Zone spaces on Lake Street immediately north of College Street which will remain the same.

RE: Consent Agenda Item: Lake Street Extension Kiosks

Recommendation
Staff recommends the Commission approve the installation of parking kiosks at the Lake Street Extension Lot to manage the 94 parking spaces created which include six (6) ADA (Americans with Disabilities Act) Accessible spaces.

Staff recommends the Commission adopt the following rate structure for the Lake Street Extension Lot: $1.00 per hour for a maximum of three (3) hours from May 1st – October 31st & $0.40 per hour for up to ten (10) hours from November 1st – April 30th.

Once Lake Street Extension is accepted and dedicated as public Right of Way (ROW), the parking will no longer be considered a lot, but on-street parking; consequently, Staff recommends the Commission approve the parking kiosks on Lake Street Extension to manage the 94 parking spaces created which include six (6) ADA (Americans with Disabilities Act) Accessible spaces.

Once Lake Street Extension is accepted and dedicated as public Right of Way (ROW), Staff recommends the Commission adopt the following rate structure for Lake Street Extension: $1.00 per hour for a maximum of three (3) hours from May 1st – October 31st & $0.40 per hour for up to ten (10) hours from November 1st – April 30th.

Purpose & Need
The purpose is to manage the parking spaces created by the development of Lake Street Extension Lot, and Lake Street Extension once it becomes accepted into the public ROW. The need is to regulate the parking spaces in the Lake Street Extension Lot and create turn over to insure everyone has access to the space.

Considerations
The Lake Street Extension Lot is a City of Burlington municipal lot. The rate structure and installation of kiosks at the Lake Street Extension Lot meets the recommendations of the December 2015 Downtown Parking and Transportation Management Plan, “Build new parking capacity and/or new development along the waterfront...”. Additionally, the Downtown Parking and Transportation Management Plan recommends seasonal rates for parking on Burlington’s waterfront. Since the Lake Street Extension Lot was constructed in 2016, parking has been unregulated and long-term parking has been difficult to enforce.

Public Outreach
Public outreach regarding this proposal received mixed feedback, with concerns raised by The Community Sailing Center Staff; The Community Sailing Center is concerned about the costs involved at the Lake Street Extension Lot since they have a large volunteer staff and have received free parking in the past. City Staff have informed the Community Sailing Center throughout their project development the Lake Street Extension Lot would be metered.

Conclusion
While paid parking will be a change for the sailing center, off-street parking is available at the Sailing Center site and paid public parking follows the City’s established policies. It is important to note; the Lake Street Extension Lot is currently a parcel so staff need Commission approval for this parking to be regulated as a parking lot. Once Lake Street Extension is accepted and dedicated as public Right of Way in the future, the parking will no longer be considered a lot, but on-street parking. Therefore, staff recommends the Commission approve the installation of parking kiosks at the Lake Street Extension Lot to manage the 94 parking spaces created which include six (6) ADA (Americans with Disabilities Act) spaces. Additionally, staff recommends the Commission adopt the following rate structure for the Lake Street Extension Lot: $1.00 per hour for a maximum of three (3) hours from May 1st – October 31st & $0.40 per hour for up to ten (10) hours from November 1st – April 30th.

Attachments:
1. Site map
This memorandum has been prepared in response to a request from City of Burlington Planning Department staff to provide additional supporting information related to the Burlington Community Sailing Center’s (CSC’s) parking waiver request, as well as details related to auto and bus drop-off plans. Specifically, this memorandum addresses the following three items requested in an August 21, 2017 memorandum from Scott Gustin:

1. A forward-looking parking management plan to demonstrate that the 9 proposed spaces are justified for continuing use of the sailing center in the future.

2. The parking management plan relies on safe drop-off. Show a safe and efficient drop-off area on the proposed site plan.

3. Demonstrate how school buses picking up and dropping off students will circulate through the site.

Forward-Looking Parking Management Plan

The first item requested by Planning Department staff involves laying out a forward-looking parking management plan to demonstrate that the 9 proposed spaces are justified for continuing use of the sailing center in the future.

For over 20 years, the CSC has functioned successfully with direct access to only 18 shared public parking spaces adjacent to the fishing pier. This limited, first-come, first-served approach to the provision of parking has "trained" CSC employees and patrons to find other ways to get to the Center, including carpooling, walking, cycling, or riding a bus. Maintaining a relatively small supply of on-site parking will likely be the strongest driver for reducing overall parking demand.

Overbuilding parking can often lead to an increase in parking demand – as well as related adverse impacts including increased stormwater run-off, decreased green space, and increased property and resource impacts. Given the CSC’s sensitive location on the waterfront, the presence of nearly 100 public parking spaces along Lake Street Extension, the relative ease of accessing the site by foot or on bike, and a reluctance to overbuild parking based on approximate zoning calculations, the CSC has requested an 81% parking waiver to provide 9 spaces on site. Additionally, the new CSC facility has a smaller boat storage yard than the current CSC facility uses.

Strategies that the CSC will use to reduce or manage the demand for parking into the future include the following:

- As part of their Sustainable Campus Initiative, the CSC will continue to educate and strongly encourage employees and patrons to use alternative transportation modes (i.e. carpool, walk, bike, bus).

- The CSC will explore becoming a member of the Chittenden Area Transportation Management Association (CATMA) and designating a staff person to serve as an on-site Employee Transportation Coordinator to leverage the benefits of CATMA membership for employees and patrons.
The CSC will allocate one or two "carpool only" spaces on-site to incentivize carpooling by employees and patrons. The CSC should observe utilization and adjust the number of carpool spaces up or down accordingly to optimize use.

The CSC will provide bicycle parking to accommodate approximately 20 bicycles on site. This exceeds the amount of short-term bicycle parking called for in Table 8.2.5-1 in the Comprehensive Development Ordinance.

The CSC may direct staff to park off-site if needed to accommodate patron parking on-site.

Safe & Efficient Vehicular Drop-Off Plan

The second item requested by Planning Department staff is for the CSC to show a safe and efficient drop-off area on the proposed site plan.

**Figure 1** below shows the proposed CSC (at right) in context with the skate park, Mcran Plant, and adjacent uses. The red line in Figure 1 shows the typical arrival path for an automobile drop-off trip. The intent is for a portion of the drop-off and pick-up trips to pull into one of the 9 on-site spaces, discharge or pick up their passenger(s), and then exit along the same route used to enter. The remaining drop-off and pick-up trips would be accommodated within the head-in public parking located immediately adjacent to the CSC on Lake Street Extension. This arrangement is similar to the shared public/private vehicle accommodations provided during drop-off and pick-up at both Edmunds and Champlain Elementary Schools (both of which abut much busier streets). The drive aisle proposed within the CSC site adjacent to the head-in parking spaces is 20 feet wide, which is more than sufficient to accommodate a pull-in and back-out maneuver by a passenger vehicle.
Bus Drop-Off and Circulation Plan

The third item requested by Planning Department staff is for the CSC to demonstrate how school buses picking up and dropping off students will circulate through the site.

Figure 1 shows the school bus drop-off and pick-up route as a blue line. As is currently the practice today, the school buses drop-off and pick-up students in the boat launch parking area where the students are met by a CSC staff member and escorted to the CSC. Unlike current conditions, where staff walk children along the road between the BED and Water Department buildings, the location of the new site will allow the CSC staff to use marked crosswalks and the bike path to more safely get children between their buses and the CSC.

The CSC anticipates at most two school buses servicing the Center on a given day, with a maximum of four buses per week and a total of 8-10 buses per season, which runs from May 1 to June 15 and from Labor Day to October 15. Historically, all of the students from Burlington schools (which represents about ¾ of the educational program) have walked, biked or were carpooled to the CSC.

FROM: Phillip Peterson, DPW Engineer Technician
CC: Nicole Losch PTP, Senior Transportation Planner
RE: Consent Agenda Item: ADA (Americans with Disabilities Act) Accessible Spaces and Vehicle Loading Zones on Saint Paul Street

May 10, 2018

Recommendation:
Staff recommends the Commission approve:
1. No parking except vehicles loading or unloading.
   No person shall park a vehicle at the following locations unless engaged in loading or unloading the vehicle:
   (7) In the first space south of Main Street on the east side of St. Paul Street extending for twenty (20) feet for a maximum time limit of thirty (30) minutes.
   (13) In the second space south of Main Street on the east side of St. Paul Street extending for forty (40) feet, between the hours of 7:00 a.m. and 11:00 a.m., for a maximum time limit of thirty (30) minutes.
   (22) In the first space south of King Street on the west side of St. Paul Street extending for twenty (20) feet, between the hours of 7:00 a.m. and 5:00 p.m., for a maximum time limit of thirty (30) minutes.

2. Accessible spaces designated.
   No person shall park any vehicle at any time in the following locations, except automobiles displaying special handicapped license plates issued pursuant to 18 V.S.A. § 1325, or any amendment or renumbering thereof:
   (75) On the east side of St Paul Street, in the fourth space north of Maple Street.
   (80) On the west side of St Paul Street, in the fifth space south of King Street.
   (89) On the north side of King Street, in the first and second spaces east of St. Paul Street.

3. Accessible spaces removed.
   No person shall park any vehicle at any time in the following locations, except automobiles displaying special handicapped license plates issued pursuant to 18 V.S.A. § 1325, or any amendment or renumbering thereof:
   (26) The first space east of St. Paul Street on the north side of Maple Street.
Purpose & Need:
The purpose of this request is to maintain the appropriate number of loading zones on St Paul Street between Main Street and Maple Street after construction is completed. The need is to provide local businesses with areas to load and unload. The purpose of the ADA spaces is to provide accessible parking as recommended by the Public Rights-of-Way Accessibility Guidelines (PROWAG). The need for accessible parking in this location will be close to several businesses which would benefit the disabled community in this area.

</tr>
</tbody>
</table>

Summary and Conclusion:
During the planning phase for the 2018 construction project on St Paul Street between Main Street and Maple Street, a need to maintain existing loading zones and ADA (Americans with Disabilities Act) spaces on St Paul Street was established by staff. Due to this, DPW Staff are recommending traffic regulation amendments for vehicle loading zones and Accessible Spaces. These loading zones and ADA spaces would benefit several local residents and businesses.

Public Outreach:

RE: Consent Agenda Item: Intervale Avenue “No-Parking” Zone

Recommendation:
Staff recommends that the Commission adopt

1. No person shall park a vehicle at the following locations: On the west side of Intervale Avenue between the driveways of 171 Intervale Avenue and 177 Intervale Avenue, between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday.

Purpose & Need:
The purpose of a time dependent “No-Parking” zone in this area would allow trucks to make deliveries to CED Inner City Supply, Electrical Wholesaler. The need is to prevent dangerous situations due to the trucks entering and exiting CED Inner City Supply, Electrical Wholesaler during normal work hours.

Project Checklist:

<table>
<thead>
<tr>
<th>Aligns with MUTCD standards and/or established City Policy?</th>
<th>N/A</th>
<th>Yes</th>
<th>No</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aligns with City plans?</td>
<td>X</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Followed Public Engagement Plan?</td>
<td>X</td>
<td></td>
<td></td>
<td>This project falls under INVOLVE on the Spectrum of Engagement and minimum engagement strategies were met.</td>
</tr>
</tbody>
</table>

Summary and Conclusion:
The Department of Public Works (DPW) received a request from CED Inner City Supply (Electrical Wholesaler) to create a “No-Parking” zone on Intervale Avenue due to truck deliveries. CED Inner City Supply believes there is not enough space for larger trucks exiting their facility to turn onto Intervale Avenue. Staff conducted a site survey and turning template analysis, which confirmed the need for a “No-Parking” zone in this area. The configuration of the CED warehouse prevents trucks from exiting
onto Archibald Street, and the turning template shows that trucks exiting cannot make the turn onto Intervale Avenue with vehicles parked between the driveways of 171 Intervale Avenue and 177 Intervale Avenue. Therefore, staff recommend the “No-Parking” zone be on the west side of Intervale Avenue between the driveways of 171 Intervale Avenue and 177 Intervale Avenue, between the hours of 8:00 a.m. and 5:00 p.m. Monday through Friday.

Public Outreach:
Public outreach was conducted in accordance with the DPW Public Engagement Plan. There was no feedback received by DPW Staff.

RE: Consent Agenda Item: Pearl Street “Motorcycle Parking” Zone

Recommendation:
Staff recommends the Commission adopt

26 **No-parking areas.** The following locations are designated for the parking of motorcycles only:

14. On the south side of Pearl Street between the driveways of 177 and 175 Pearl Street.

Purpose & Need:
The purpose is to utilize the space near the driveways of 175 Pearl Street and 177 Pearl Street. The need is to prevent a dangerous situation by not allowing standard vehicles to park in the space. DPW Staff would like to maintain reasonable access for the businesses utilizing these driveways, while still allowing the space to be utilized for motorcycle parking.

</tbody>
</table>

Summary and Conclusion:
The Department of Public Works (DPW) received a request from the Burlington City Attorney’s Office to investigate a parking space near 177 Pearl Street. The Attorney’s Office is concerned there is not enough space to park a standard vehicle and there is a lack of signage letting people know this; consequently,
people are parking in the space and this can create a dangerous situation or they can receive a large Driveway Encroachment Violation ticket without any notification. Staff did a site investigation and confirmed the City Attorney’s concerns; however, upon further analysis motorcycle parking in the space will work. Staff recommends the Commission adopt the following location is designated for the parking of motorcycles only: On the south side of Pearl Street between the driveways of 177 and 175 Pearl Street.

Attachments:
1. Initial request
2. Site map
Hi Phillip,

The ticket was dismissed because the person who wrote the ticket was not available to testify. I was not asking for someone at DPW to weigh in on whether this could have been a parking violation.

What I am saying is that Steve is going to continue parking there and that, perhaps, the spot needs to be designated as a no parking space if the distance between the driveway and the path is less than approximately 19’. Someone needs to go and measure the space.

Thanks,

Anthea

Anthea Dexter-Cooper
Assistant City Attorney

Anthea,

If he is parking in the street right there, it seems as though he is parking within the driveway apron. Consequently, it appears to be a driveway encroachment violation and the ticket did not need to be dismissed.

Phillip Peterson, Engineering Technician
Burlington Department of Public Works

Gene and I spent some time with Google Maps and we think Steve was parked in approximately the red rectangle on the attached.

Anthea Dexter-Cooper
Assistant City Attorney

Hi Phillip,

I do not know if this is something that falls under your purview, but someone at DPW needs to take a look at a space on Pearl Street. Steve Goodkind was ticketed for parking in the space, and the City took the position that he had parked in a prohibited space because it was too close to driveways. It is hard to tell where the space in question is from the photographs (attached), and I just traveled all of Pearl Street and am still not sure where it is. My best guess is towards the top of Church Street, on the south side of the street. In one of the photographs you can see what looks like UVM in the distance.

The officer who wrote the ticket is no longer employed by the City (left the state), so I dismissed the ticket. In response, Steve dropped off the attached memorandum, which indicates that he believes the space is at least 20 feet long, and his car is only 15 feet long. If that is the case then he can park within the space without being within two feet of either driveway. If he is correct, and the spot is not otherwise designated “no parking” in Appendix C and there is just a sign missing, then we are going to need to treat that as a legal parking space for small vehicles until it is designated otherwise and marked. If DPW
determines that it is dangerous for cars to park in this space (e.g. problems with lines of sight) then we should take the necessary steps to get that changed in Appendix C.

Steve also indicated that he is going to continue parking in the space. If the space is in fact more than 19 feet long then this office will have to dismiss any tickets Steve gets for parking in that space.

I’m cc’ing Chapin and Norm since I’m not sure this is something you’re responsible for and John King so that BPD stays in the loop on this. I think the first step is to figure out where the space in question actually is (and if it is already designated “no parking”) and then get an accurate measurement of the space between the two driveways.

Thanks,

Anthea

Anthea Dexter-Cooper
MEMO: ANTHEA DEXTER-COOPER, Asst. City Attorney
FROM: STEVEN GOODKIND
4/5/18
RE: TICKET # 5201302804

I have received your April 3, 2018 letter notifying me of the dismissal of this ticket. While this will save me the time of appearing in court, I have mixed feelings about it. I was not illegally parked when the ticket was issued, however your letter ends with a warning for I violation that I did not commit.

This ticket was not issued in conformance with the written policy of the Departments of DPW and Police. That policy (see attached) says that “Encroachment tickets will only be investigated upon receipt of a complaint”. There was no complaint. There never should have been a ticket.

Whatever investigation was conducted did not take any measurements in accordance with the diagrams shown in the policy document. If they had, they would have determined that my car was indeed more that 2 feet from either driveway.

The space between the driveways is at least 20 feet. I know this because the design and construction of the space were undertaken by DPW at the time I was City Engineer and DPW Director. My car, a 2010 Kia Forte, is 180" or 15 feet long. It will easily fit into the 20 foot space. I frequently park in the space and make sure that I am 2 feet from the easterly of the two driveways. That leaves at least 3 feet from the other driveway. I was completely legal! (I have pictures.)

Hopefully the city will act within the law the next time I park in this space, which I intend to do, and will refrain from issuing unwarranted tickets.
DRIVEWAY ENCROACHMENT IS NOW ILLEGAL IN BURLINGTON!

What is Driveway Encroachment? Driveway Encroachment is when a vehicle is parked too close to a driveway making it difficult to get in and out of the driveway. The City considers a vehicle to be parked too close to a driveway when any part of the vehicle is within 2 feet of a driveway as measured from the straight-line edge of a driveway.

When and where is this in effect? Driveway Encroachment will be a ticketable offense beginning on October 19, 2016 and will apply to all driveways within the Burlington city limits 24 hours a day, 7 days a week.

How much is the ticket? Tickets will be issued at $75 for each offense. Encroachment incidents will only be investigated upon the receipt of a complaint.

How do I report a vehicle parked too close to my driveway? Call Burlington Police, Civil Parking Enforcement at (802) 540-2380. During off hours call (802) 658-2704 Ext 0.

Anything else I need to know? As always, it's a ticketable AND towable offense to actually block a driveway. You are blocking a driveway if your car crosses over the straight-line edge of a driveway.

DATE: May 10, 2018

Request
We are respectfully requesting the DPW Commission approve the following motion: To recommend the City Council approve the conceptual designs for improvements to Bank Street (between Church and Pine Streets) and Cherry Street (between Church and Battery Streets) as presented on May 16, 2018.

Summary
As part of Burlington’s ongoing effort to reinvest in our downtown, in 2016, Burlington voters approved $22M in Tax Increment Financing (TIF) for purchasing the reconstructed St. Paul and Pine Streets and improvements to Cherry and Bank Streets. BTC Mall Associates LLC, developer of CityPlace Burlington (CPB), will be designing and constructing the new segments of St. Paul and Pine Streets prior to the City’s dedication and acceptance of these streets. The City is developing the designs for Bank and Cherry Streets using the Great Streets Standards for Burlington’s Downtown. This is about place, space and designing a downtown for all Burlingtonians. The City developed conceptual designs for Bank and Cherry Streets during April of 2018 and began our public engagement process.

In response to the comments received at various public meetings, including the last DPW Commission and Transportation, Energy & Utilities Committee (TEUC) meetings, we have
revised the concept for these two streets and will present to the DPW Commission and the TEUC at their respective May 16, 2018 meetings. We will seek support from the DPW Commission and sponsorship from the TEUC for the conceptual plan to bring it to the City Council on May 21, 2018 where we will seek to have the plan adopted.

City staff will provide the revised concepts at the upcoming Commission and TEUC meetings. Additionally, revised plans will be available on the project’s website by at least May 16, 2018 for public viewing.

**Project Background**

The Development Agreement (DA) between the City and CPB has the City responsible for developing 30% designs for Bank and Cherry Streets by June 30, 2018. To complete this work, the City conducted an RFP process in the fall and winter of 2017 and selected Stantec as the design consultant. The City and Stantec kicked off the design process for Bank and Cherry Streets in early 2018.

The design for Bank and Cherry Streets utilizes the Great Streets Design Standards for Burlington’s Downtown to generate the goals for the project and the base concept. The primary goals for the streets are:

- Walkable and bikeable — safe for all modes and all levels of accessibility
- Sustainable — both environmentally sustainable, and long-lasting
- Vibrant — to support the downtown’s diverse range of public and private activities
- Functional — work for all users, flexible, can be maintained, affordable

To balance the use within the public right of way among all users (pedestrians, motor vehicles, transit vehicles, bicycles, delivery vehicles, utilities, etc.), the base concept will use the cross sections below for allocation of roadway and pedestrian zones.

**Cherry Street**

**Bank Street**

A quick look at the design plans above may seem similar to the streets as they are today, but the current concept plans make the following notable changes that come through from the Standards:

**Infrastructure Under Street**
• Bury the overhead utilities on Bank Street between St Paul and Pine Streets (to allow for bigger healthier trees and a cleaner look)
• Renew or rehabilitate the water and wastewater infrastructure on both streets
• Add a separate stormwater line under Cherry Street to connect to College Street outfall
• Install either soil cells or other optimum growing medium for the street trees

Streetscape
• Provide permeable pavers in greenbelt to take stormwater from sidewalk and treebelt to feed the trees
• Utilize granite curbs that will have a longer life than concrete and improved aesthetic
• Add bump outs that will narrow pedestrian crossings and add planting / activation areas
• Install new lighting fixtures consistent with BED design standards and meet current lighting standards for both the sidewalk and the street
• Add amenities along the streets based on input from these public meetings

Public Input & Plan Revisions

Our outreach to the community has included several public meetings (see list below) as well as a webpage, online comments, Front Porch Forum post, social media, outreach to property owners and businesses, handouts with basic info for webpage at most NPAs including all Wards Steering Committee meeting, and CEDO’s Neighborhood Buzz.

• May 1, 2018 - Transportation, Energy and Utilities Committee (TEUC) presentation
• April 18, 2018 - Public Works Commission Presentation
• April 11, 2018 - Public Meeting on Bank and Cherry Street Design Concepts
• April 10, 2018 - Public Meeting on Bank and Cherry Street Design Concepts
• March 27, 2018 – TEUC -Introduction of the base Bank and Cherry Street design concepts

In addition, we have the following upcoming Public meetings:
• May 16, 2018 - Transportation, Energy and Utilities Committee, approval and recommendation to City Council of conceptual design, 5:00PM at 645 Pine Street
• May 16, 2018 - Public Works Commission Presentation, approval and recommendation, 6:30PM at 645 Pine Street
• May 21, 2018 - City Council, presentation and approval of conceptual design

Through the public outreach, we received several comments on the conceptual plans at the two public meetings, through the website comment portal, and directly to DPW and CEDO. All comments received to date have been posted on the project’s website – links are included below. Comments received ranged from the street furnishings, to intersection alignments, to use of the pedestrian and roadways zones.

The project team has received many comments about the type of bike facilities and creating additional pedestrian orientated space in the Concept Plan on both Bank and Cherry Street as presented in April. The Concept Plan, per the planBTV Walk Bike, utilized shared lanes for bike facilities on these two streets, and identified Pearl Street and Main Street as streets for dedicated, separated bike facilities as the east west corridors in the Downtown. Unlike Pearl and Main Streets, Bank and Cherry Streets are relatively short (3 to 4 blocks) and have limited east/west connections. PlanBTV Walk Bike prioritizes pedestrian safety on Cherry and Bank Streets, where people commented on difficult intersections to cross.
In response to the comments received, the City and the design consultant explored additional options to accommodate the diverse uses within the City’s narrow downtown rights-of-way. On Bank Street in particular, we determined that there is an exciting opportunity to use an innovative design approach – a curbless street – that gives the City great flexibility while bringing a strong aesthetic and pedestrian-centered approach to the public realm. A curbless street, similar to a Shared Street, will still provide distinction between the pedestrian zone and roadway zone as outlined in the Standards. The benefit of moving to a curbless street is that it prioritizes the pedestrian in these corridors while allowing vehicle travel and parking. Typically, a street in this configuration will result in very slow vehicle travel speeds – consistent with the planBTV Walk Bike recommendation for shared travel lanes for bicycles and vehicles. The street will use vertical elements such as tree wells, bollards, light poles to help define the space between the roadway zone and pedestrian zone. There will also be materials within the road to define spaces between travel ways, parking, tree belt, and clear sidewalk. A curbless street will also provide increased flexibility of space for adjacent businesses and their potential future use of the space, space for other civic events, or rearrangement of elements to proportion the space between the roadway and pedestrian zone.

The move to a curbless street on Bank Street also helps with the bike/pedestrian connectivity on the west end of the street with the existing multi-use path that runs between the People’s United building and former Macy’s building. This path connects to both Battery Street between the Hilton and Westlake Condos; as well as onto Cherry Street between Hotel VT and the former Macy’s Building.

Other changes that were made to the concept prioritize pedestrians on Cherry Street include raised intersections at St. Paul and Pine Streets, as well as upgraded and additional mid-block crossings, rearrangement of some of the furnishings, spaces designated throughout the plan set for parklets both public and private, and transit facilities.

**Conclusion**
The project team recently completed a public outreach period for this Cherry and Bank Streets project, and we have incorporated many of the comments into the concept plans. As such, staff is confident in the concept plans as developed and are set to bring to the DPW Commission and TEUC on May 16, 2018 and the City Council for approval on May 21, 2018.

This timeline will enable the City to maintain the schedule per the Development Agreement of October 2017, where the City is required to provide 30% design plans to CPB by June 30, 2018. City Council approval on May 21, 2018 of the conceptual designs is important, so our designers may complete the 30% designs by the deadline. The 30% designs will have additional level of detail particularly regarding the improvements that take place underground as well as developing an initial estimate to ensure that the designs are within the general budget set out by the November 2016 vote on TIF funding.

</table>
| 10 | Tech Services, CIO, Code, P&Z  
Implement permit reform recommendations | ✓ ✓ ✓  | Improve trades permitting process with automation, streamlining process, customer service training and one-stop permitting. |
| 11 | Tech Services, Water Res.  
Develop engineering standards | ✓ ✓ | Contract out development of City engineering standards, specifications that will efficiently direct future investments. Build off of downtown's Great Streets Standards.  
Recommend adoption of standards to Council |
| 12 | Tech Services, Water Resources  
Advance high priority capital projects in accordance with project schedules | ✓ | High priority projects (Champlain Parkway, Downtown Great Streets, PlanBTV Walk/Bike implementation) advance on schedule.  
Projects advance according to project schedules. Annually budgeted capital projects completed.  
Recommend Council place bond item on March 2019 ballot.  
Review final Integrated Plan |
| 13 | Traffic  
Implement comprehensive upgrade to garage operations including an enhanced PARCS system | ✓ ✓ ✓  | New PARCS system allows for improved garage operations.  
Review and approve new lease and rate changes  
New PARCS system installed, new job descriptions approved, new dynamic signage running, new validation and lease options, net revenue growing YtY.  
Recommend Council adopt necessary ordinance changes. |
| 14 | Traffic, Water Resources, CT office, Schools  
Improve cost allocations between DPW and other departments (ie. have Water credited for fire protection service, contain growth of PILOT payments, end payment for parking enforcement, transfer crossing guard program to schools) | ✓ | More appropriate cost allocations between departments / funds. Would enable Traffic and Water divisions to better reinvest in their aging systems.  
Review proposed rate structure, recommend to Council  
Recommend Council place bond item on March 2019 ballot.  
Monitor policy and understand cost impact |
| 15 | Water Resources  
Secure borrowing for upcoming Wastewater capital work in 2019. | ✓ | After completion of capital planning, we are preparing to borrow for $8-10M of plant upgrades and $3-5M of pipe upgrades.  
Obtain reasonable WWTP discharge permits in early FY'19. Continue optimization efforts to help us maintain compliance.  
Review proposed rate structure, recommend to Council |
| 16 | Water Resources  
Complete & begin implementing Integrated Water Quality Management Plan -- outlining how City will meet its various Clean Water Act regulatory obligations and its local water quality priorities. | ✓ ✓ | Metrics: Obtain SRF funding, complete interim project milestones such as: wet weather/stormwater master plan, selection of high priority projects, completion of financial capability analysis.  
Review final Integrated Plan |
| 17 | Water Resources  
Project and establish sustainable rate structure for Water, Wastewater and Stormwater | ✓ ✓ ✓  | Develop a multi-year rate structure that will balance future budgets while accomplishing the division's goals.  
Review proposed rate structure, recommend to Council |
| 18 | Water Resources  
Comply with TMDL (Total Maximum Daily Load) regulations -- and continue to be actively involved in state wide policy related to Clean Water. | ✓ ✓ | Obtain reasonable WWTP discharge permits in early FY’19. Continue optimization efforts to help us maintain compliance.  
Monitor policy and understand cost impact |
| 19 | Water Resources  
Strengthen billing and revenue assurance programs | ✓ ✓ ✓  | Hire consultant to recommend priority actions to simplify and strengthen our internal controls and implement recommendations.  
Revisit billing system to have monthly base charge instead of minimum consumption charge if recommended by consultant.  
Recommend Council adopt necessary ordinance changes. |

Our Mission: To steward Burlington's infrastructure and environment by providing efficient, effective and equitable public services
DRAFT FY’19 KEY INITIATIVES:
The Department’s proposed key initiatives for FY’19 are attached for your review. These key initiatives have guided the budget development for the coming fiscal year. In some years, the Commission has voted to accept the initiatives, some years the Commission has chosen to simply provide input. We will notice possible action on this item should the Commission want to vote to accept these key initiatives for FY’19.

PROPOSED FY’19 BUDGET:
The draft presentation for our proposed FY’19 DPW General Fund budget is attached. The presentation highlights the major goals of this year’s budget and the key drivers on revenue and expenses. For the Commission’s awareness, we are proposing to increase the Solid Waste Generation Tax that funds our municipal recycling program from $3.70/month to $4.20/month due to the increasing tip fees at the CSWD Material Recovery Facility driven by the soft commodities market for mixed paper. The department will be presenting our proposed budgets to the City Council on the following days:
- May 17, 5pm: DPW General Fund Budget
- May 24, 5pm: DPW Water, Traffic and Capital Budgets

CHAMPLAIN PARKWAY RIGHT-OF-WAY PROCESS
As a reminder again this month, the Champlain Parkway is continuing through the Right-Of-Way process where we are collaborating with VTrans to acquire the rights necessary to construct the project. There are a total of 50 properties where temporary or permanent rights need to be acquired for the construction of the Champlain Parkway. VTrans is leading the acquisition effort and has sent offers to all of these property owners. As of four weeks ago, they had secured the rights for over 27 properties. Of the remaining 23 properties, 13 require only temporary rights to be secured for the construction phase. At the City Council’s April 16 meeting, they voted to convene a site visit and Necessity Hearing for May 21. The site visit will depart City Hall by bus at 5:30pm and the Necessity Hearing will follow as part of the City Council meeting at 7pm. More information is on the project’s website: www.champlainparkway.com.

2018 CONSTRUCTION SEASON:
We are fully underway in the second season of carrying out the City’s Sustainable Infrastructure Plan – funded in significant part by the voter-approved bonds in November 2016. We provided an overview of the season’s activities to the City Council at their April 30, 2018 meeting. The presentation is attached for your review. More information can be found on our construction portal: https://www.burlingtonvt.gov/construction. Thank you to the public for their patience as we upgrade the City’s essential infrastructure.
WINOOSKI AVENUE TRANSPORTATION STUDY:
The first public meeting on the Winooski Avenue Transportation Study took place on May 2. This is a transportation corridor study of the entire Winooski Avenue corridor as the City of Burlington looks to create multimodal, Complete Street routes throughout the city. The final product will be an implementation plan with recommendations to address safety, capacity, and connectivity for all modes of transportation along this important north-south connection. The study area is along Winooski Avenue from the intersection with Riverside Avenue to the intersection of Howard Street (at St. Paul Street). The study may also consider the corridor’s relationship with Union Street, Willard Street and cross streets as appropriate. More information is at: https://www.ccrpcvt.org/our-work/transportation/current-projects/corridors-circulation/winooski-avenue-corridor-study/

Feel free to reach out with any questions prior to Wednesday’s Commission meeting. Thank you.
Commissioners Present: Robert Alberry; Tiki Archambeau (Chair); Solveig Overby; Jeff Padgett (via phone at 6:35pm); Justine Sears (Vice Chair). Commissioners Absent: Jim Barr; Chris Gillman (Clerk).

Item 1 – Call to Order – Welcome – Chair Comments
Chair Archambeau calls meeting to order at 6:33pm and makes opening comments.

Item 2 – Agenda
Commissioner Alberry makes motion to accept agenda and is seconded by Vice Chair Sears.
Action taken: motion approved;
“Ayes” are unanimous.

**Commissioner Padgett phones in**

Item 3 – Public Forum (3 minute per person time limit)
Jason Van Driesche, Ward 5, speaks on leaving Local Motion in May 2018 and Agenda Item 5.
Erin Malone, Ward 2 businessperson, speaks on Consent Agenda Items E and F.
Hans van Wees, Ward 3 businessperson, speaks on Agenda Item 5.
Caryn Long, Ward 1, speaks on street parking, speed limit enforcement, and Agenda Item 5.

Item 4 – Consent Agenda
A. Traffic Status Report
B. Taxicab Stand/Loading Zone Dual Use & Proposed Parking Meter Zone
C. Accessible Space Johnson Street
D. Meters on Lower Church St & King St
E. 15-Minute Parking on North Willard St
F. Truck Loading on North Street
G. No Right Turn on Red on North Union Street at Pearl St
Commissioner Alberry makes motion to accept Consent Agenda and is seconded by Vice Chair Sears.
Action taken: motion approved.
“Ayes” are unanimous.

Item 5 – Conceptual Plans for Bank Street & Cherry Street
A) Communication by DPW Engineer Laura Wheelock and CEDO Senior Projects and Policy Specialist Kirsten Merriman Shapiro who speak on the Bank St & Cherry St conceptual plans.
B) Commission Questions
Chair Archambeau, Vice Chair Sears, and Commissioner Overby ask questions on Item 5 with DPW Director Chapin Spencer, Engineer Wheelock, and Specialist Merriman Shapiro answering.
C) Public Comment
Caryn Long, Ward 1, speaks on Item 5 with DPW Senior Transportation Planner Nicole Losch and Specialist Merriman Shapiro answering.
Hans van Wees, Ward 3 businessperson, speaks on Item 5.
D) Commissioner Discussion
Commissioner Overby engaged in a discussion over Item 5.
E) Action Requested – None.
Item 6 – Water Billing Update
A) Communication by Director Spencer and Assistant DPW Director – Water Resources Megan Moir who speak on the water billing anomaly follow-up.
B) Commission Questions
Chair Archambeau and Commissioner Overby ask questions on Item 6 with Director Spencer and Assistant Director Moir answering.
C) Public Comment
D) Commissioner Discussion
E) Action Requested – None.

Item 7 – Approval of Draft Minutes of 3-21-18
Commissioner Alberry makes motion to accept draft minutes of 3-21-18 and is seconded by Commissioner Overby.
**Chair Archambeau, Commissioner Overby, and Director Spencer engaged in a discussion over Item 7**
Action take: motion approved;
“Ayes” are unanimous.

Item 8 – Director’s Report
Director Spencer reports on the Champlain Parkway right-of-way process, the Public Engagement Plan update, the new revenue control system in the garages, and the Monday (16 April) release at the Waste Water Treatment Plant of 7 million gallons of partially disinfected effluent. Chair Archambeau and Commissioner Overby ask questions on the effluent release with Assistant Director Moir answering. Commissioner Overby asks questions on the Champlain Parkway and the new garage revenue control system with Director Spencer answering.

Item 9 – Commissioner Communications
Vice Chair Sears comments on how Public Works takes comments/suggestions with Director Spencer responding and on the traffic calming process for Ward St. Commissioner Overby comments on the street parking comment brought up in Public Comments with Director Spencer responding. Chair Archambeau comments on German Street parking, in connection to the narrow/yield streets plan, with Director Spencer responding.

Item 10 – Adjournment & Next Meeting Date – May 16, 2018
Motion to adjourn made by Commissioner Alberry and seconded by Vice Chair Sears.
Action taken: motion approved;
“Ayes” are unanimous.

Meeting adjourned at 8:34pm.
