Purpose: This amendment is a comprehensive revision of the city’s sign regulations in an effort to create a more prescriptive and objective series of sign types by which to regulate the dimensions, number, size, location, lighting, and general design of each type and thereby assure content-neutrality.

ARTICLE 7: SIGNS

Introduction: This Article of the Burlington Comprehensive Development Ordinance addresses the type, size, location, and design of all types of Signs throughout the city. In the regulation of Signs, it is important to understand that the City is considering only the physical aspects of the Sign, not content. Signs can be considered and permitted individually, or as part of a “Sign Master Plan” that treats all Signs within a development or complex as a group to encourage creativity.

Table of Contents – to be revised later

Sec. 7.1.6 Non-Conforming Signs

Any legally pre-existing sign or other advertising device which does not conform to the current provisions of this ordinance Article in terms of location, area, illumination, type, or height shall be deemed a non-conforming sign. Non-conforming signs may remain in use at the same location, and ordinary maintenance and repair of such signs shall be permitted.

A non-conforming sign shall not be relocated, enlarged, replaced, redesigned, or altered in any way (except for repainting, refacing, repair or a change of lettering, logo, or colors using the same materials within the existing sign frame subject to obtaining a zoning permit) except to bring the sign into complete or substantially greater compliance with this Article. In such cases, the DRB may allow a new sign to be in substantially greater compliance than the existing nonconforming sign subject to the development review criteria applicable requirements of this Article. Nonconforming signs that are destroyed or damaged by 50% or more of their value shall not be rebuilt or repaired after one (1) year except in full conformance with this Article.

If the use is not reestablished, or a new use is not established, within one (1) year, then the entire Sign Structure and mounting hardware shall be removed.

Because of their historic and iconic nature in the community, the following Signs shall be exempt from the removal requirements of this Section. Such Signs may be repainted, refaced, repaired, and/or include a change of lettering, logo, or colors so long as the repair or replacement retains the same size, shape, location, design, materials, and other distinguishing characteristics of the Sign existing as of October 1, 2017 or earlier. Any repair or modification that alters the size, shape, location, design, materials, and other distinguishing characteristics of the Sign shall be required to conform to all requirements of this Article.
Off-premise signs shall not be permitted with the following exceptions:

(a) **Political signs as regulated by Sec. 7.1.3;**

(b) **Temporary non-illuminated signs directing persons to temporary exhibits, shows or events provided:**

   2. Such signs are not posted earlier than two (2) weeks prior to the event and are removed within three (3) days after the event.

(c) **Non-illuminated signs used for directing members or patrons to service clubs, churches or other nonprofit organizations provided:**
   1. Such signs indicate only the name of the facility and the direction of the facility; and,
   2. Such signs do not exceed four (4) square feet in area.

(d) **Sandwich board signs as regulated by the dept. of public works.**

Applications involving an Electronic Changeable Message must also provide written certification from the sign manufacturer that the luminance of the display has been factory pre-set so that it will not exceed 5,000 nits;
6. The total square footage of all existing signs for the establishment; and,
7. Photographs of the building or site where the sign is proposed.

Such Sign Permit requests require only administrative review and approval pursuant to the procedural requirements of Sec. 3.2.7 and the requirements of this Article except as provided for in Sec. 7.1.6 for modifications to a non-conforming sign.

The Church Street Marketplace District shall be afforded an opportunity to review and comment on any application for a Sign placed on the Church Street Marketplace prior to approval under this Article.
Sec. 7.1.9 Calculation of Sign Area and Height

(a) The following shall govern the calculation of a Sign’s area:

1. The area of a Sign shall include all numerals, lettering, designs, logos, or symbols, together with the background, whether open or enclosed, upon which they are displayed. 2. Where a Sign consists of only individual numerals, letters, logos, or symbols attached, painted, or applied directly to a door, wall, or window, the area shall be considered to be the smallest rectangle encompassing all the letters and symbols. (See Figure 7.1.9-1)

3. If a Sign has two or more faces, the area of all faces is included in determining the maximum area of the Sign, unless the two faces are identical and placed back to back or are no more than two feet apart. In such case, the Sign area is calculated as the area of one face. If the two faces are unequal in area, the area of the larger face is used to calculate Sign area.

4. The Sign area of a three-dimensional, free-form, or sculptural (non-planar) Sign is calculated as 50% of the sum of the area of the four vertical sides of the smallest cube that will encompass the Sign.

5. The maximum allowable area of a Sign shall include all permanent Signs attached, painted, or applied to a building facade. If an establishment has walls fronting on two (2) or more streets, the Sign area for each street shall be computed separately.

(c) The luminance of any Sign shall not exceed 250 nits between dusk and dawn, as measured from the brightest element of the sign’s face. Dusk and dawn are defined as, respectively, the time starting at one-half hour before sunset and one-half hour after sunrise, as determined by the National Weather Service (actual time).

In such cases, the receptacle or device housing the light source shall not extend more than 12 inches above ground, and shall be fully screened and housed.
   5. Projecting light fixtures must be simple and unobtrusive in appearance and not obscure the Sign.

   2. The Sign cabinet shall fully enclose the light source so that it is not visible from the exterior of the Sign.
3. The background must be opaque or a darker color than the message of the Sign.

1. Direct illumination is limited to letters, numbers, symbols, and accents.

(h) Raceways, Conduit, Wiring, and Transformers
1. All electrical raceways, conduits, and wiring shall be contained completely within the Sign assembly or inside the wall and shall not be exposed.

4. In computing the area of a double-faced sign, only one side shall be considered if both faces are identical. The back lit sign shall not increase the measurable vertical light level at a point 20 feet distant from the sign in any direction.

In addition to other permitted lamp types, neon or similar lighting may be used to illuminate backlit signs.

Internally illuminated signs:

(c) All of the Signs in a Master Sign Plan shall be designed and organized in a manner consistent and complementary with the overall architecture of the Building, and employ complimentary materials, colors, design, and scale of letters.

(d) The sign master plan shall be compatible with the site and buildings and character of the surrounding area pursuant to the provisions of Article 6. While Individual signs in an approved Master Sign Plan may vary from the dimensional and locational restrictions standards of Sections 7.2.3, 7.2.4, 7.2.5 and 7.2.6 in Part 2 of this Article pertaining to each Sign Type, and placement of signs on a structure or lot.
