

New Street Segments by CityPlace Burlington

The City has been coordinating with the CityPlace Burlington Design team to ensure that the design of these two new street segments between Bank and Cherry Street: Pine and St. Paul are based on the newly adopted *City of Burlington Downtown Street Design and Construction Standards*. The current designs below do not show the design alignment modifications for the Pine & Cherry Street and Bank & St. Paul Street intersections as the Developer is awaiting the final approval of the conceptual design for Bank and Cherry Streets by the City Council.
