

# PIPE UP BURLINGTON!

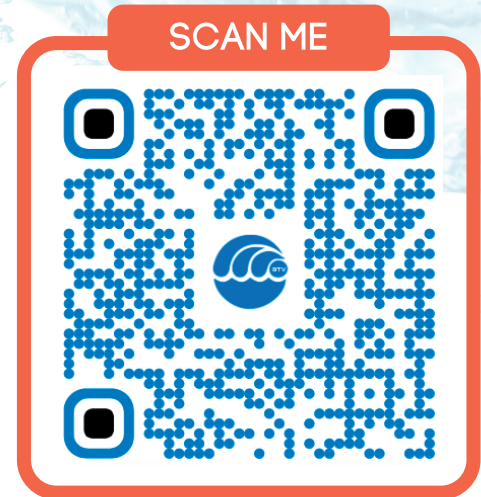

## WE NEED YOUR HELP TO IDENTIFY YOUR WATER SERVICE LINE MATERIAL. PARTICIPATE EARLY TO BE ENTERED TO WIN A MONTHLY PRIZE!

Burlington Water Resources is working on a recent US EPA requirement to conduct a full water system inventory. We need *your help* to identify the material of every water service line in the City. We will use this information to identify and replace older water service pipes that may contain lead (unlikely in Burlington).

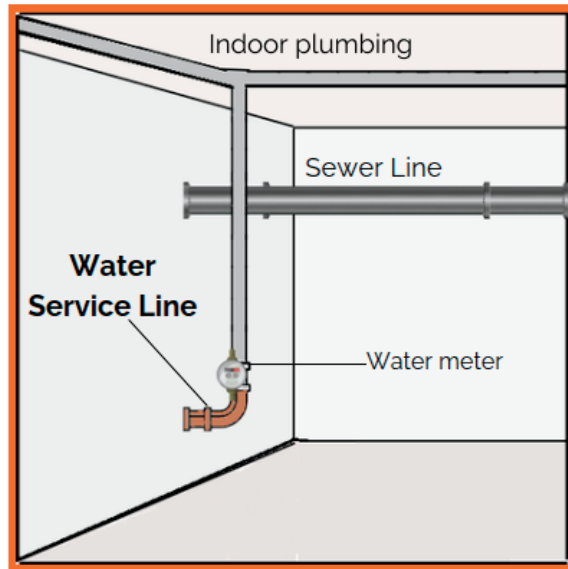

### PARTICIPATING IS EASY

- 1** **Scan** the QR code or visit our website: [www.burlingtonvt.gov/water/SLIP](http://www.burlingtonvt.gov/water/SLIP)
- 2** **Find** your water service line.
- 3** **Complete** the short survey!

## WHERE IS MY WATER SERVICE LINE?

Your water service line enters the property through the foundation and connects to your water meter in the basement. If the property does not have a basement then look in another protected area like a utility closet or garage.

Please visit our website for step by step instructions on how to find your water service line and identify the pipe material.

If you live in a multi-unit building, we will coordinate directly with the property owner or manager to identify the incoming service line.

**Questions? We are happy to help!**

Email [water-resources@burlingtonvt.gov](mailto:water-resources@burlingtonvt.gov)  
or call (802) 863-4501.
