

Restorative Time - The Relax & Revive Routine

KEEP HYDRATED - FEED YOUR BRAIN

• Drink 8 ounces of water, juice or herbal tea. • Your brain is fueled by carbohydrates, but choose healthy snacks like fruit, vegetables, nuts and seeds.

REST EYES

• Close your eyes and count to 15 or turn your eyes away from the computer screen and focus on something 5 to 10 feet in the distance, count to 15.

• If your eyes are dry or itchy from computer use, ask your doctor to recommend lubricating eye drops.

BREATH DEEPLY

• Breathe through your nose using your diaphragm to fully empty, and fill your lungs. • It helps to close your eyes and concentrate on the action of your breath flowing in and out of your nose. • Breathing deeply helps regulate your heart beat and increased the supply of restorative oxygen to your brain. You will feel more calm, and find it easier to concentrate when you return to your work.

STRETCH

• Achieve each position slowly. Do not bounce into or out of position. • Hold each position as instructed, then repeat on the other side.
