

2000 Burlington Census Tracts

Census tracts are small, relatively permanent geographic entities within counties which are used by the Census Bureau, an agency of the U.S. Department of Commerce, to collect, organize, tabulate, and present the results of its decennial censuses. There are eleven census tracts in Burlington. The boundaries of a number of tracts did change between the 1990 and 2000 censuses.

Burlington Low and Moderate Income Areas

HUD provides tabulations of the areas within the city where over half of the residents are living in households whose income is 80% or less of the area median income. The map below shows the smallest geographic units – census block groups – at which this income information is available. This information is important to determining whether activities serving specific areas of the city (as opposed to specific city residents or the entire city) meet the national objectives of the CDBG Program. The table on the following page shows the number and percentage of low- and moderate-income residents within each census block group in the city.
