

HYDE STREET TRANSPORTATION PILOT

*Hyde Street will be closed at North Willard Street
from November 14 through December 13, 2012.*

This transportation pilot is being pursued to test a conceptual traffic calming plan for Hyde Street. Traffic calming was requested by residents; while no decisions have been made, this pilot project will provide additional information to help residents and the city determine if this is an effective and viable option to pursue.

The Department of Public Works will assess the traffic speed and volume on Hyde Street south of Archibald Street; on Archibald Street west of North Willard Street; and on North Willard Street south of Archibald Street. Feedback from all affected parties, including the Police and Fire Departments, will be solicited.

*Love it, hate it, or completely
indifferent? Please send us your
feedback!*
